imall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

ARM-JTAG-COOCOX

ARM debugger with JTAG and SWD interfaces, based on CoLinkEX

ARM-JTAG-COOCOX is an ARM debugger based on CoLinkEX design. It is meant to work out-of-thebox with the free CooCox IDE. It can also be used with Keil MDK and IAR EW IDEs (driver for IAR still not perfect) via external plugins. Its affordable price and the ability to debug via both SWD (Serial Wire Debug) and JTAG interfaces are the key points.

FEATURES

- Open hardware you have access to board design and board schematic
- Supports Cortex-M0, Cortex-M3 and Cortex-M4 devices
- Supports SWD interface
- Supports JTAG interface
- Can be used with the free CoFlash and CoIDE, or the commercial Keil MDK and IAR EW (driver for IAR still not perfect)
