### GENERAL DESCRIPTION

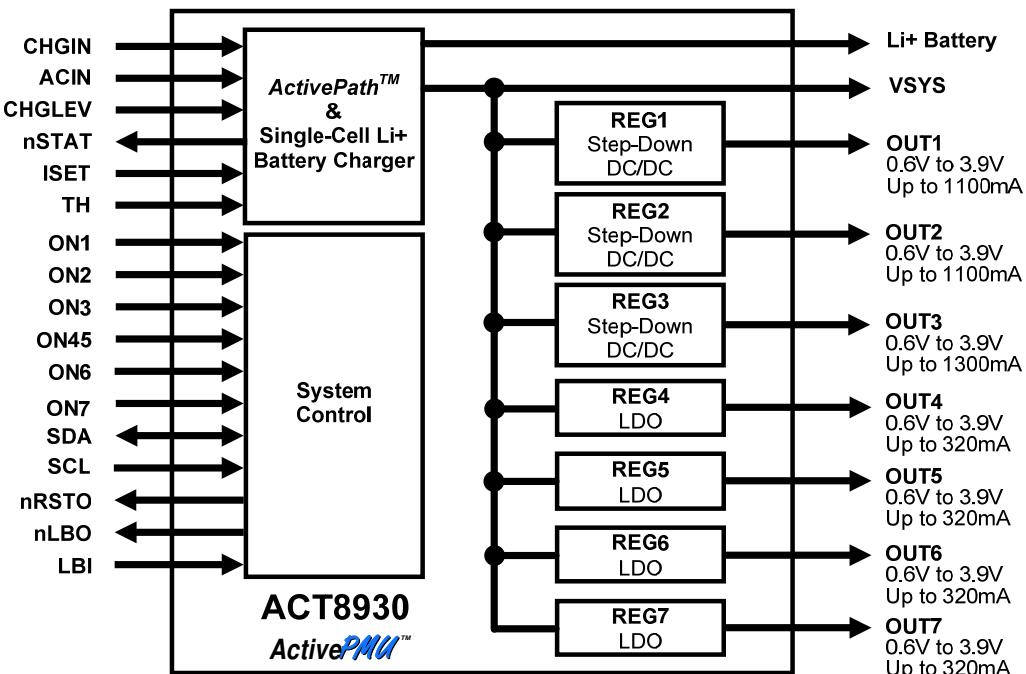

The ACT8930 is a complete, cost effective, highly-efficient ActivePMU<sup>TM</sup> power management solution, for portable handheld equipment such as Smartphones, Mobile Internet Devices (MID), eBooks and etc.

This device features three step-down DC/DC converters and four low-noise, low-dropout linear regulators, along with a complete battery charging solution featuring the advanced ActivePath<sup>TM</sup> system-power selection function.

The three DC/DC converters utilize a high-efficiency, fixed-frequency (2MHz), current-mode PWM control architecture that requires a minimum number of external components. Two DC/DCs are capable of supplying up to 1100mA of output current, while the third supports up to 1300mA. All four low-dropout linear regulators are high-performance, low-noise regulators that supply up to 320mA each.

The ACT8930 is available in a compact, Pb-Free and RoHS-compliant TQFN55-40 package.
