

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

### **CD4047BC**

# Low Power Monostable/Astable Multivibrator

#### **General Description**

The CD4047B is capable of operating in either the monostable or astable mode. It requires an external capacitor (between pins 1 and 3) and an external resistor (between pins 2 and 3) to determine the output pulse width in the monostable mode, and the output frequency in the astable mode.

Astable operation is enable<u>d by a high</u> level on the astable input or low level on the astable input. The output frequency (at 50% duty cycle) at Q and  $\overline{Q}$  outputs is determined by the timing components. A frequency twice that of Q is available at the Oscillator Output; a 50% duty cycle is not guaranteed.

Monostable operation is obtained when the device is triggered by LOW-to-HIGH transition at + trigger input or HIGH-to-LOW transition at - trigger input. The device can be retriggered by applying a simultaneous LOW-to-HIGH transition to both the + trigger and retrigger inputs.

A high level on Reset input resets the outputs Q to LOW,  $\overline{\mathbf{Q}}$  to HIGH.

#### **Features**

■ Wide supply voltage range: 3.0V to 15V ■ High noise immunity: 0.45 V<sub>DD</sub> (typ.)

■ Low power TTL compatibility: Fan out of 2 driving 74L or 1 driving 74LS

#### **Special Features**

- Low power consumption: special CMOS oscillator configuration
- Monostable (one-shot) or astable (free-running)
- True and complemented buffered outputs
- Only one external R and C required

#### Monostable Multivibrator Features

- Positive- or negative-edge trigger
- Output pulse width independent of trigger pulse duration
- Retriggerable option for pulse width expansion
- Long pulse widths possible using small RC components by means of external counter provision
- Fast recovery time essentially independent of pulse width
- Pulse-width accuracy maintained at duty cycles approaching 100%

#### **Astable Multivibrator Features**

- Free-running or gatable operating modes
- 50% duty cycle
- Oscillator output available
- Good astable frequency stability typical= ±2% + 0.03%/°C @ 100 kHz frequency= ±0.5% + 0.015%/°C @ 10 kHz deviation (circuits trimmed to frequency V<sub>DD</sub> = 10V +10%)

## **Applications**

- · Frequency discriminators
- · Timing circuits
- · Time-delay applications
- · Envelope detection
- · Frequency multiplication
- · Frequency division

## **Ordering Code:**

| Order Number | Package Number | Package Description  |  |  |  |  |
|--------------|----------------|--|--|--|--|--|
| CD4047BCM    | M14A           | 14-Lead Small Outline Integrated Circuit (SOIC), JEDEC MS-012, 0.150" Narrow |  |  |  |  |
| CD4047BCN    | N14A           | 14-Lead Plastic Dual-In-Line Package (PDIP), JEDEC MS-001, 0.300" Wide       |  |  |  |  |

Devices also available in Tape and Reel. Specify by appending the suffix letter "X" to the ordering code.

## Absolute Maximum Ratings(Note 2)

(Note 3)

 $\begin{array}{ll} \text{DC Supply Voltage (V}_{\text{DD}}) & -0.5\text{V to } +18\text{V}_{\text{DC}} \\ \text{Input Voltage (V}_{\text{IN}}) & -0.5\text{V to V}_{\text{DD}} +0.5\text{V}_{\text{DC}} \\ \text{Storage Temperature Range (T}_{\text{S}}) & -65^{\circ}\text{C to } +150^{\circ}\text{C} \end{array}$ 

Power Dissipation (P<sub>D</sub>)

Dual-In-Line 700 mW Small Outline 500 mW

Lead Temperature (T<sub>L</sub>)

(Soldering, 10 seconds) 260°C

# Recommended Operating Conditions (Note 3)

DC Supply Voltage (V<sub>DD</sub>) 3V to 15V<sub>DC</sub> Input Voltage (V<sub>IN</sub>) 0 to V<sub>DD</sub> V<sub>DC</sub> Operating Temperature Range (T<sub>A</sub>)  $-55^{\circ}$ C to +125 $^{\circ}$ C

Note 2: "Absolute Maximum Ratings" are those values beyond which the safety of the device cannot be guaranteed. They are not meant to imply that the devices should be operated at these limits. The table of "Recommended Operating Conditions" and "Electrical Characteristics" provides conditions for actual device operation.

Note 3:  $V_{SS} = 0V$  unless otherwise specified.

#### LIFE SUPPORT POLICY

FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF THE PRESIDENT OF FAIRCHILD SEMICONDUCTOR CORPORATION. As used herein:

- Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury to the user.
- A critical component in any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
