NetCommander USB Server Interface Unit (SIU) - Single

MODEL NUMBER: **B078-101-USB-1**

Description

The Tripp Lite NetCommander USB Server Interface Unit (SIU) connects to the HD15 port and USB port on a computer/server, and converts them to a single RJ45 connector. Ordinary Cat5e patch cables can then be used to connect the server to the switch ports on a Tripp Lite B070 / B072-Series NetCommander Cat5 KVM switch. Use of Cat5e cables frees up space in the installation that would ordinarily be filled by traditional, thicker KVM cables. Compliant with the Federal Trade Agreements Act (TAA) for GSA Schedule purchases.

Features

- Needed to connect a USB Server to a B070 / B072-Series NetCommander KVM switch via Cat5e cable

- No power supply required
- Allows a Server/CPU to be located up to 100ft away from the KVM switch
