# imall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

# Panasonic

# Automation Controls Catalog

**RoHS compliant** 

Protective construction: Flux-resistant type

# FEATURES

### 1. High capacity

High capacity control possible at 22A/ 33A (High capacity type) 250V AC rating in compact size (L:  $15.7 \times W$ :  $30.1 \times H$ : 23.3 mm L: .618  $\times W$ : 1.185  $\times H$ : .917 inch)

## Load for solar inverter, Compact size, 1 Form A 22A/33A power relays

2. Contact gap: 1.5 mm .059 inch and 1.8 mm\*\*\* .071 inch

Compliant with European photovoltaic standard (IEC62109\* and VDE0126\*\*).

\* Safety standard of PV power inverter \*\*German safety standard of PV power inverter \*\*\*Due to addition of altitude stipulation (2,000 m 6,561.68 ft or more) to IEC62109.

EN61810-1 certified: 2.5 kV surge breakdown voltage (between contacts)

### 3. Long insulation distance

Creepage distance between contact and coil terminal: Min. 9.5 mm .354 inch Clearance distance between contact and coil terminal: Min. 6.5 mm .256 inch Surge breakdown voltage: 6 kV

### 4. Coil holding voltage contributes to saving energy of equipment

The coil holding voltage can be reduced up to 35%V of the nominal coil voltage (Ambient temperature: 20°C 68°F). Power consumption at the lowest coil holding voltage: 170 mW equivalent

# LF-G RELAYS (ALFG)

\*Coil holding voltage is the coil voltage after 100 ms from the applied nominal coil voltage.

\*When the ambient temperature during use is 85°C 185°F, make the coil holding voltage between 45% and 80%V of the nominal coil voltage.

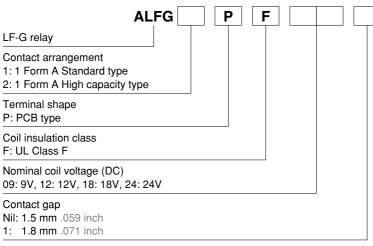

# 5. Conforms to various safety standards

UL/C-UL and VDE approved

# **TYPICAL APPLICATIONS**

- 1. Photovoltaic power generation
- systems (Solar inverter)
- 2. Uninterruptible Power Supplies (UPS)
- 3. Home appliances
- 4. Office equipment

# **ORDERING INFORMATION**

Note: Certified by UL/C-UL and VDE

Humidity: 5 to 85% R.H. (Not freezing and condensing at low temperature) Air pressure: 86 to 106 kPa						
Unit weight			Approx. 23 g .81 oz						
-			•						

Unit weight

Notes: \*1. This value can change due to the switching frequency, environmental conditions, and desired reliability level, therefore it is recommended to check this with the

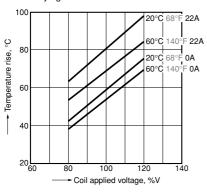

actual ιoau.
\*2. Wave is standard shock voltage of ±1.2×50μs according to JEC-212-1981
\*3. Coil holding voltage is the coil voltage after 100 ms from the applied nominal coil voltage.
\*4. The upper limit of the ambient temperature is the maximum temperature that can satisfy the coil temperature rise value. Refer to Usage, transport and storage conditions in NOTES.
