# imall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## DATA SHEET CL-L104-MC3WW1-F5

CITIZEN and CITIZEN are trademarks or registered trademarks of CITIZEN HOLDINGS CO., LTD. JAPAN.

Ref.CE-P2359 03/13 R1(0613)

DATA SHEET	1/11
1. Scope of Application This data sheet is applied to the chip type LED lamp , model CL-L104-MC3W	/W1-F5.
2. Part code	
$\mathbf{C} \mathbf{L} - \underline{\mathbf{L} 1 0 4} - \underline{\mathbf{M}} \mathbf{C} \underline{3} \mathbf{W} \mathbf{W} 1$	- F 5
Series L104 : White power LED for general lighting.	
Special specifications M : General Color Rendering Index Typ.85 type.	
Watt class C3 : 3 watt package.	
Lighting color WW1 : Compliance with ANSI C78.377-2008, 3-Step MacAdam ellipse, Correlated Color Temperature 3500K.	
	CITILED
	4-MC3WW1-F5
CITIZEN ELECTRONI	CS CO.,LTD. JAPAN

#### 4. Performance (1) Absolu

1) Absolute Maximum Rating					
Parameter	Symbol	Rating Value	Unit		
Power Dissipation	P <sub>D</sub>	7.8	W		
Forward Current	$I_{\rm F}$	720	mA		
Mnimum current	$I_{FMin}$	30	mA		
Reverse Current	I <sub>R</sub>	1	mA		
<b>Operating Temperature</b>	T <sub>OP</sub>	-30 ~ +85	С		
Storage Temperature	T <sub>ST</sub>	-40 ~ +100	С		
Junction Temperature	Tj <sub>Max</sub>	120	С	*1	

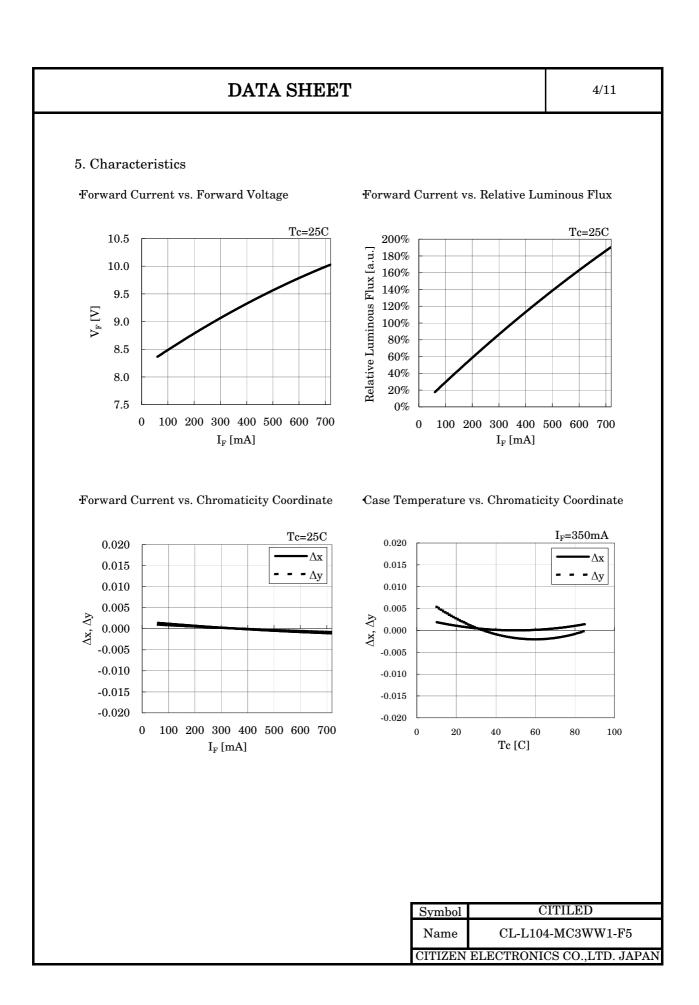

\*1 D.C. Current : Tj = Tc + Rj-c  $\times$  P<sub>D</sub>

#### 6. Reliability

#### (1) Details of the tests

Test Item	Test Condition
	Ta=-30 C, $I_F$ =350 mA× 1000 hours(with Al-fin)
Continuous Operation Test	Ta=60 C, $I_F$ =350 mA× 1000 hours(with Al-fin)
	Ta=85 C, I <sub>F</sub> =350 mA× 1000 hours(with Al-fin)
Low Temperature Storage Test	-40 C × 1000 hours
High Temperature Storage Test	100 C × 1000 hours
Moisture-proof Test	60 C, 90 %RH for 1000 hours
Thermal Shock Test	-40 C $\times$ 30 minutes – 100 C $\times$ 30 minutes, 100 cycle

#### (2) Judgment Criteria of Failure for Reliability Test

(2) Judgment Criteria of Failure for Reliability Test (Ta=25 C)					
Measuring Item	Symbol	Measuring Condition	Judgment Criteria for Failure		
Forward Voltage	$V_{\rm F}$	$I_F$ =350mA	> U × 1.1		
Total Luminous Flux	$\Phi v$	$I_F$ =350mA	$< S \times 0.85$		

U defines the upper limit of the specified characteristics. S defines the initial value.

Note: Measurement shall be taken between 2 hours and 24 hours, and the test pieces should be returned to the normal ambient conditions after the completion of each test.

	Name	CL-L104-MC3WW1-F5

#### (4) Thermal Design

-The thermal design to draw heat away from the LED junction is most critical parameter for an LED illumination system. High operating temperatures at the LED junction adversely affect the performance of LED's light output and lifetime. Therefore the LED junction temperature should not exceed the absolute maximum rating in LED illumination system.

-The LED junction temperature while operation of LED illumination system depends upon thermal resistance of internal LED package (Rj-c), outer thermal resistances of LED package, power loss and ambient temperature. Please take both of the thermal design specifications and ambient temperature conditions into consideration for the setting of driving conditions. -For more information, please refer to application note "Thermal Management".

#### (5) Driving Current

-A constant current is recommended as an applying driving current to this product.
In the case of constant voltage driving, please connect current-limiting resistor to each products in series and control the driving current to keep under the absolute maximum rating forward current value.
-Electrical transient might apply excess voltage, excess current and reverse voltage to the product(s).
They also affect negative impact on the product(s) therefore please make sure that no excess voltage, excess current and reverse voltage is applied to the product(s)

- when the LED driver is turn-on and/or turn-off.
- -For more information, please refer to application note "Driving".

#### (6) Lighting at a minimum current value

-In a case where the minimum current(IF min) is applied to the product, some of LED dice in the product might look different in their brightness due to the individual difference of the LED dice, and they are not failed.

#### (7) Electrical Safety

- -This product is designed and produced according to IEC 62031:2008
- (IEC 62031:2008 LED modules for general lighting. Safety specification)
- -Dielectric voltage withstand test has been conducted on this product to see any failure after applying voltage between active pads and aluminum section of the product, and to pass at least 500V.
- -Considering conformity assessment for IEC62031:2008, almost all items of the specification depend upon your final product of LED illumination system.
- Therefore, please confirm with your final product for electrical safety of your product. As well, the products comply with the criteria of IEC62031:2008 as single LED package.

#### 8. Precautions (continued)

(8) Recommended soldering Condition (This product is not adaptable to reflow process.) -For manual soldering Please use lead-free soldering. Soldering shall be implemented using a soldering bit at a temperature lower than 350C, and shall be finished within 3.5 seconds for one land. No external force shall be applied to resin part while soldering is implemented. Next process of soldering should be carried out after the product has return to ambient temperature. -For soldering correction Regarding soldering correction, above conditions shall be applied. Contacts number of soldering bit should be within twice for each terminal as a correction. \* Citizen Electronics cannot guarantee if usage exceeds these recommended conditions. Please use it after sufficient verification is carried out on your own risk if absolutely necessary. (9) Eve Safety -The International Electrical Commission (IEC) published in 2006 IEC 62471 "2006 Photobiological safety of lamps and lamp systems " which includes LEDs within its scope. -When sorting single LEDs according to IEC 62471, almost all white LEDs can be classified as belonging to either Exempt Group (no hazard) or Risk Group 1 (low risk). -However, Optical characteristics of LEDs such as radiant flux, spectrum and light distribution are factors that affect the risk group determination of the LED, and especially a high-power LED, that emits light containing blue wavelengths, might have properties equivalent to those of Risk Group 2 (moderate risk). -Great care should be taken when directly viewing an LED that is driven at high current, has multiple uses as a module or when focusing the light with optical instruments, as these actions might greatly increase the hazard to your eyes. -It is recommended to regard the evaluation of stand-alone LED packages as a reference and to evaluate your final product. (10) This product is not designed for usage under the following conditions. If the product might be used under the following conditions, you shall evaluate its effect and appropriate them. In places where the product might: -directly and indirectly get wet due to rain and/or at place with the fear. -be damage by seawater and/or at place with the fear -be exposed to corrosive gas (such as Cl2, H2S, NH3, SOx, NOx and so on) and/or at place with the fear. -be exposed to dust, fluid or oil and/or at place with the fear.
