

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

ATF15xx-DK3 CPLD DEVELOPMENT KIT

LOGIC DOUBLING®

The ATF15xx-DK3 is a third-generation low-cost development/programmer kit for the designer who wishes to begin working with Atmel's ATF15xx family of industry-standard pin-compatible Complex Programmable Logic Devices (CPLDs) with Logic Doubling. Like the ATF15xx-DK2, the ATF15xx-DK3 allows designers to design, synthesize, simulate, program and evaluate their designs using either the free Atmel WinCUPL software or an evaluation version of Atmel's ProChip Designer® as well as the included 44-lead TQFP package adapter.

The leading-edge synthesis and simulation software from Mentor Graphics® and Altium® are included in the ProChip Designer tool. The kit can be extended to be used to program all the different packages of the ATF15xx family by simply adding the package adapter options.

Once the design is completed, the designer can install a sample ATF15xx family device in the provided PCB and program it using the built-in In-System Programmable (ISP) industry-standard 4-pin JTAG interface, the ATMISP software, and the provided PC parallel port cable. The included tutorial takes the designer through the complete CPLD development process. All the software runs on Windows® platforms. LEDs, switches, and expansion headers for all pins are provided to allow comprehensive prototyping and evaluation. The ATF15xx-DK3, includes everything a designer needs to get started with the Atmel Logic Doubling CPLDs.

CPLD Demo/Programmer Board

- ◆ 44-lead TQFP Adapter
- ◆ ISP (JTAG) Port
- ◆ Expansion Headers
- ◆ 2 MHz Crystal Oscillator
- ◆ Four 7-segment LED Displays
- ◆ Eight Individual LEDs
- ◆ V_{CC} Operation: 1.8V, 3.3V and 5.0V
- ◆ Easy Access to CPLD I/O Pins
- ◆ Global Clear, Output Enable, I/O and Power Switches

CPLD Programming Cable

- ◆ 5V, 3.3V and 1.8V ISP Cable for PC Parallel Port

Logic Doubling CPLDs

- ◆ ATF1502BE-7AU44, 1.8V, 32 Macrocell CPLD with ISP
- ◆ ATF1504ASV-15AU44, 3.3V, 64 Macrocell CPLD with ISP
