

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

# Solid State Relays Accessories, Thermal Interface

# Thermal pads

#### **Ordering Key**

#### KK071CUT

- Graphite thermal pad for RA, RD, RM, RAM and RS series with adhesive on one side
- Width x Height x Thickness = 35 x 43 x 0.25 mm
- Packing qty. 50 pcs.

# **Ordering Key**

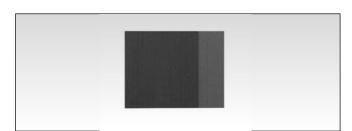

#### **RZHT**

- Graphite thermal pad for RZ3 series with adhesive on one side
- Width x Height x Thickness = 70 x 77 x 0.25 mm
- Packing qty. 10 pcs.

# **Ordering Key**

#### **RGHT**

- Graphite thermal pad for RG series with adhesive on one side
- Width x Height x Thickness = 14 x 35 x 0.13 mm
- Packing qty. 10 pcs.

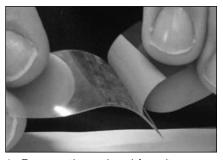

#### **Ordering Key**

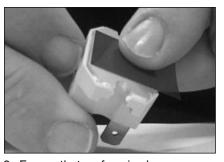

#### **RFHT**

- Phase change thermal pad for RF1
- Width x Height x Thickness = 19 x 21 x 0.13 mm
- Packing qty. 10 pcs.

#### **Mounting of RFHT on SSR**

1. Remove thermal pad from its protective layer

2. Ensure that surface is clean. Mount on the back of the SSR.

3. Leave for 30 minutes and peel off liner

# Thermal paste

# **Ordering Key**

#### HTS02S

- Silicone based thermal paste syringe
- Volume = 2ml
- Packing qty. 1 pc.

Please refer to SSR datasheet and / or heatsink datasheet, as applicable, for reference to the type of screw suitable for mounting a specific SSR model on a specific heatsink

# Solid State Relays Accessories, DIN Adaptors

#### **DIN Adaptors for PCB SSRs**

DIN rail adaptor module for mounting RP series SSRs on DIN rail. The RPM1 is intended for max. operational voltage of 250V, whilst the RPM2 can be used up to 600V.

The RP SSR is not included. Suffix 'M1' or 'M2' is added to the SSR part no. for a factory mounted solution.

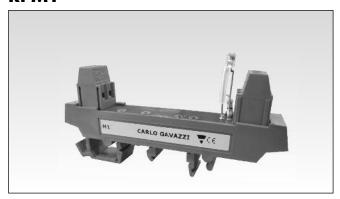

Note that when the RP..10 is mounted on DIN rail (vertical mounting), a derating factor has to be applied.

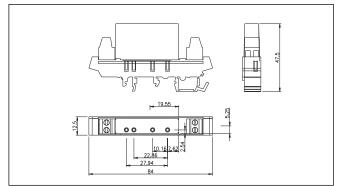

Ordering Key	RPM 1 -

Packing qty. 5 pcs.

# Solid State Relays Accessories, Varistors Type RV

 Transient protection devices for Solid State Relays

#### **Product Description**

A metal oxide varistor (MOV) is a voltage dependent resistor with a symmetrical V/I characteristics curve whose resistance decreases with increasing voltage.

Varistors are ideally suited for protecting sensitive electronic circuits and components (power semiconductors) against voltage transients caused either by the mains or by other application parts. Connected in parallel with the electronic device that is to be guarded, they form a low resistance shunt when voltage increases and thus prevent any further V/I in the over voltage

# Solid State Relays Accessories, Temperature Limit Switches Type UP 62 - ..

Temperature limit switch for overheat protection of small assemblies.

#### **Product Description**

The temperature limit switch is a readily available accessory. It is a thermostat especially designed for overheat protection for small assemblies.

The thermal response is excellent due to its miniaturized housing. It becomes an effective thermal cutout due to the fact that this limit switch can be fitted close to the heatsink of the relay.

When connected serial with the control voltage, the TLS will switch off the relay as soon as the operating temperature of the switch is reached. The relay will be activated again when the temperature drops (approx. 30°C) below its cutout value.

In the RZ3 relay, the TLS can be connected to two free (internally non-connected) terminals (B1/B2).

Thermal compound must be added when inserting the TLS (to guarantee a fast thermal response).

The heatsink selection charts (load current versus ambient temperature) for RSO types provide information about which thermal switch to use.
