# imall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

**Product data sheet** 

# 1. Product profile

## 1.1 General description

Hybrid high dynamic range amplifier module in a leadless SOT567A package, operating at a supply voltage of 12 V.

### CAUTION

This device is sensitive to ElectroStatic Discharge (ESD). Therefore care should be taken during transport and handling.

### 1.2 Features

- Extremely low noise
- Excellent linearity
- Silicon nitride passivation
- Rugged construction
- Gold metallization ensures excellent reliability

### **1.3 Applications**

Reverse amplifier in two-way CATV systems in the 5 MHz to 65 MHz frequency range

### 1.4 Quick reference data

| Table 1:         | Quick reference data           |              |             |     |     |      |
|------------------|--------------------------------|--------------|-------------|-----|-----|------|
| Symbol           | Parameter                      | Conditions   | Min         | Тур | Max | Unit |
| Gp               | power gain                     | f = 10 MHz   | 25          | -   | 26  | dB   |
| I <sub>tot</sub> | total current consumption (DC) | $V_B = 12 V$ | <u>1</u> 75 | -   | 95  | mA   |

[1] The module normally operates at  $V_B$  = 12 V, but is able to withstand supply transients of up to 30 V.

# 8. Data sheet status

| Level | Data sheet status [1] | Product status [2] [3] | Definition   |
|-------|-----------------------|------------------------|--|
| I     | Objective data        | Development            | This data sheet contains data from the objective specification for product development. Philips<br>Semiconductors reserves the right to change the specification in any manner without notice.   |
| II    | Preliminary data      | Qualification          | This data sheet contains data from the preliminary specification. Supplementary data will be published<br>at a later date. Philips Semiconductors reserves the right to change the specification without notice, in<br>order to improve the design and supply the best possible product.             |
| 111   | Product data          | Production             | This data sheet contains data from the product specification. Philips Semiconductors reserves the<br>right to make changes at any time in order to improve the design, manufacturing and supply. Relevant<br>changes will be communicated via a Customer Product/Process Change Notification (CPCN). |

[1] Please consult the most recently issued data sheet before initiating or completing a design.

[2] The product status of the device(s) described in this data sheet may have changed since this data sheet was published. The latest information is available on the Internet at URL http://www.semiconductors.philips.com.

[3] For data sheets describing multiple type numbers, the highest-level product status determines the data sheet status.

# 9. Definitions

**Short-form specification** — The data in a short-form specification is extracted from a full data sheet with the same type number and title. For detailed information see the relevant data sheet or data handbook.

Limiting values definition — Limiting values given are in accordance with the Absolute Maximum Rating System (IEC 60134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of the specification is not implied. Exposure to limiting values for extended periods may affect device reliability.

**Application information** — Applications that are described herein for any of these products are for illustrative purposes only. Philips Semiconductors make no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

# **10. Disclaimers**

Life support — These products are not designed for use in life support appliances, devices, or systems where malfunction of these products can reasonably be expected to result in personal injury. Philips Semiconductors customers using or selling these products for use in such applications do so at their own risk and agree to fully indemnify Philips Semiconductors for any damages resulting from such application.

**Right to make changes** — Philips Semiconductors reserves the right to make changes in the products - including circuits, standard cells, and/or software - described or contained herein in order to improve design and/or performance. When the product is in full production (status 'Production'), relevant changes will be communicated via a Customer Product/Process Change Notification (CPCN). Philips Semiconductors assumes no responsibility or liability for the use of any of these products, conveys no license or title under any patent, copyright, or mask work right to these products are free from patent, copyright, or mask work right infringement, unless otherwise specified.
