

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Super 0.5W Cool White Power PLCC-4
Surface Mount LED Indicator

AVAGO

Data Sheet

Description

The Super 0.5W Cool White Power PLCC-4 SMT LED is Cool white mid-Power PLCC-4 SMT LEDs using InGaN chip technology. The package can be driven at high current due to its superior package design. The product is able to dissipate the heat more efficiently compared to the Power PLCC-4 SMT LEDs. These LEDs produce higher light output with better flux performance compared to the Power PLCC-4 SMT LED.

The Super 0.5W Cool White Power PLCC-4 SMT LEDs are designed for higher reliability, better performance, and operate under a wide range of environmental conditions. The performance characteristics of these new mid-power LEDs make them uniquely suitable for use in harsh conditions such as in automotive applications, and in electronics signs and signals.

To facilitate easy pick and place assembly, the LEDs are packed in EIA-compliant tape and reel. Every reel is shipped in single intensity and color bin, to provide close uniformity.

Features

- Industry Standard PLCC 4 platform (3.2x2.8x1.9mm)
- High reliability package with enhanced silicone resin encapsulation
- High brightness with optimum flux performance using InGaN chip technologies
- Available in Cool White
- Available in 8mm carrier tape & 7 inch reel
- Low Thermal Resistance 40°C/W
- Wide viewing angle at 120 degree
- JEDEC MSL 2

Applications

- 1. Interior automotive
 - a. Instrument panel backlighting
 - b. Central console backlighting
 - c. Navigation and audio system backlighting
 - d. Dome/Map lighting
 - e. Push button backlighting
 - f. Puddle lamp
 - g. Glove compartment illumination
- 2. Exterior automotive
 - a. Number plate illumination
- 3. Electronic signs and signals
 - a. Decorative lighting
- 4. Office automation, home appliances, industrial equipment
 - a. Panel/button backlighting
 - b. Display backlighting

Package Drawing

Notes:

- 1. All Dimensions in millimeters.
- 2. Lead Polarity as shown in Figure 14.
- 3. Terminal Finish: Ag plating
- 4. Encapsulation material: Silicone resin

Figure 1. Package Drawing

Table 1. Device Selection Guide $(T_J = 25^{\circ}C)$

		Luminous Flu	Luminous Flux, $\Phi_{V}^{[1]}$ (lm)				
Color	Part Number	Min. Flux (Im)	Typ. Flux (lm)	Max. Flux (Im)	Test Current (mA)	Dice Technology	
Cool White	ASMT-QWBC-NHJ0E	25.5	30.0	43.0	150	InGaN	
	ASMT-QWBC-NJK0E	33.0	38.0	56.0	150	InGaN	
	ASMT-QWBC-NJKQE	33.0	38.0	56.0	150	InGaN	

Notes:

- 1. Φ_V is the total luminous flux output as measured with an integrating sphere at mono pulse conditions.
- 2. Tolerance = $\pm 12\%$

Part Numbering System

Table 2. Absolute Maximum Ratings ($T_A = 25$ °C)

Parameters	ASMT-QWBC-Nxxxx	
DC Forward Current [1]	150 mA	
Peak Forward Current [2]	300 mA	
Power Dissipation	570 mW	
Reverse Voltage, V _R @ 10 μA	4	
Junction Temperature	125°C	
Operating Temperature	-40°C to +120°C	
Storage Temperature	-40°C to +120°C	

Notes:

- 1. Derate Linearly as shown in Figure 6.
- 2. Duty Factor = 10%, Frequency = 1kHz

Table 3. Optical Characteristics $(T_J = 25^{\circ}C)$

		Dice	Typical (Coordina	Chromaticity ates	Viewing Angle $2\theta_{1/2}^{[1]}$ (Degrees)	Luminous Efficiency η_{e} (lm/W)	Total Flux / Luminous Intensity Φ_{V} (lm) / I_{V} (cd)

Handling Precaution

The encapsulation material of the product is made of silicone for better reliability of the product. As silicone is a soft material, please do not press on the silicone or poke a sharp object onto the silicone. These might damage the product and cause premature failure. During assembly or handling, the unit should be held on the body only. Please refer to Avago Application Note AN 5288 for detail information.

Moisture Sensitivity

This product is qualified as Moisture Sensitive Level 2a per Jedec J-STD-020. Precautions when handling this moisture sensitive product is important to ensure the reliability of the product. Do refer to Avago Application Note AN5305 Handling of Moisture Sensitive Surface Mount Devices for details.

A. Storage before use

- Unopen moisture barrier bag (MBB) can be stored at <40°C/90%RH for 12 months. If the actual shelf life has exceeded 12 months and the HIC indicates that baking is not required, then it is safe to reflow the LEDs per the original MSL rating.
- It is not recommended to open the MBB prior to assembly (e.g. for IQC).

B. Control after opening the MBB

- The humidity indicator card (HIC) shall be read immediately upon opening of MBB.
- The LEDs must be kept at <30°C / 60%RH at all time and all high temperature related process including soldering, curing or rework need to be completed within 672 hours.

C. Control for unfinished reel

- For any unuse LEDs, they need to be stored in sealed MBB with desiccant or desiccator at <5%RH.

D. Control of assembled boards

 If the PCB soldered with the LEDs is to be subjected to other high temperature processes, the PCB need to be stored in sealed MBB with desiccant or desiccator at <5%RH to ensure no LEDs have exceeded their floor life of 672 hours.

E. Baking is required if:

- The HIC indicator is not GREEN at 10% and is AZURE at 5%
- The LEDs are exposed to condition of >30°C / 60% RH at any time.
- The LEDs floor life exceeded 672 hours.

Recommended baking condition: 60±5°C for 20hrs

F. Use of LED

 Do not use materials that contain corrosive substance such as sulfur with the LED during assembly process and application. Silicone is permeable for gases, corrosive gases will permeate into the LED and corrode the leadframe plating result in open contact.
