

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Description

The AH9251 is a medium sensitivity Hall-effect switch with internal pull-up resistor on the output, designed for battery operated handheld equipments to industrial applications.

A chopper stabilized architecture improves stability of magnetic switch points over the whole operating range. A sleep-awake logic controls the sleep and awake time to reduce the average operating current of the device. During the awake time, the output is changed with the magnetic flux density. During the sleep time, the output is latched in its previous state and the current consumption reduces to 4 μ A typical at 3V. The average current consumption is 8 μ A at 3V.

The output can be switched on with either north or south pole of sufficient strength. If the magnetic flux density perpendicular to the part marking surface is larger than operating point (B_{OP}), the output will be turned on; if it is less than releasing point (B_{RP}), the output will be turned off.

The AH9251 is available in industry standard TO92S and SC59 packages.

Features

- Omnipolar Operation (Switching with North or South Poles)
- 2.5V to 5.5V Power Supply
- Micropower Operation
- Built in Pull-up Resistor on the Output
- Stabilized Chopper
- Superior Temperature Stability
- Digital Output Signal
- -40°C to +85°C Operating Temperature
- ESD (HBM): 5000V
- Small Low Profile Industry Standard SC59 and TO92S Packages
- **Totally Lead-Free & Fully RoHS Compliant (Notes 1 & 2)**
- **Halogen and Antimony Free. "Green" Device (Note 3)**

Pin Assignments

TO92S

(Top View)

SC59

Applications

- Handheld Wireless Applications Proximity Detection Switches
- Doors, Lids, Covers and Tray Position Detect Switches
- Liquid Level Detection
- Battery Powered Consumer, Home Appliances and Industrial Applications

- Notes:
1. No purposely added lead. Fully EU Directive 2002/95/EC (RoHS) & 2011/65/EU (RoHS 2) compliant.
 2. See http://www.diodes.com/quality/lead_free.html for more information about Diodes Incorporated's definitions of Halogen- and Antimony-free, "Green" and Lead-free.
 3. Halogen- and Antimony-free "Green" products are defined as those which contain <900ppm bromine, <900ppm chlorine (<1500ppm total Br + Cl) and <1000ppm antimony compounds.

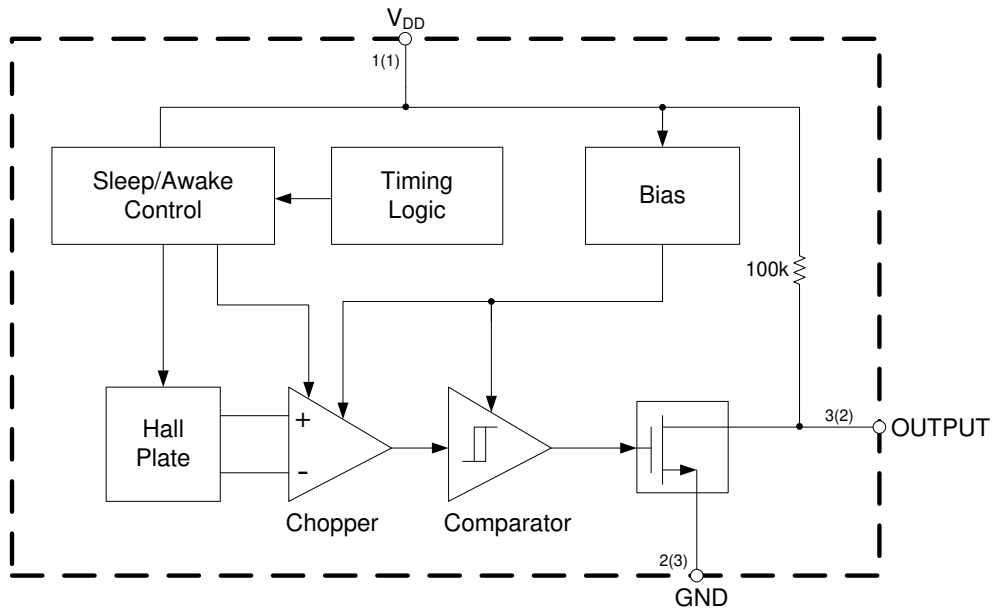

Typical Applications Circuit

Pin Descriptions

Pin Number		Pin Name	Function
TO92S	SC59		
1	1	V _{DD}	Power supply pin
2	3	GND	Ground pin
3	2	OUTPUT	Output pin

Functional Block Diagram

NEW PRODUCT

Absolute Maximum Ratings (Note 4) (@T_A = +25°C, unless otherwise specified.)

Symbol	Parameter	Rating		Unit
V _{DD}	Supply Voltage (Note 5)	7		V
I _{DD}	Supply Current (Fault)	6		mA
V _{OUT}	Output Voltage	7		V
I _{OUT}	Output Current	2		mA
B	Magnetic Flux Density	Unlimited		Gauss
P _D	Power Dissipation	TO92S	230	mW
		SC59	230	
T _{STG}	Storage Temperature	-55 to +150		°C
T _J	Junction Temperature	+150		°C
–	ESD (Human Body Model) (Note 6)	5000		V
–	ESD (Machine Model) (Note 6)	400		V

- Notes:
- Stresses greater than the 'Absolute Maximum Ratings' specified above may cause permanent damage to the device. These are stress ratings only; functional operation of the device at these or any other conditions exceeding those indicated in this specification is not implied. Device reliability may be affected by exposure to absolute maximum rating conditions for extended periods of time.
 - The absolute maximum V_{DD} of 7V is a transient stress rating and is not meant as a functional operating condition. It is not recommended to operate the device at the absolute maximum rated conditions for any period of time.
 - Electronic semiconductor products are sensitive to Electro Static Discharge (ESD). Always observe Electro Static Discharge control procedures whenever handling semiconductor products.

Recommended Operating Conditions

Symbol	Characteristic	Conditions	Min	Max	Unit
V _{DD}	Supply Voltage	Operating	2.5	5.5	V
T _A	Operating Temperature Range	Operating	-40	+85	°C

Electrical Characteristics (Note 7) (@T_A = +25°C, V_{DD} = 3V, unless otherwise specified.)

Symbol	Characteristic	Conditions	Min	Typ	Max	Unit
V _{DD}	Supply Voltage	Operating	2.5	3	5.5	V
I _{DD_AW}	Supply Current During "Awake" Period	T _A = -40 to +85°C, V _{DD} = 2.5V to 5.5V	–	1.8	3	mA
I _{DD_SL}	Supply Current During "Sleep" Period	T _A = -40 to +85°C, V _{DD} = 2.5V to 5.5V	–	4	10	µA
I _{DD_AVG}	Average Supply Current	T _A = -40 to +85°C, V _{DD} = 2.5V to 5.5V	–	8	15	µA
I _{OUT}	Output Current	–	–	–	1.0	mA
I _{OFF}	Output Leakage Current	V _{OUT} = 5.5V, Output off	–	<0.1	1	µA
V _{OUT(SAT)}	Output Saturation Voltage	I _{OUT} = 1.0mA, Output on	–	–	0.4	V
t _{AW}	Awake Mode Time	Operating	–	150	–	µs
t _{SL}	Sleep Mode Time	Operating	–	100	–	ms
D	Duty Cycle	–	–	0.15	–	%
f _C	Chopper Frequency	–	–	15	–	kHz

- Note: 7. Parameters values over operating temperature range are not tested in production, they are guaranteed by design, process control and characterization. The magnetic characteristics may vary with supply voltage, operating temperature and after soldering.

Electrical Characteristics (Cont.) (@ $T_A = +25^\circ\text{C}$, $V_{DD} = 3\text{V}$, unless otherwise specified.)

Magnetic Characteristics (Notes 8 & 9) (@ $T_A = -40^\circ\text{C}$ to $+85^\circ\text{C}$, $V_{DD} = 3\text{V}$, unless otherwise specified.)

(1mT=10 Gauss)

Symbol	Parameter	Conditions	Min	Typ	Max	Unit
B_{OPS} (South Pole to Part Marking Side)	Operating Point	$B > B_{OPS}, V_{OUT} = \text{Low (output on)}$	40	60	80	Gauss
B_{OPN} (North Pole to Part Marking Side)		$B > B_{OPN}, V_{OUT} = \text{Low (output on)}$	-80	-60	-40	Gauss
B_{RPS} (South Pole to Part Marking Side)	Releasing Point	$B < B_{RPS}, V_{OUT} = \text{High (output off)}$	30	50	70	Gauss
B_{RPN} (North Pole to Part Marking Side)		$B < B_{RPN}, V_{OUT} = \text{High (output off)}$	-70	-50	-30	Gauss
B_{HYS} ($B_{OPX} - B_{RPX}$)	Hysteresis	(Note 9)	-	10	-	Gauss

- Notes:
- Parameters values over operating temperature range are not tested in production, they are guaranteed by design, process control and characterization. The magnetic characteristics may vary with supply voltage, operating temperature and after soldering.
 - Maximum and minimum hysteresis is guaranteed by design and characterization.
 B_{OPX} =operating point (output turns on); B_{RPX} =releasing point (output turns off)

LIFE SUPPORT

Diodes Incorporated products are specifically not authorized for use as critical components in life support devices or systems without the express written approval of the Chief Executive Officer of Diodes Incorporated. As used herein:

A. Life support devices or systems are devices or systems which:

1. are intended to implant into the body, or
2. support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in significant injury to the user.

B. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or to affect its safety or effectiveness.

Customers represent that they have all necessary expertise in the safety and regulatory ramifications of their life support devices or systems, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of Diodes Incorporated products in such safety-critical, life support devices or systems, notwithstanding any devices- or systems-related information or support that may be provided by Diodes Incorporated. Further, Customers must fully indemnify Diodes Incorporated and its representatives against any damages arising out of the use of Diodes Incorporated products in such safety-critical, life support devices or systems.
