2-Port DisplayPort to VGA Splitter, TAA

MODEL NUMBER: **B157-002-VGA**

Converts and splits a DisplayPort video signal for display on two VGA monitors, projectors or televisions at the same time. Ideal for offices, conference rooms, retail settings, trade shows and classrooms.

Description

The B157-002-VGA 2-Port DisplayPort to VGA Splitter converts and splits a DisplayPort video signal for display on two VGA-enabled monitors, projectors or televisions at the same time. Ideal for offices, conference rooms, retail settings, trade shows and classrooms, this compact splitter features a built-in DisplayPort cable that connects to the source. It lets you use your existing VGA displays instead of buying new DisplayPort monitors or docking stations.

The B157-002-VGA supports video resolutions up to 1920 x 1080 (1080p) at 60 Hz, as well as HDCP, EDID and DDC. Orange LEDs next to each output port indicate whether the splitter is powered on and transmitting a signal to the connected displays. The splitter works with all operating systems and is small enough to carry in your backpack or computer bag. Plug-and-play convenience means no software or drivers are needed. An included USB Micro-B cable connects between the source and the splitter to provide power, so no external power supply is required.

Features

Converts and Splits DisplayPort Signal to 2 VGA Displays Simultaneously

- Ideal for offices, conference rooms, trade shows and classrooms
- Built-in DisplayPort cable connects to source
