## : ©hipsmall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation, and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## Low Power Multiclock Generator with VCFS

 AK8135F
## Features

- 24.576 MHz Crystal Input
- One 24.576MHz-Reference Output
- Selectable Clock out Frequencies:
- 24.576 MHz at CLK1
- 24.99972 MHz at CLK2
- 33.332965 MHz at CLK3
- 27.000 MHz at REF1-4
- Built-in two VCFS
- Pull Range: $\pm 85$ ppm (typ.)
- Low Jitter Performance
- Period Jitter:

150 psec (Typ.) at CLK1-3, REF1-4

- Long term jitter:

400 psec (Typ.) at CLK1-3, REF1-4

- Low Current Consumption:

24 mA (Typ.) at 3.3 V

- Low C/N output:

72 dB (Typ.) at REF1-4

- Supply Voltage:
$3.0-3.6 \mathrm{~V}$
- Operating Temperature Range:
-20 to $+85^{\circ} \mathrm{C}$
- Package:

30-pin VSOP (Lead free)

## Description

AK8135F is a member of AKM's low power multi clock generator family designed for Recorders, DTVs or STBs, requiring a range of system clocks with high performance. AK8135F generates different frequency clocks from a 24.576 MHz crystal oscillator and provides them to seven outputs. The on-chip VCFS (Voltage Controlled Frequency Synthesizer) accepts a voltage control input to allow the output clocks to vary by $\pm 85 \mathrm{ppm}$ for synchronizing to the external clock system.
Both circuitries of VCFS and PLL in AK8135F are derived from AKM's long-term-experienced clock device technology, and enable clock output to perform low jitter and to operate with very low current consumption.
AK8135F is available in a 30-pin VSOP package.

## Applications

- HDD, DVD, BD Recorder
- DTV
- Set-Top-Boxes

## Absolute Maximum Rating

Over operating free-air temperature range unless otherwise noted ${ }^{(1)}$

| Items | Symbol | Ratings | Unit |
| :--- | :---: | :---: | :---: |
| Supply voltage | VDD | -0.3 to 4.6 | V |
| Input voltage | VIN | VSS-0.3 to VDD+0.3 | V |
| Input current (any pins except supplies) | IIN | $\pm 10$ | mA |
| Storage temperature | Tstg | -55 to 130 | ${ }^{\circ} \mathrm{C}$ |

Note
(1) Stress beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only. Functional operation of the device at these or any other conditions beyond those indicated under "Recommended Operating Conditions" is not implied. Exposure to absolute-maximum-rating conditions for extended periods may affect device reliability. Electrical parameters are guaranteed only over the recommended operating temperature range.

A

## ESD Sensitive Device

This device is manufactured on a CMOS process, therefore, generically susceptible to damage by excessive static voltage. Failure to observe proper handling and installation procedures can cause damage. AKM recommends that this device is handled with appropriate precautions.

## Recommended Operation Conditions

| Parameter | Symbol | Conditions | Min | Typ | Max | Unit |
| :--- | :---: | :--- | :---: | :---: | :---: | :---: |
| Operating temperature | Ta |  | -20 |  | 85 | ${ }^{\circ} \mathrm{C}$ |
| Supply voltage ${ }^{(1)}$ | VDD | Pin: VDD1-6 | 3.0 | 3.3 | 3.6 | V |

Note:
(1) Power to VDD1-6 requires to be supplied from a single source. A decoupling capacitor for power supply line should be installed close to each VDD pin.

AK8135F

## DC Characteristics

VDD: over 3.0 to 3.6 V , Ta: -20 to $+85^{\circ} \mathrm{C}, 27 \mathrm{MHz}$ Crystal, unless otherwise noted

(1) Output Clock Accuracy depends on crystal characteristics, on-chip load capacitance, and stray capacity of PCB. MIN., Max. $= \pm 30 \mathrm{ppm}$ is applied to AKM's authorized test condition.
Please contact us when you plan the use of other crystal unit.
(2) $\pm 3 \sigma$ in 10000 sampling or more
(3) Time to settle output into $0.1 \%$ of specified frequency.

AK8135F

## Function Description

## Voltage Controlled Frequency Synthesizer (VCFS)

AK8135F has a voltage controlled frequency synthesizer (VCFS), featuring fine frequency tuning for 27 MHz of primary clock frequency by external DC voltage control. This tuning enables output clock frequency to synchronize the external clock system.
VCFS is composed of analog-to-digital converter and high resolution PLL as shown in Figure 3. VIN1 (Pin28) and VIN2 (Pin27) accept DC voltage control from a processor or a system controller, and pulls the primary frequency of crystal to higher or lower. This pulling range is determined by supply Voltage to AK8135F. AK8135F is designed to range $\pm 85 \mathrm{ppm}$ of primary frequency, and the typical pulling profile is shown in Figure 4.

Figure 3: VCFS Diagram

Figure 4: Typical VCFS Pulling Profile

## AK8135F

## Typical Connection Diagram

Figure 5: Typical Connection Diagram
C1, C2, C3, C4, C5, C6: 0.1 $\mu \mathrm{F}$
C7 : Electrolytic capacitor
Cext1, Cext2: Depends on crystal characteristics. Refer the specification of the crystal.
SW1, SW2: It is a switch that controls outputs of REF1, REF3 and REF4 and power up/down of VCFS2.
$R_{\text {LPF }} 1, R_{\text {LPF }} 2, C_{\text {LPF }} 1, C_{\text {LPF }} 2, C_{\text {LPF }} 3, C_{\text {LPF }} 4$ : In case of interface by PWM. For right configuration, refer the specification of the applied processor.

AK8135F

## PCB Layout Consideration

AK8135F is a high-accuracy and low-jitter multi clock generator. For proper performances specified in this datasheet, careful PCB layout should be taken. The followings are layout guidelines based on the typical connection diagram shown in Figure 5

Power supply line - AK8135F has six power supply pins (VDD1-6) which deliver power to internal circuitry segments. A $0.1 \mu \mathrm{~F}$ decoupling capacitor should be placed as close to each VDD pin as possible.

Ground pin connection - AK8135F has seven ground pins (GND1-7). These pin require connecting to plane ground which will eliminate any common impedance with other critical switching signal return. $0.1 \mu \mathrm{~F}$ decoupling capacitors placed at VDD1, VDD2, VDD3, VDD4, VDD5, VDD6, and VDD7 should be grounded at close to the GND1pin, the GND2 pin, the GND3 pin, the GND4 pin, the GND5 pin, the GND6 pin, and the GND7 respectively.

Crystal connection - Proper oscillation performance is susceptible to stray or parasitic capacitors around crystal. The wiring traces to a crystal form XI (Pin 3) and XO (Pin 1) have equal lengths with no via and as short in length as possible. These traces should be also located away from any traces with switching signal.

## Package Information

- Marking
a: \#1 Pin Index
b: Part number
c: Date code (5 digits)

AK8135F

- RoHS Compliance

All integrated circuits form Asahi Kasei Microdevices Corporation (AKM) assembled in "lead-free" packages* are fully compliant with RoHS.
(*) RoHS compliant products from AKM are identified with "Pb free" letter indication on product label posted on the anti-shield bag and boxes.

## IMPORTANT NOTICE

- These products and their specifications are subject to change without notice.

When you consider any use or application of these products, please make inquiries the sales office of Asahi Kasei Microdevices Corporation (AKM) or authorized distributors as to current status of the products.

- Descriptions of external circuits, application circuits, software and other related information contained in this document are provided only to illustrate the operation and application examples of the semiconductor products. You are fully responsible for the incorporation of these external circuits, application circuits, software and other related information in the design of your equipments. AKM assumes no responsibility for any losses incurred by you or third parties arising from the use of these information herein. AKM assumes no liability for infringement of any patent, intellectual property, or other rights in the application or use of such information contained herein.
- Any export of these products, or devices or systems containing them, may require an export license or other official approval under the law and regulations of the country of export pertaining to customs and tariffs, currency exchange, or strategic materials.
- AKM products are neither intended nor authorized for use as critical components Note1) in any safety, life support, or other hazard related device or system ${ }_{\text {Note2) }}$, and AKM assumes no responsibility for such use, except for the use approved with the express written consent by Representative Director of AKM. As used here:

Note1) A critical component is one whose failure to function or perform may reasonably be expected to result, whether directly or indirectly, in the loss of the safety or effectiveness of the device or system containing it, and which must therefore meet very high standards of performance and reliability.
Note2) A hazard related device or system is one designed or intended for life support or maintenance of safety or for applications in medicine, aerospace, nuclear energy, or other fields, in which its failure to function or perform may reasonably be expected to result in loss of life or in significant injury or damage to person or property.

- It is the responsibility of the buyer or distributor of AKM products, who distributes, disposes of, or otherwise places the product with a third party, to notify such third party in advance of the above content and conditions, and the buyer or distributor agrees to assume any and all responsibility and liability for and hold AKM harmless from any and all claims arising from the use of said product in the absence of such notification.
