

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## Surface - Mount Ambient Light Sensor

## ALS-PDIC15-21B/TR8

### Features

- Monolithic IC containing photodiode and current amplifier
- Human-eye spectral response and excellent IR-cut (from 700 to 1050 nm)
- Wide dynamic range: 1 lux to 30,000 lux
- Excellent output to illuminance linearity
- Size: 3.2mm (L)\*1.5mm (W)\*1.1mm (H)
- Very low (< 3%) photocurrent fluctuation versus temperature change (0 to 60 °C)
- Wide supply voltage range: 1.5V to 5.5V
- Standby current: < 1 uA
- Light to Current, analog output
- Operating temperature performance, -30°C to 85°C
- RoHS compliant and Pb Free package

### Description

The ALS-PDIC15-21B/TR8 is a compact surface mount photo-sensor IC for detecting ambient light illuminating intensity. The sensitivity is superior to that of a phototransistor, and exhibits little chip-to-chip variation. It has excellent spectral sensitivity to the illuminating light source and excellent output linearity. Due to very low photo current fluctuation versus temperature change, ALS-PDIC15-21B/TR8 is very suitable for hand-held or outdoor application device.

### Applications

- Detection of ambient light to control display backlighting
  - Mobile devices – Mobile phones, PDAs, GPS
  - Computing device – TFT LCD monitor for Notebook computer
  - Consumer device – TFT LCD TV, Plasma TV
- Automatic residential and commercial management
- Automatic contrast enhancement for electronic signboard
- Ambient light monitoring device for daylight and artificial light
  - Street light

Note:

1. White Fluorescent light (Color Temperature = 6500K) is used as light source. However, White LED is substituted in mass production.
2. Illuminance by CIE standard illuminant-A / 2856K, incandescent lamp.

### Converting Photocurrent to Voltage

**Note:**

1. The output voltage ( $V_{out}$ ) is the product of photocurrent ( $I_{PH}$ ) and loading resistor ( $R_L$ )
2. A right loading resistor shall be chosen to meet the requirement of maximum ambient light, and output saturation voltage:

$$V_{out(max.)} = I_{out(max.)} \times R_L \leq V_{out(saturation)} = V_{cc} - 0.8V$$

3. To avoid 60Hz ripple from fluorescent lamps, we suggest that the time constant must be greater than 0.5 second:

$$R_L \times C_L \geq 0.5 \quad (\text{empirical data})$$

**Recommended method of storage**

Reflow Terms: JEDEC Level 4 Specification

Dry box storage is recommended as soon as the aluminum bag has been opened prevent moisture absorption. The following conditions should be observed, if dry boxes are not available:

- Storage temperature 10°C to 30°C
- Storage humidity  $\leq 60\%RH$  max

After more than 72 hours under these conditions moisture content will be too high for Reflow soldering. In case of moisture absorption, the devices will recover to former condition by drying under the following condition:

- 192 hours at 40°C+5°C/-0°C and 5%RH (dry air / nitrogen), or
- 96 hours at 60°C+5°C and < 5%RH for all device containers, or
- 24 hours at 125°C+5°C not suitable for reel or tubes

**ESD Precaution:**

Proper storage and handing procedures should be followed to prevent ESD damage to the devices especially when they are removed from the Anti-static bag. Electro-Static Sensitive Devices warning labels are on the packing.

**Recommended Solder Profile**

Notice:

- (1) Reflow soldering should not be done more than two times.
- (2) When soldering, do not put stress on the devices during heating.
- (3) After soldering, do not warp the circuit board.
