Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Think Automation and beyond...

IDEC

New

ø16mm X6 Series
Emergency Stop Switches

IDEC CORPORATION

Third-generation
Reverse Energy Structure

First*1

Excellent safety

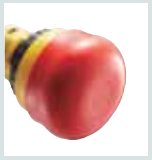
IDEC's unique Reverse Energy Structure, achieved as a result of in-depth failure analysis of emergency stop switches, has resulted in this innovative emergency stop switch.
X6 series emergency stop switches provide the highest level of safety, because the unibody design eliminates the possibility of the contact bocks falling off the switch (details on page 3).

*1: Based on IDEC research as of August 2012.

New

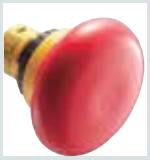
Unparalleled design

The smooth button is ideal for applications that require utmost cleanliness, such as food processing machines or semiconductor manufacturing equipment. Also suitable for applications requiring a sleek design of emergency stop switches, such as medical equipment.



ø30 mm Button Unmarked

ø30 mm Button Arrow Marked



ø40 mm Button Unmarked

ø40 mm Button Arrow Marked

Smallest*1 in its class

Only 23.9mm depth behind the panel

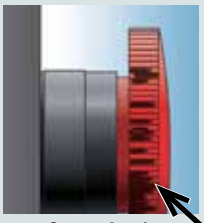
The short depth behind the panel reduces the required mounting space.
Depth: 30% reduction
Volume: 70% reduction
(Compared with conventional emergency stop switches)
Thus equipment and control panels can be made much smaller.

Conventional emergency stop switch with short depth behind the panel

Clean

Prevents dust build-up

ø16mm X6 Series



Conventional Operator

The smooth and ridgeless button surface prevents dust built-up, and is also easy to clean.

Variety

Two ways to reset, two button sizes.

The X6 emergency stop switch can be reset either by pulling or turning. The button is available in ø30 mm and ø40 mm sizes.
In addition to a red button, a yellow button is also available as a stop switch.

Two ways to reset

Pull to reset

Turn to reset

Two Button Sizes

30mm

40mm

Third-generation
Reverse Energy Structure

Highest Safety

IDEC's Unique Reverse Energy Structure

Third Generation

Compliant with international safety standards. Even more consideration has been taken into account on operator safety.

Satisfies the requirements of:
① ② ③

+

IDEC's Unique Reverse Energy Structure

Second Generation

Compliant with international safety standards.

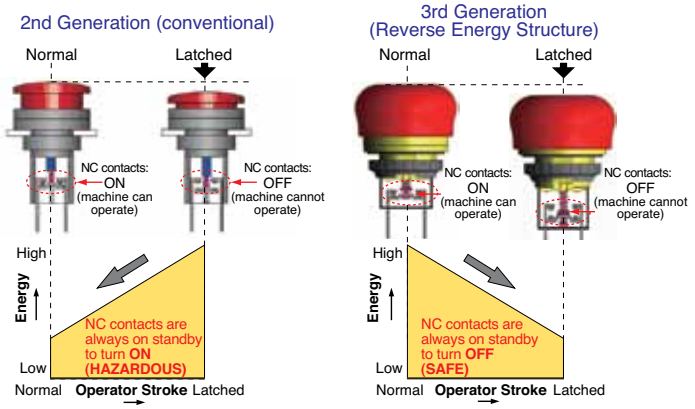
Satisfies the requirements of:
① ② ③

First Generation

Developed before the establishment of international safety standards.

Satisfies the requirements of:
① ②

Energy Status of Emergency Stop Switches



With X series emergency stop switches, the potential energy level of the latched status is lower than that of normal status. In the event the switch is damaged due to excessive shocks, the NC contacts will turn off, thus stopping the machine (patented design).

International Safety Standards Requirements

① Red-colored, mushroom actuator, with yellow background.
(IEC 60947-5-5; 4.2, ISO 13850; 4.4, IEC 60204-1; 10.7)

② Normally closed contacts with a direct opening action
(IEC 60947-5-5; 5.2, IEC 60947-5-1; Annex K)

③ The emergency stop function shall be maintained by latching of the operator until reset manually (IEC 60947-5-5; 6.2, ISO 13850; 4.4)

High functionality with sleek design

X6 series emergency stop switches for various applications

ø16 X6 Series Emergency Stop Switches (Unibody)

Third-generation emergency stop switch with Reverse Energy Structure
Smallest in its class

- Two button sizes—ø30mm and ø40mm
- Two button colors—red for emergency stop and yellow for stop switch
- Two ways of resetting —pulling and turning
- Solder/tab terminal #110 makes for easy connections
- UL, c-UL recognized, EN compliant
- Safety lock mechanism (IEC 60947-5-5; 6.2)
- Direct opening action (IEC 60947-5-5; 5.2, IEC 60947-5-1, Annex K)

Standards

Standard	Mark	Approval Organization/ File No.
UL508 CSA C22.2 No.14	c UL us	UL/c-UL File No.E68961
EN60947-5-1 EN60947-5-5 (Note)	TÜV	TÜV SÜD
	CE	European Commission's Low Voltage Directive
GB14048.5	CCC	CCC No. 2010010305411586 (Stop switch: CCC No. 2010010305411587)

Note: Except for stop switch (yellow button)

Contact Ratings

Rated Insulation Voltage (Ui)				250V		
Rated Thermal Current (Ith)				5A		
Rated Operating Voltage (Ue)				30V	125V	250V
Rated Operating Current (Note)	Main Contacts	AC 50/60 Hz	Resistive Load (AC-12)	–	5A	3A
			Inductive Load (AC-15)	–	1.5A	0.75A
		DC	Resistive Load (DC-12)	2A	0.4A	0.2A
			Inductive Load (DC-13)	1A	0.22A	0.1A

- Minimum applicable load: 5V AC/DC, 1 mA (reference value)
  (May vary depending on the operating conditions and load)
- Operational current represents the classification by making and breaking currents (IEC 60947-5-1).

Note:
TÜV rating: AC-15 0.75A/250V, DC-13 1A/30V
UL rating: Standard Duty AC 0.75A/250V
Standard Duty DC 1A/30V

Manufacturer:
IDEC CORP. 1-7-31 Nishimiyahara, Yodogawa-Ku, Osaka 532-8550, Japan
EU Authorized Representative:
IDEC Elektrotechnik GmbH
Wendenstrasse 331, D-20537 Hamburg, Germany

DECLARATION OF CONFORMITY:
We, IDEC CORPORATION 7-31, Nishimiyahara 1-chome Yodogawa-ku, Osaka 532-8550, Japan declare under our sole responsibility that the product:
Description: Emergency stop switches
Model No.: X6
to which this declaration relates is in conformity with the EC Directive on the following standard(s) or other normative document(s). In case of alteration of the product, not agreed upon by us, this declaration will lose its validity.
Applicable EC Directive: Low Voltage Directive (2006/95/EC)
Machinery Directive (2006/42/EC)
Applicable Standard(s): EN 60947-5-5

Specifications

Applicable Standards	IEC 60947-5-1, EN 60947-5-1 IEC 60947-5-5 (Note), EN 60947-5-5 (Note) JIS C8201-5-1, JIS C8201-5-5, UL508 CSA C22.2 No.14, GB14048.5
Operating Temperature	–25 to +60°C (no freezing)
Operating Humidity	45 to 85% RH (no condensation)
Storage Temperature	–45 to +80°C (no freezing)
Operating Force	Push to lock: 10.5N Pull to reset: 8.8N Turn to reset: 0.17 N·m
Minimum Force Required for Direct Opening Action	40N
Minimum Operator Stroke Required for Direct Opening Action	4.5 mm
Maximum Operator Stroke	4.5 mm
Contact Resistance	50 mΩ maximum (initial value)
Insulation Resistance	100 MΩ minimum (500V DC megger)
Overvoltage Category	II
Impulse Withstand Voltage	2.5 kV
Pollution Degree	3
Operation Frequency	900 operations/hour
Shock Resistance	Operation extremes: 150 m/s2 Damage limits: 1000 m/s2
Vibration Resistance	Operation extremes: 10 to 500 Hz amplitude 0.35 mm, acceleration 50 m/s2 Damage limits: 10 to 500 Hz, amplitude 0.35 mm, acceleration 50 m/s2
Mechanical Life	100,000 operations minimum
Electrical Life	100,000 operations minimum
Degree of Protection	IP65 (IEC 60529)
Short-circuit Protection	250V/10A fuse (Type aM IEC 60269-1/IEC 60269-2)
Conditional Short-circuit Current	1000A
Terminal Style	Solder/tab terminal #110
Recommended Tightening Torque for Locking Ring	0.88 N·m
Applicable Wire Size	1.25 mm2 maximum (AWG16 maximum)
Terminal Soldering Condition	310 to 350°C, within 3 seconds
Weight (approx.)	ø30mm button: 13g ø40mm button: 16g

Note: Except for stop switch (yellow button)

Accessories

Shape	Material	Part Number	Package Quantity	Remarks
Locking Ring Wrench 	Metal (nickel-plated brass)	MT-001	1	• Used to tighten the locking ring when installing the X6 switch onto a panel. • Recommended tightening torque: 0.88 N·m maximum
Locking Ring 	Plastic	XA9Z-LNPN10	10	• Black

Nameplate (for emergency stop switch)

Description	Legend	Part Number	Material	Background Color	Legend Color
For ø30mm Button	Blank	HAAV-0	Polyamide	Yellow	Black
	EMERGENCY STOP	HAAV-27			
For ø40mm Button	Blank	HAAV4-0			
	EMERGENCY STOP	HAAV4-27			

• Cannot be used with switch guard.

SEMI S2 Compliant Switch Guard

Shape	Material	Part Number	Remarks
Switch Guard 	Polyamide (PA6)	XA9Z-KG1	• IP65 degree of protection • Color: yellow (Munsell 2.5Y8/10 or equivalent) • Cannot be used with nameplate.

Note:
Switch guards have been designed for applications in semiconductor manufacturing equipment only. Do not use the switch guards with emergency stop switches which are installed on other machines such as machine tools or food processing machines. Machinery Directive of the European Commission and IEC 60204-1 require that emergency stop switches be installed in a readily accessible area, and the usage of switch guards is not permitted.

White Nameplate (for stop switch)

• Remove the projection from the nameplate using pliers, otherwise the switch cannot be installed.
• Panel thickness when using a nameplate: 0.5 to 3 mm

ø16 X6 Series Emergency Stop switch (Unibody)

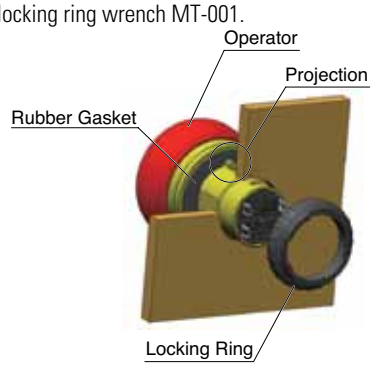
⚠ Safety Precautions

- Turn off power to the X6 series units before installation, removal, wiring, maintenance, and inspection. Failure to turn power off may cause electrical shocks or fire hazard.
- For wiring, use wires of proper size to meet the voltage and current requirements and solder properly. Improper soldering may cause overheating and create fire hazards.

Instructions

Panel Mounting

Remove the locking ring from the operator and check that the rubber gasket is in place. Insert the operator from panel front into the panel hole. Face the side with the projection upward, and tighten the locking ring using the locking ring wrench MT-001.



Notes for Panel Mounting

Using the locking ring wrench MT-001, tighten the locking ring to a torque of 0.88 N·m. Do not use pliers. Do not apply excessive force, otherwise the locking ring will become damaged.

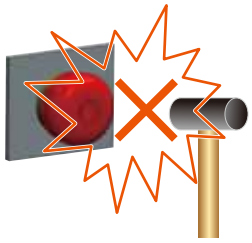
Contact Bounce

When the button is reset by pulling or turning, the NC contacts will bounce. When designing a control circuit, take the contact bounce time into consideration (reference value: 20 ms).

Do not apply any external shock to the emergency stop switches, otherwise the contact will bounce.

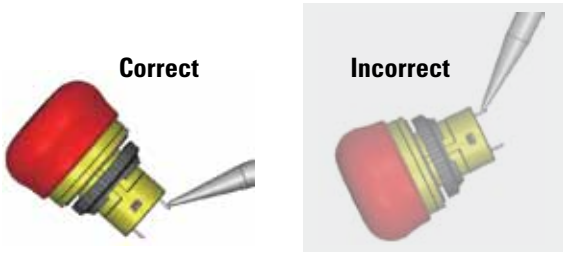
Handling

Do not expose the switch to excessive shock and vibrations, otherwise the switch may be deformed or damaged, causing malfunction or operation failure.



Wiring

1. Applicable wire size is 1.25 mm^2 (16 AWG) maximum.
2. Solder the terminals using a soldering iron at 310 to 350°C for 3 seconds maximum. Do not use flow or dip soldering. SnAgCu type lead-free solder is recommended. Make sure that the soldering iron touches the terminals only, not plastic parts. Do not apply external force such as bending the terminals or applying tensile force on the wires.
3. Use a non-corrosive rosin flux. To prevent the flux from entering the switch while soldering, face the terminals downward.



4. Because the terminal spacing is narrow, use protective tubes or heat shrinkable tubes to avoid burning the wire sheath or causing a short circuit.
5. Apply force on the terminals in the vertical direction to the panel only, otherwise the terminals will be damaged.
6. When using tab connectors, specify quick connect #110 and 0.5mm tab thickness.
