Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

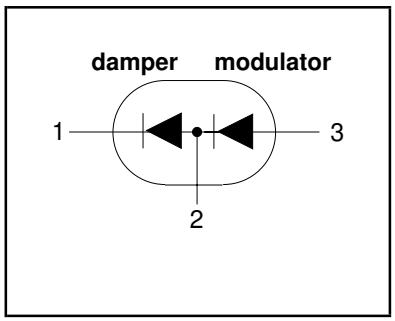
Damper-Modulator fast, high-voltage

BYM357X

FEATURES

- Low forward volt drop
- Fast switching
- Soft recovery characteristic
- High thermal cycling performance
- Isolated mounting tab

SYMBOL



QUICK REFERENCE DATA

DAMPER	MODULATOR
V_R=1500 V	V_R=600 V
$V_F \leq 1.3$ V	$V_F \leq 1.03$ V
$I_{F(peak)}$ =7 A	$I_{F(peak)}$ = 7 A
$I_{FSM} \leq 60$ A	$I_{FSM} \leq 70$ A
$t_{rr} \leq 300$ ns	$t_{rr} \leq 60$ ns

GENERAL DESCRIPTION

Combined damper and modulator diodes in an isolated plastic envelope for horizontal deflection in colour TV and PC monitors.
The BYM357X contains diodes with performance characteristics designed specifically for applications from 16kHz to 70kHz

The BYM357X series is supplied in the conventional leaded SOT186A package.

PINNING

PIN	DESCRIPTION
1	damper cathode
2	common anode/cathode
3	modulator anode.

1. Refer to mounting instructions for F-pack envelopes.
2. Epoxy meets UL94 V0 at 1/8".

DEFINITIONS

Data sheet status	
Objective specification	This data sheet contains target or goal specifications for product development.
Preliminary specification	This data sheet contains preliminary data; supplementary data may be published later.
Product specification	This data sheet contains final product specifications.
Limiting values	
Limiting values are given in accordance with the Absolute Maximum Rating System (IEC 134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of this specification is not implied. Exposure to limiting values for extended periods may affect device reliability.	
Application information	
Where application information is given, it is advisory and does not form part of the specification.	

LIFE SUPPORT APPLICATIONS

These products are not designed for use in life support appliances, devices or systems where malfunction of these products can be reasonably expected to result in personal injury. Philips customers using or selling these products for use in such applications do so at their own risk and agree to fully indemnify Philips for any damages resulting from such improper use or sale.
