Flotilla - Cable

These cables are perfect for connecting your Flotilla modules to the Dock, and the Dock to your computer. They're high-spec cables, designed specifically to deal with the higher currents that the Flotilla components can draw, and we've even stamped the Flotilla logo onto the moulded plastic connectors.

The blue Flotilla ropes (micro B to micro B) come in three different lengths - 10, 25, and 50cm - depending on what your project needs, be it a robot or a Noisemaker synth.

There's also the red Dock cable, which is a high quality USB A to micro B cable, for connecting your Flotilla Dock to your computer.
