

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

### ASSR-401C and ASSR-402C

Low C x R, Form A, Solid State Relay (Photo MOSFET)  $(400V/100\Omega/15pF)$ 

## **Data Sheet**

#### **Description**

The ASSR-40xC Series is specifically designed for fast switching applications, commonly found in the test and measurement systems. The low C x R and low output off-state leakage current provide higher system throughput and reduce system errors.

The dual channel configuration of ASSR-402C is equivalent to 2 Form A Electromechanical Relays (EMR). One channel of the relay consists of an AlGaAs infrared light-emitting diode (LED) input stage optically coupled to a high-voltage output detector circuit. The detector consists of a high-speed photovoltaic diode array and driver circuitry to switch on/off two discrete high voltage MOSFETs. The relay turns on (contact closes) with a minimum input current of 1mA through the input LED. The relay turns off (contact opens) with an input voltage of 0.8V or less.

ASSR-401C is available in 4-pin SO package and ASSR-402C is available in 8-pin DIP and Gull Wing Surface Mount packages. Their electrical and switching characteristics are specified over the temperature range of -40°C to +85°C.

#### **Functional Diagram**

1 Form A in 4-Pin SO Package

#### **Features**

- Compact Solid-State Bi-directional Signal Switch
- Single and Dual Channel Normally-off Single-Pole-Single-Throw (SPST) Relay
- 400V Output Withstand Voltage
- 0.04A Current Rating
- Low Input Current: I<sub>F</sub> = 1mA
- Low C x R: 650pF•Ω typical
- Low Output Off-state Leakage Current: 0.3nA typical
- Fast Speed Switching: 0.08ms (Ton), 0.05ms (Toff) typical
- High Transient Immunity: >1kV/μs
- High Input-to-Output Insulation Voltage (Safety and Regulatory Approvals Pending)
  - 3750 Vrms for 1 min per UL1577
  - CSA Component Acceptance

#### **Applications**

- Automatic Test Equipment
- Data Acquisition System
- Datalogger and Recorder
- Multiplexer
- Measuring Instrument
- EMR / Reed Relay Replacement

**CAUTION:** It is advised that normal static precautions be taken in handling and assembly of this component to prevent damage and/or degradation which may be induced by ESD.

#### **Ordering Information**

ASSR-xxxx is UL Recognized with 3750 Vrms for 1 minute per UL1577 and is approved under CSA Component Acceptance Notice #5.

|             | Option         |                  | Surface | Gull | Tape   |                     |
|-------------|----------------|------------------|---------|------|--------|---------------------|
| Part number | RoHS Compliant | Package          | Mount   | Wing | & Reel | Quantity            |
| ASSR-401C   | -003E          | SO 4             | Х       |      |        | 100 units per tube  |
|             | -503E          | SO-4             | X       |      | Х      | 1500 units per reel |
| ASSR-402C   | -002E          |                  |         |      |        | 50 units per tube   |
|             | -302E          | 300 mil<br>DIP-8 | X       | Х    |        | 50 units per tube   |

To order, choose a part number from the part number column and combine with the desired option from the option column to form an order entry.

#### Example 1:

ASSR-401C-503E to order product of Surface Mount SO-4 package in Tape and Reel packaging and RoHS Compliant.

#### Example 2:

ASSR-402C-002E to order product of 300mil DIP-8 package in tube packaging and RoHS Compliant.

Option datasheets are available. Contact your Avago sales representative or authorized distributor for information.

#### ASSR-402C

### **Package Outline Drawings**

### ASSR-401C 4-Pin Small Outline Package

DIMENSIONS IN MILLIMETERS AND [INCHES]
OPTION NUMBER 500 AND UL RECOGNITION NOT MARKED

#### ASSR-402C 8-Pin DIP Package

#### ASSR-402C 8-Pin DIP Package with Gull Wing Surface Mount Option 300

DIMENSIONS IN MILLIMETERS (INCHES). LEAD COPLANARITY = 0.10 mm (0.004 INCHES).

NOTE: FLOATING LEAD PROTRUSION IS 0.25 mm (10 mils) MAX.

#### **Lead Free IR Profile**

THE TIME FROM 25°C to PEAK TEMPERATURE = 8 MINUTES MAX.  $T_{smax} = 200$ °C,  $T_{smin} = 150$ °C

Use of non-chlorine-activated fluxes is highly recommended.

### **Regulatory Information**

The ASSR-401C and ASSR-402C are approved by the following organizations:

#### UL

Approved under UL 1577, component recognition program up to  $V_{ISO} = 3750 V_{RMS}$ 

#### CSA

Approved under CSA Component Acceptance Notice #5.

### **Insulation and Safety Related Specifications**

#### Notes:

- 1. For qualified device performance over temperature range, it is recommended to operate at  $I_F = 5$ mA.
- 2. Device is considered as a two terminal device: pins 1, 2, 3 and 4 shorted together and pins 5, 6, 7 and 8 shorted together.
- 3. The Input-Output Momentary Withstand Voltage is a dielectric voltage rating that should not be interpreted as an input-output continuous voltage rating. For the continuous voltage rating refer to the IEC/EN/DIN EN 60747-5-2 Insulation Characteristics Table (if applicable), your equipment level safety specification, or Avago Technologies Application Note 1074, "Optocoupler Input-Output Endurance Voltage."
- $4. \ \ \, \text{The PCB design and environmental conditions are taken into consideration when measuring the } I_{O(OFF)} \, \text{performance}.$
- 5. During the pulsed  $R_{(ON)}$  measurement ( $I_O$  duration  $\leq$ 30ms), ambient ( $T_A$ ) and case temperature ( $T_C$ ) are equal.
