

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

High-GHz Noise Suppression Chip Ferrite Bead

BLM15G□□□□SN1□ Reference Specification

1.Scope

This reference specification applies to Chip Ferrite Bead BLM15G_SN series.

2.Part Numbering

(ex.) $\frac{BL}{(1)}$ $\frac{M}{(2)}$ $\frac{15}{(3)}$ $\frac{GG}{(4)}$ $\frac{221}{(5)}$ $\frac{S}{(6)}$ $\frac{N}{(7)}$ $\frac{1}{(8)}$ $\frac{D}{(9)}$

(1)Product ID (2)Type (3)Dimension(L×W) (4)Characteristics (5)Typical Impedance at 100MHz
(6)Performance (7)Category (8)Numbers of Circuit (9)Packaging(D:Taping / B:Bulk)

3.Rating

Customer Part Number	MURATA Part Number	Impedance (Ω) (Under Standard Testing Condition)		Rated Current (mA)	DC Resistance (Ω max.)	
		at 100MHz	at 1GHz		Initial Values	Values After Testing
	BLM15GG221SN1D BLM15GG221SN1B	220±25%	600±40%	300	0.7 max	0.8 max
	BLM15GG471SN1D BLM15GG471SN1B	470±25%	1200±40%	200	1.3 max	1.4 max
	BLM15GA750SN1D BLM15GA750SN1B	75±25%	1000±40%	200	1.3 max	1.4 max

■ Operating Temperature : -55°C to +125°C

■ Storage Temperature : -55°C to +125°C

4.Style and Dimensions

■ Equivalent Circuit

(Resistance element becomes dominant at high frequencies.)

■ Unit Mass (Typical value)

0.001g

5.Marking

No marking.

6.Standard Testing Conditions

< Unless otherwise specified >

Temperature : Ordinary Temp. (15 °C to 35 °C)

Humidity : Ordinary Humidity (25%(RH) to 85%(RH))

< In case of doubt >

Temperature : 20°C±2 °C

Humidity : 60%(RH) to 70%(RH)

Atmospheric pressure : 86kPa to 106kPa

7.Specifications**7-1.Electrical Performance**

No.	Item	Specification	Test Method
7-1-1	Impedance	Meet item 3.	Measuring Frequency : 100MHz±1MHz , 1GHz±1MHz Measuring Equipment : KEYSIGHT4291A or the equivalent Test Fixture : KEYSIGHT16192A or the equivalent
7-1-2	DC Resistance	Meet item 3.	Measuring Equipment : Digital multi meter *Except resistance of the Substrate and Wire

7-2.Mechanical Performance

No.	Item	Specification	Test Method						
7-2-1	Appearance and Dimensions	Meet item 4.	Visual Inspection and measured with Slide Calipers.						
7-2-2	Bonding Strength	Meet Table 1. Table 1 <table border="1"> <tr> <td>Appearance</td> <td>No damage</td> </tr> <tr> <td>Impedance Change (at 100MHz)</td> <td>Within $\pm 30\%$</td> </tr> <tr> <td>DC Resistance</td> <td>Meet item 3.</td> </tr> </table>	Appearance	No damage	Impedance Change (at 100MHz)	Within $\pm 30\%$	DC Resistance	Meet item 3.	It shall be soldered on the substrate. Applying Force(F) : 5N Applying Time : 5s \pm 1s Applying Direction: Parallel to the substrate. 
Appearance	No damage								
Impedance Change (at 100MHz)	Within $\pm 30\%$								
DC Resistance	Meet item 3.								
7-2-3	Bending Strength		It shall be soldered on the substrate. Substrate: Glass-epoxy 100mm \times 40mm \times 0.8mm Deflection : 2.0mm Speed of Applying Force : 0.5mm/s Keeping Time : 30s 						
7-2-4	Vibration		It shall be soldered on the substrate. Oscillation Frequency : 10Hz to 2000Hz to 10Hz for 20 min Total Amplitude 1.5mm or Acceleration 196m/s ² whichever is smaller Testing Time : A period of 2 hours in each of 3 mutually perpendicular directions. (Total 6 h)						
7-2-5	Resistance to Soldering Heat		Pre-Heating : 150°C \pm 10°C, 60s~90s Solder : Sn-3.0Ag-0.5Cu Solder Temperature : 270°C \pm 5°C Immersion Time : 10s \pm 0.5s Immersion and emersion rates : 25mm/s Then measured after exposure in the room condition for 48h \pm 4h.						
7-2-6	Drop	Products shall be no failure after tested.	It shall be dropped on concrete or steel board. Method : free fall Height : 75cm Attitude from which the product is dropped: 3 direction The number of times : 3 times for each direction (Total 9 times)						
7-2-7	Solderability	The electrodes shall be at least 95% covered with new solder coating.	Flux : Ethanol solution of rosin,25(wt)% Pre-Heating : 150°C \pm 10°C, 60s~90s Solder : Sn-3.0Ag-0.5Cu Solder Temperature : 240°C \pm 5°C Immersion Time : 3s \pm 1s Immersion and emersion rates : 25mm/s						

7-3.Environmental Performance

It shall be soldered on the substrate.

No.	Item	Specification	Test Method
7-3-1	Temperature Cycle	Meet Table 1.	1 cycle: 1 step:-55 °C(+0 °C,-3 °C) / 30min±3min 2 step:Ordinary temp. / 3min max. 3 step:+125 °C(+3 °C,-0 °C) / 30min±3min 4 step: Ordinary temp. / 3min max. Total of 100 cycles Then measured after exposure in the room condition for 48h±4h.
7-3-2	Humidity		Temperature : 70°C±2°C Humidity : 90%RH to 95%RH Time : 1000h(+48h,-0h) Then measured after exposure in the room condition for 48h±4h.
7-3-3	Heat Life		Temperature : 125°C±3°C Applying Current : Rated Current (at Test temperature) Time : 1000h(+48h,-0h) Then measured after exposure in the room condition for 48h±4h.
7-3-4	Cold Resistance		Temperature : -55±2°C Time : 1000h(+48h,-0h) Then measured after exposure in the room condition for 48h±4h.

8. Specification of Packaging**8-1.Appearance and Dimensions (8mm-wide paper tape)****(1) Taping**

Products shall be packaged in the cavity of the base tape of 8mm-wide, 2mm-pitch continuously and sealed by top tape and bottom tape.

(2) Sprocket hole:Sprocket hole shall be located on the left hand side toward the direction of feed.

(3) Spliced point:The base tape and top tape have no spliced point

(4) Cavity:There shall not be burr in the cavity.

(5) Missing components number

Missing components number within 0.1% of the number per reel or 1 pc., whichever is greater, and are not continuous. The specified quantity per reel is kept.

8-2.Tape Strength**(1)Pull Strength**

Top tape	5N min.
Bottom tape	

(2)Peeling off force of Cover tape

0.1N to 0.6N (Minimum value is typical.)

*Speed of Peeling off:300mm/min

9-2.Limitation of Applications

Please contact us before using our products for the applications listed below which require especially high reliability for the prevention of defects which might directly cause damage to the third party's life, body or property.

- | | |
|----------------------------------|--|
| (1)Aircraft equipment | (6)Disaster prevention / crime prevention equipment |
| (2)Aerospace equipment | (7)Traffic signal equipment |
| (3)Undersea equipment | (8)Transportation equipment (vehicles, trains, ships, etc.) |
| (4)Power plant control equipment | (9)Applications of similar complexity and /or reliability requirements to the applications listed in the above |
| (5)Medical equipment | |

10. Notice

Products can only be soldered with reflow.

This product is designed for solder mounting.

Please consult us in advance for applying other mounting method such as conductive adhesive.

10-1.Land pattern designing

- Standard land dimensions (Reflow soldering)

**10-2.Soldering Conditions****(1) Flux,Solder**

Flux	Use rosin-based flux, but not highly acidic flux (with chlorine content exceeding 0.2(wt)% .) Do not use water-soluble flux.
Solder	Use Sn-3.0Ag-0.5Cu solder Standard thickness of solder paste : 100 μm to 200 μm

(2) Soldering conditions

- Pre-heating should be in such a way that the temperature difference between solder and ferrite surface is limited to 150°C max. Also cooling into solvent after soldering should be in such a way that the temperature difference is limited to 100°C max.

Insufficient pre-heating may cause cracks on the ferrite, resulting in the deterioration of product quality.

- Standard soldering profile and the limit soldering profile is as follows.

The excessive limit soldering conditions may cause leaching of the electrode and / or resulting in the deterioration of product quality.

	Standard Profile	Limit Profile
Pre-heating	150~180°C 、 90s±30s	
Heating	above 220°C、 30s~60s	above 230°C、 60s max.
Peak temperature	245±3°C	260°C,10s
Cycle of reflow	2 times	2 times

10-3. Reworking with soldering iron

- Pre-heating : 150°C, 1 min
- Tip temperature : 350°C max.
- Soldering time : 3(+1,-0) seconds.
- Soldering iron output : 80W max.
- Tip diameter : φ 3mm max.
- Times : 2times max.

Note : Do not directly touch the products with the tip of the soldering iron in order to prevent the crack on the ferrite material due to the thermal shock.

10-4.Solder Volume

Solder shall be used not to be exceed as shown below.

$$1/3T \leq t \leq T$$

(T:Chip thickness)

Accordingly increasing the solder volume, the mechanical stress to product is also increased. Exceeding solder volume may cause the failure of mechanical or electrical performance.

10-5.Attention regarding P.C.B. bending

The following shall be considered when designing and laying out P.C.B.'s.

- (1) P.C.B. shall be designed so that products are not subjected to the mechanical stress for board warpage.
<Products direction>

Products shall be located in the sideways direction (Length:a<b) to the mechanical stress.

- (2) Components location on P.C.B. separation.

It is effective to implement the following measures, to reduce stress in separating the board.

It is best to implement all of the following three measures; however, implement as many measures as possible to reduce stress.

Contents of Measures	Stress Level
(1) Turn the mounting direction of the component parallel to the board separation surface.	A > D *1
(2) Add slits in the board separation part.	A > B
(3) Keep the mounting position of the component away from the board separation surface.	A > C

*1 A > D is valid when stress is added vertically to the perforation as with Hand Separation. If a Cutting Disc is used, stress will be diagonal to the PCB, therefore A > D is invalid.

(3) Mounting Components Near Screw Holes

When a component is mounted near a screw hole, it may be affected by the board deflection that occurs during the tightening of the screw. Mount the component in a position as far away from the screw holes as possible.

**10-6. Mounting density**

Add special attention to radiating heat of products when mounting the inductor near the products with heating. The excessive heat by other products may cause deterioration at joint of this product with substrate.

10-7. Cleaning Conditions

Products shall be cleaned on the following conditions.

(1) Cleaning temperature shall be limited to 60°C max. (40°C max. for IPA.)

(2) Ultrasonic cleaning shall comply with the following conditions, avoiding the resonance phenomenon at the mounted products and P.C.B.

Power: 20W/l max. Frequency: 28kHz to 40kHz Time: 5 min max.

(3) Cleaner

1. Alternative cleaner

- Isopropyl alcohol (IPA)

2. Aqueous agent

- PINE ALPHA ST-100S

(4) There shall be no residual flux and residual cleaner after cleaning.

In the case of using aqueous agent, products shall be dried completely after rinse with de-ionized water in order to remove the cleaner.

(5) Rinsing by Ultrasonic cleaning

Using water for ultrasonic cleaning may affect the resin quality used for the product by water element. In case of set cleaning conditions, please make sure the reliability according to the cleaning conditions.

(6) Other cleaning

Please contact us.

10-8. Operating Environment

Do not use this product under the following environmental conditions, on deterioration of the Insulation Resistance of the Ferrite material and/or corrosion of Inner Electrode may result from the use.

(1) in the corrodible atmosphere (acidic gases, alkaline gases, chlorine, sulfur gases, organic gases and etc.)

(2) in the atmosphere where liquid such as organic solvent, may splash on the products.

(3) in the atmosphere where the temperature / humidity changes rapidly and it is easy to dew.

10-9. Resin coating

The impedance value may change and/or it may affect on the product's performance due to high cure-stress of resin to be used for coating / molding products. So please pay your careful attention when you select resin. In prior to use, please make the reliability evaluation with the product mounted in your application set.

10-10. Handling of a substrate

After mounting products on a substrate, do not apply any stress to the product caused by bending or twisting to the substrate when cropping the substrate, inserting and removing a connector from the substrate or tightening screw to the substrate.

Excessive mechanical stress may cause cracking in the product.

Bending

Twisting

10-11.Storage Conditions**(1)Storage period**

Use the products within 12 months after delivered.
Solderability should be checked if this period is exceeded.

(2)Storage conditions

- Products should be stored in the warehouse on the following conditions.
 - Temperature : -10°C to 40°C
 - Humidity : 15% to 85% relative humidity
 - No rapid change on temperature and humidity
- Don't keep products in corrosive gases such as sulfur, chlorine gas or acid, or it may cause oxidization of electrode, resulting in poor solderability.
- Products should be stored on the palette for the prevention of the influence from humidity, dust and so on.
- Products should be stored in the warehouse without heat shock, vibration, direct sunlight and so on.
- Products should be stored under the airtight packaged condition.

(3)Delivery

Care should be taken when transporting or handling product to avoid excessive vibration or mechanical shock.

11. ⚠ Note

- (1)Please make sure that your product has been evaluated in view of your specifications with our product being mounted to your product.
- (2) You are requested not to use our product deviating from the reference specifications.
- (3) The contents of this reference specification are subject to change without advance notice.
Please approve our product specifications or transact the approval sheet for product specifications before ordering.
