

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

# Comata 2.4 GHz SMD Antenna

Part No. A6111

gigaNOVA<sup>®</sup>

Product Specification

## 1 Features

- Designed for 2.4 GHz applications: Bluetooth<sup>®</sup>, Wi-Fi<sup>®</sup> (802.11a/b/g), ZigBee<sup>®</sup>, etc. as well as 2.3 GHz WiMAX<sup>™</sup>, 2.5 GHz WiMAX<sup>™</sup> and WiBro
- Easy to integrate
- Designed for use with the ground plane extended beneath the antenna
- High efficiency
- Light weight
- Intended for SMD mounting
- Supplied in tape on reel

## 2 Description

Comata is intended for use with all 2.4 GHz applications. The antenna uses a ground plane in order to radiate efficiently and the ground plane must extend underneath the antenna itself.

## 3 Applications

- Mobile phones
- PDAs
- PNDs
- Headsets
- PMPs / MP3s
- Laptops
- PC-Cards
- Sensors
- Automotive

## 4 Part number

### Comata: A6111

## 5 General data

Product name	Comata 2.4 GHz
Part Number	A6111
Frequency	2.4 – 2.5 GHz
Polarization	Linear
Operating temperature	-40 °C to +85 °C
Impedance with matching	50 Ω
Weight	0.3 g
Antenna type	SMD
Dimensions	12.8 x 3.6 x 3.3 [mm]

## 6 Electrical characteristics

	Typical performance	Conditions
Peak gain	0 dBi	All data measured on Antenova's reference board, part number A6111-U1  Data given for the 2.4 – 2.5 GHz frequency range
Average gain	-3.5 dBi	
Average efficiency	45%	
Maximum Return Loss	-8 dB	
Maximum VSWR	2.3:1	

## 7 Electrical performance

### 7-1 Return Loss

### 7-2 VSWR

### 7-3 Antenna patterns

XY plane

ZY plane

XZ plane

Patterns show combined polarisations  
measured on reference board A6111-U1

## 8 Antenna dimensions

## 9 Antenna footprint

Comata (Part No: A6111)

- CAD files of the antenna footprint are available from [www.antenna-m2m.com](http://www.antenna-m2m.com).

I	S	K	J	M	O
$3.0 \pm 0.1$	$1.2 \pm 0.1$	$6.9 \pm 0.1$	$1.0 \pm 0.1$	$\geq 0.4 \pm 0.1$	$0.2 \pm 0.1$

Dimensions in mm

## 10 Electrical interface

### 10-1 Transmission lines

- All transmission lines should be designed to have a characteristic impedance of 50  $\Omega$
- The length of the transmission lines should be kept to a minimum
- Any other parts of the RF system like transceivers, power amplifiers, etc, should also be designed to have an impedance of 50  $\Omega$

Once the material for the PCB has been chosen (PCB thickness and dielectric constant), a coplanar transmission line can easily be designed using any of the commercial software packages for transmission line design. For the chosen PCB thickness, copper thickness and substrate dielectric constant, the program will calculate the appropriate transmission line width and gaps on either side of the track so the characteristic impedance of the coplanar transmission line is 50  $\Omega$ .

### 10-2 Matching circuit

The antenna requires a matching circuit that must be optimized for each customer's product. The matching circuit will require up to three components and the following pad layout should be designed into the device so the correct circuit can be installed:

Antenna feed pad indicated. All other pads should be connected to ground.

In addition to the matching circuit, a separate DC blocking capacitor will also be required between the radio and the antenna matching circuit.

**Note: The component values for the matching circuit will vary depending on the size of the PCB and surrounding components.** The impedance of the antenna should be measured before selecting suitable matching components. Antenna M2M offers this service on request. Contact [sales@antenna-m2m.com](mailto:sales@antenna-m2m.com) for further information.

### 10-3 Antenna placement

Antenova M2M strongly recommends placing the antenna near the edge of the board. Maximum antenna performance is achieved by placing the antenna towards one of the corners of the PCB, with the feed point of the antenna as close to the corner of the PCB as possible.

### 10-4 Reference board

The reference board has been designed for evaluation purposes of Comata 2.4 GHz and it includes a SMA female connector.

Dimensions in mm

To order a reference board contact [sales@antenuva-m2m.com](mailto:sales@antenuva-m2m.com).

## 11 Soldering

This antenna is suitable for lead free soldering.

The reflow profile should be adjusted to suit the device, oven and solder paste, while observing the following conditions:

- The maximum temperature should not exceed 240 °C
- However for lead free soldering, a maximum temperature of 255 °C for no more than 20 seconds is permitted.
- The antenna should not be exposed to temperatures exceeding 120 °C more than 3 times during the soldering process.

## 12 Hazardous material regulation conformance

The antenna has been tested to conform to RoHS requirements. A certificate of conformance is available from Antenna M2M's website.

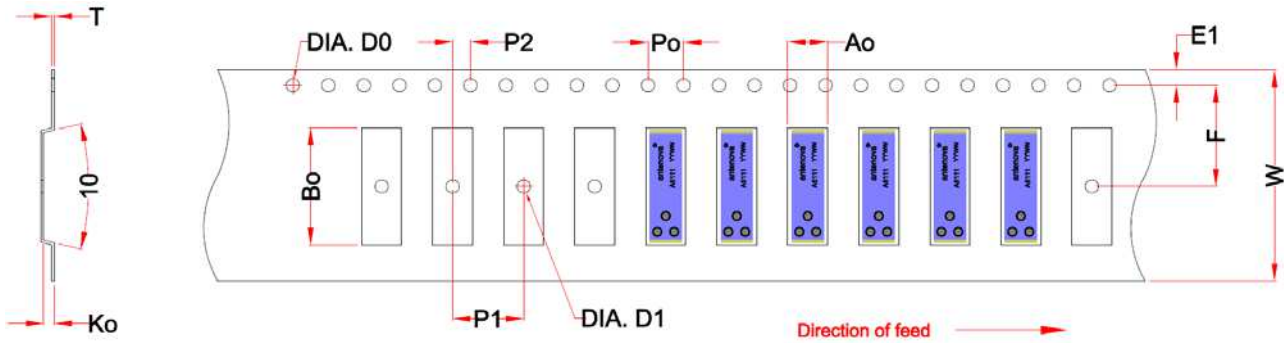

## 13 Packaging

### 13-1 Optimal storage conditions for packaged reels

<b>Temperature</b>	-10°C to 40°C
<b>Humidity</b>	Less than 75% RH
<b>Shelf Life</b>	18 Months
<b>Storage place</b>	Away from corrosive gas and direct sunlight
<b>Packaging</b>	Reels should be stored in unopened sealed manufacturer's plastic packaging.

**Note: Storage of open reels of antennas is not recommended due to possible oxidization of pads on antennas. If short term storage is necessary, then it is highly recommended that the bag containing the antenna reel is re-sealed and stored in like storage conditions as in above table.**

## 13-2 Tape characteristics

W	F	E1	P0	P1	P2	A0	B0	K0	T	D0	D1
24 ± 0.2	10.2 ± 0.1	1.75 ± 0.1	4 ± 0.1	8 ± 0.1	2 ± 0.1	3.9 ± 0.1	13.2 ± 0.1	3.7 ± 0.1	0.3 ± 0.05	Min 1.5	Min 1.5

Dimensions in mm

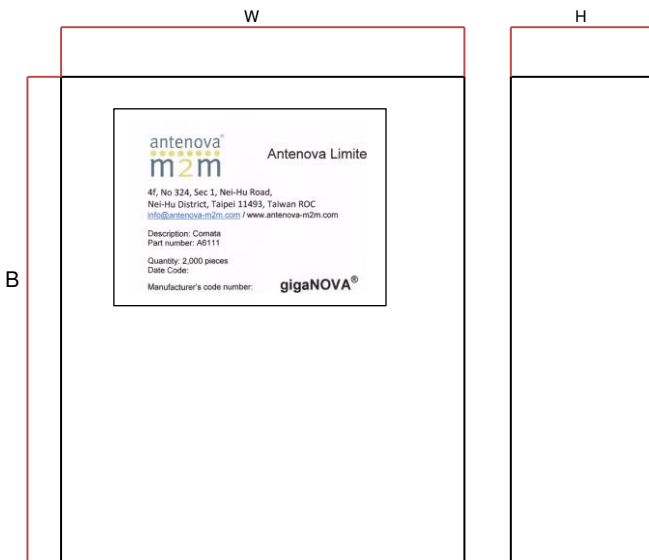

Quantity	Leading Space	Trailing Space
2000 pcs / reel	50 blank antenna holders	37 blank antenna holders

### 13-3 Reel dimensions

Width (W)	Reel Diameter (D)	Hub Diameter (H)	Shaft Diameter (C)
32 mm	330 ± 2 mm (13")	100 mm	13 ± 0.5 mm

### 13-4 Box dimensions

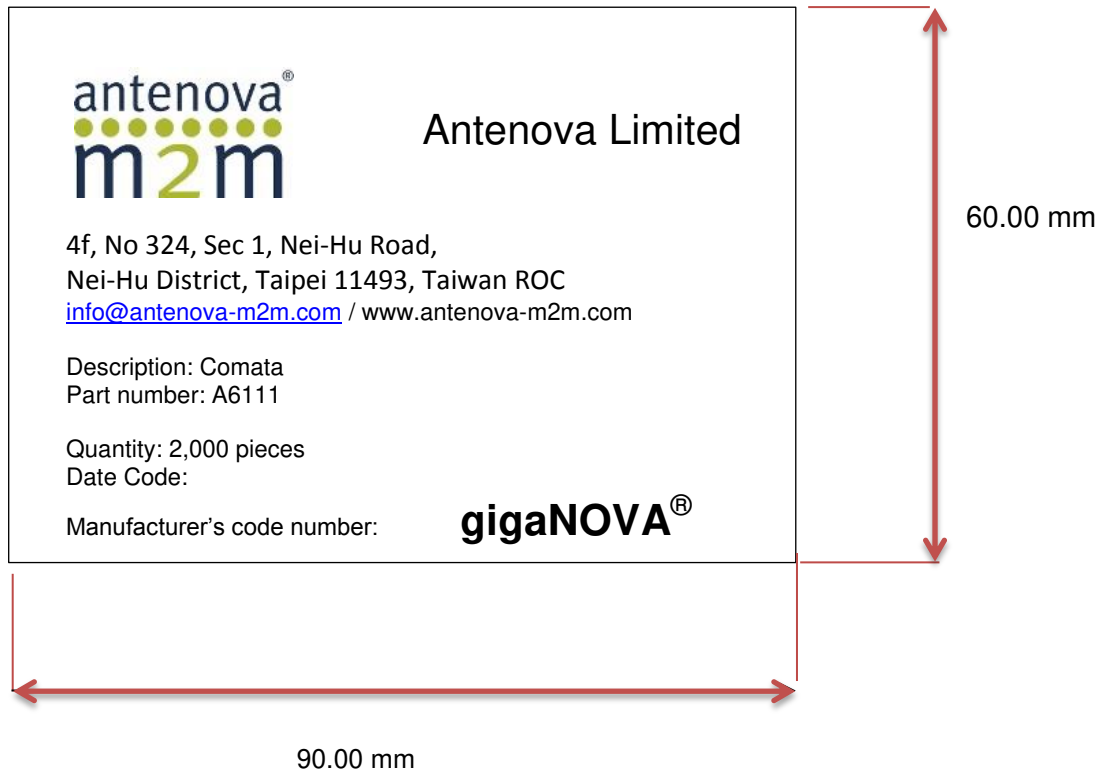

Width (W)	Breadth (B)	Thickness (H)
345 mm	345 mm	45 mm

### 13-5 Bag properties

Reels are supplied in protective plastic packaging

### 13-6 Reel label information
