## Rocker Switch Operators

### COLOR DISPLAY OPTIONS

Rocker operators are assembled to the switches by simply snapping them into recesses in the switch operator sockets.

**Transmitted color** — Color is displayed whether lamp is On or Off. Choice of 1-piece rockers (types 10 or 20) or rockers with clear cap and colored translucent insert (types 11 or 12).

**Dead front hidden color/hidden legend** — Rocker appears black with lamp Off. Legend and color appear when illuminated (types 30 or 40).

**Projected color** — Translucent white rocker with transparent colored insert (types 50 or 60). White rocker appears colored when illuminated.

### HOW TO ORDER ROCKER LEGENDS

When specifying legended rockers, submit a legend order sheet to cover each catalog listing. These forms identify the maximum number of lines per area and the maximum characters per line, based on the type size you request. To insure proper legend orientation, rocker switch housings (when viewed from the panel front) should have the "MICRO SWITCH" identification facing UP or to the LEFT.

Rocker legend order sheets are shown on the following pages. Reproduce them on your office copier.

<b>Legend Sheet</b>	<b>Form No.</b>
AML54 Rockers	FO-63566
AML56 Rockers	FO-63564

Example: **AML56-T10RB**  
 Two-piece rocker; with LED window in one side, transmitted color, no legend; red (LED side) and blue (non-LED side).

- \* Notes:
- <sup>1</sup> Only one color code letter is necessary for AML56-E 1/2-rockers. AML56-E, -T, and -H rockers have an open window which allows LEDs to be flush with the rocker surface.
  - <sup>2</sup> To order a 1/2-rocker without the LED "window," specify an AML54-E listing from the previous page.
