

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

1 Introduction

The AS5247-MF_EK_SB socket board is used for quick programming of AS5247 magnetic rotary position sensors without soldering due to its ZIF socket.

This board can be used in combination with the USB I&P Box or the SD4Y production programmer.

1.1 Kit Content

Figure 1: Kit content

Pos.	Item	Comment

2 Board description

The PCB offers 2 connecting options: The 5-pin dual-row connector on the left side for connecting to the USB I&P Box and the 10-pin dual-row connector on the right side for connecting to the SD4Y Production Programmer.

A ZIF Open-Top-Socket for MLF packages is mounted in the middle. Pin 1 of the IC is indicated by a small dot on the right bottom corner of the socket or by the label on the PCB.

All passive components needed for proper operation are included on the PCB. Only a power supply mode of 5V is possible.
