

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

We hereby disclaim any and all warranties, including but not limited to warranties of non-infringement, regarding circuits, descriptions and charts stated herein.

**Information**

For further information on technology, delivery terms and conditions and prices please contact your nearest Infineon Technologies Office ([www.infineon.com](http://www.infineon.com)).

**Warnings**

Due to technical requirements components may contain dangerous substances. For information on the types in question please contact your nearest Infineon Technologies Office.

Infineon Technologies Components may only be used in life-support devices or systems with the express written approval of Infineon Technologies, if a failure of such components can reasonably be expected to cause the failure of that life-support device or system, or to affect the safety or effectiveness of that device or system. Life support devices or systems are intended to be implanted in the human body, or to support and/or maintain and sustain and/or protect human life. If they fail, it is reasonable to assume that the health of the user or other persons may be endangered.

# 1 Silicon Germanium Wide Band Low Noise Amplifier with 2 kV ESD Protection

## Feature

- High gain  
 $|S_{21}|^2 = 15.0 \text{ dB at } 1.575 \text{ GHz}$   
 $|S_{21}|^2 = 14.2 \text{ dB at } 1.9 \text{ GHz}$   
 $|S_{21}|^2 = 13.6 \text{ dB at } 2.14 \text{ GHz}$
- Low noise figure,  $NF = 1.0 \text{ dB at } 1.575 \text{ GHz}$
- Operating frequency range 0.5 - 6 GHz
- Typical supply voltage: 2.75 V
- On/Off-Switch
- Output-match on chip, input pre-matched
- Low part count
- 70 GHz  $f_T$  - Silicon Germanium technology
- 2 kV HBM ESD protection (Pin-to-Pin)
- Pb-free (RoHS compliant) package

SOT343

## Applications

- LNA for GSM, GPS, DCS, PCS, UMTS, Bluetooth, ISM and WLAN

Figure 1 Pin connection

## Description

The BGA622 is a wide band low noise amplifier, based on Infineon Technologies' Silicon Germanium Technology B7HF. In order to provide the LNA in a small package the out-pin is simultaneously used for RF out and On/Off switch. This functionality can be accessed using a RF-Choke at the Out pin, where a DC level of 0 V or an open switches the device on and a DC level of  $V_{CC}$  switches the device off. While the device is switched off, it provides an insertion loss of 24 dB together with a high  $IIP_3$  up to 20 dBm.

| Type   | Package | Marking |
|--------|---------|---------|
| BGA622 | SOT343  | BXs     |

Note: **ESD:** Electrostatic discharge sensitive device, observe handling precaution

**Silicon Germanium Wide Band Low Noise Amplifier with 2 kV ESD Protection**
**Maximum Ratings**
**Table 1 Maximum ratings**

| Parameter   | Symbol    | Limit Value | Unit |
|---|-----------|-------------|------|
| Voltage at pin $V_{CC}$                             | $V_{CC}$  | 3.5         | V    |
| Voltage at pin Out                                  | $V_{out}$ | 4           | V    |
| Current into pin In                                 | $I_{in}$  | 0.1         | mA   |
| Current into pin Out                                | $I_{out}$ | 1           | mA   |
| Current into pin $V_{CC}$                           | $I_{VCC}$ | 10          | mA   |
| RF input power                                      | $P_{in}$  | 6           | dBm  |
| Total power dissipation, $T_S < 139\text{ °C}^{1)}$ | $P_{tot}$ | 35          | mW   |
| Junction temperature                                | $T_J$     | 150         | °C   |
| Ambient temperature range                           | $T_A$     | -65... 150  | °C   |
| Storage temperature range                           | $T_{STG}$ | -65... 150  | °C   |
| ESD capability all pins (HBM: JESD22-A114)          | $V_{ESD}$ | 2000        | V    |

1)  $T_S$  is measured on the ground lead at the soldering point

*Note: All Voltages refer to GND-Node*

**Thermal resistance**
**Table 2 Thermal resistance**

| Parameter                                | Symbol     | Value | Unit |
|--|------------|-------|------|
| Junction - soldering point <sup>1)</sup> | $R_{thJS}$ | 300   | K/W  |

1) For calculation of  $R_{thJA}$  please refer to Application Note Thermal Resistance

## 2 Electrical Characteristics

### 2.1 Electrical characteristics at $T_A = 25\text{ °C}$ (measured according to [Figure 2](#)) $V_{CC} = 2.75\text{ V}$ , Frequency = 1.575 GHz, unless otherwise specified

**Table 3 Electrical Characteristics**

| Parameter   | Symbol         | Values |       |      | Unit          | Note / Test Condition  |
|---|----------------|--------|-------|------|---------------|--|
|   |                | Min.   | Typ.  | Max. |               |  |
| Insertion power gain  | $ S_{21} ^2$   |        | 15.0  |      | dB            |  |
| Insertion power gain (Off-State)                              | $ S_{21} ^2$   |        | -27   |      | dB            |  |
| Input return loss (On-State)                                  | $RL_{in}$      |        | 5     |      | dB            |  |
| Output return loss (On-State)                                 | $RL_{out}$     |        | 12    |      | dB            |  |
| Noise figure ( $Z_S = 50\ \Omega$ )                           | $F_{50\Omega}$ |        | 1.00  |      | dB            | $f = 0.1\text{ GHz}$   |
| Input third order intercept point <sup>1)</sup> (On-State)    | $IIP_3$        |        | 0     |      | dBm           | $\Delta f = 1\text{ MHz}$ ,<br>$P_{IN} = -28\text{ dBm}$     |
| Input third order intercept point <sup>1)</sup> (Off - State) | $IIP_3$        |        | 20    |      | dBm           | $\Delta f = 1\text{ MHz}$ ,<br>$P_{IN} = -8\text{ dBm}$      |
| Input power at 1 dB gain compression                          | $P_{-1dB}$     |        | -16.5 |      | dBm           |  |
| Total device off current                                      | $I_{tot-off}$  | 130    | 260   | 420  | $\mu\text{A}$ | $V_{CC} = 2.75\text{ V}$ ,<br>$V_{out} = V_{CC}$             |
| Total device on current                                       | $I_{tot-on}$   | 4.0    | 5.8   | 7.8  | mA            | $V_{CC} = 2.75\text{ V}$                                     |
| On / Off switch control voltage                               | $V_{on}$       | 0      |       | 0.8  | V             | $V_{CC} = 2.75\text{ V}$<br>ON-Mode:<br>$V_{out} = V_{on}$   |
|   | $V_{off}$      | 2.0    |       | 3.5  | V             | $V_{CC} = 2.75\text{ V}$<br>OFF-Mode:<br>$V_{out} = V_{off}$ |

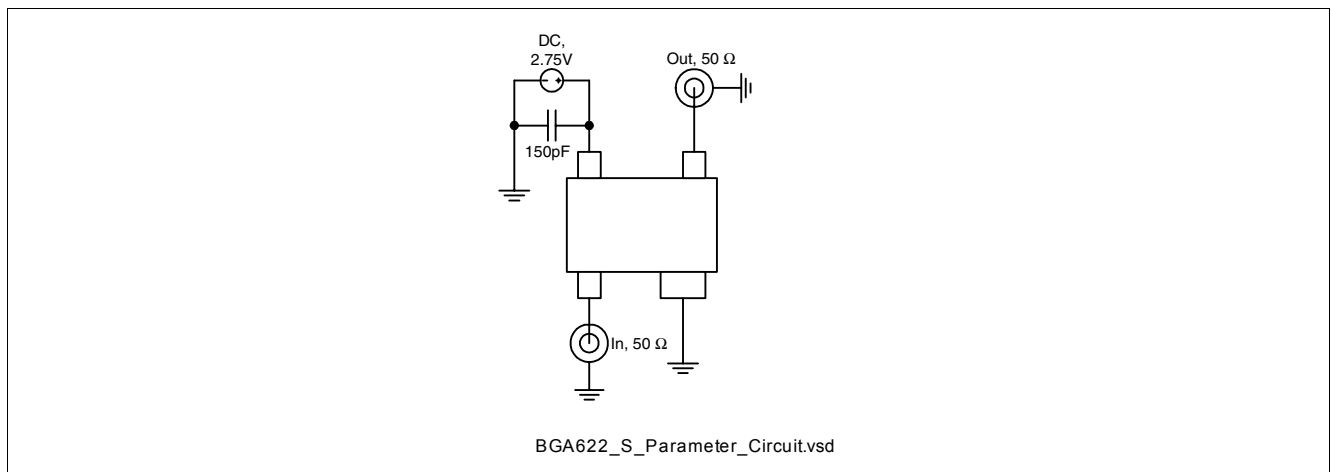

1)  $IP_3$  values depends on termination of all intermodulation frequency components. Termination used for this measurement is 50  $\Omega$  from 0.1 to 6 GHz

**2.2 Electrical characteristics at  $T_A = 25\text{ °C}$  (measured according to [Figure 2](#))  
 $V_{CC} = 2.75\text{ V}$ , Frequency = 2.14 GHz, unless otherwise specified**

**Table 4 Electrical Characteristics**

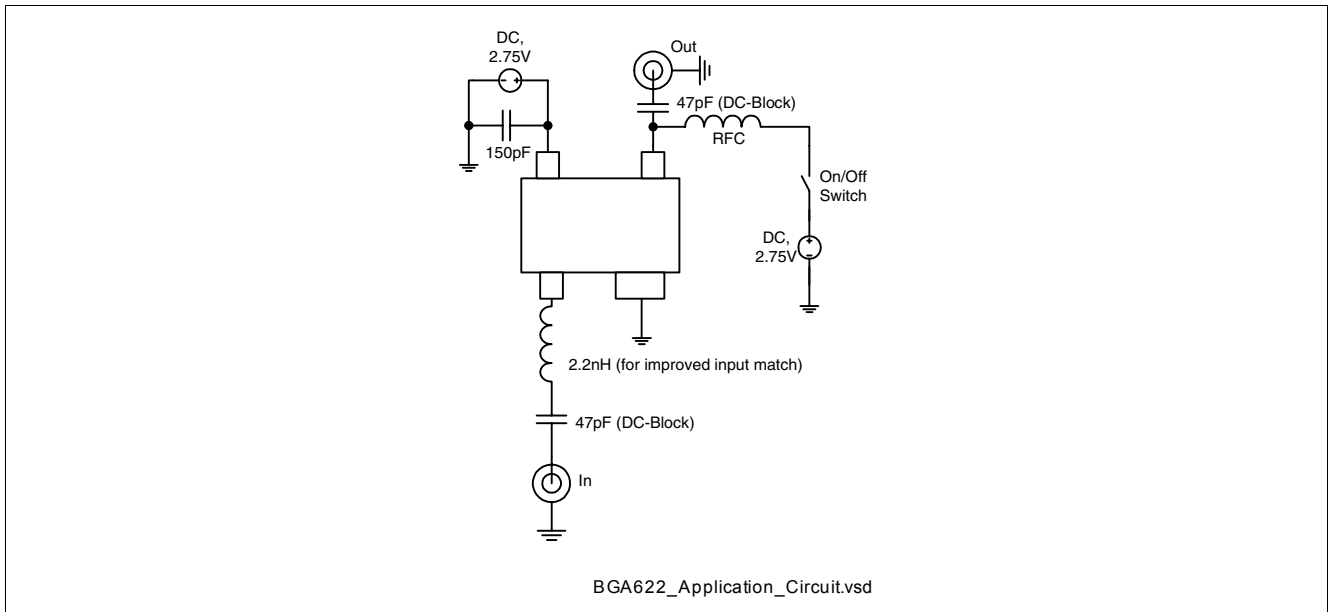

| Parameter   | Symbol         | Values |      |      | Unit | Note / Test Condition                                    |
|---|----------------|--------|------|------|------|--|
|   |                | Min.   | Typ. | Max. |      |  |
| Insertion power gain  | $ S_{21} ^2$   |        | 13.6 |      | dB   |  |
| Insertion power gain (Off-State)                            | $ S_{21} ^2$   |        | -24  |      | dB   |  |
| Input return loss (On-State)                                | $RL_{in}$      |        | 7    |      | dB   |  |
| Output return loss (On-State)                               | $RL_{out}$     |        | 10   |      | dB   |  |
| Noise figure ( $Z_S = 50\ \Omega$ )                         | $F_{50\Omega}$ |        | 1.05 |      | dB   |  |
| Input third order intercept Point <sup>1)</sup> (On-State)  | $IIP_3$        |        | 3    |      | dBm  | $\Delta f = 1\text{ MHz}$ ,<br>$P_{IN} = -28\text{ dBm}$ |
| Input third order intercept point <sup>1)</sup> (Off-State) | $IIP_3$        |        | 20   |      | dBm  | $\Delta f = 1\text{ MHz}$ ,<br>$P_{IN} = -8\text{ dBm}$  |
| Input power at 1 dB gain compression                        | $P_{-1dB}$     |        | -13  |      | dBm  |  |

1)  $IP_3$  values depends on termination of all intermodulation frequency components. Termination used for this measurement is  $50\ \Omega$  from 0.1 to 6 GHz
