

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

### DC SWITCHING (-NPN or -PNP)

V<sub>ce</sub> (full off): 30 VDC max.  
 I<sub>sink</sub> (full on): 120 mA DC max. @ rated full-on  
 V<sub>ce</sub> (reverse polarity voltage): 1.2 VDC @ 100 mA DC  
 V<sub>ce</sub> (full on): 1.5 VDC @ 120 mA DC I<sub>sink</sub>  
 Off state leakage current: 5 $\mu$ A @ 30 VDC (typical)

### AC SWITCHING (-ACA)

Off state voltage: 240 VAC RMS max.  
 Minimum holding current: 10 mA  
 On state current: 0.8 AAC RMS max. continuous  
 Off state leakage: 50  $\mu$ A @ 240 VAC max.  
 Peak Non-Repetitive Surge Current:  
 8 AAC RMS (1 cycle, 60 Hz.)

### OUTLINE DRAWING

### ELECTRICAL CONNECTIONS

The **CR9300** Series is a low cost, self powered, fixed set-point Current Switch designed for applications that require an on-off indication of current flow. Current levels above the guaranteed full-on level will turn the output to full on. The Current Switch is recommended only for applications where the continuous operating current is above the rated full on level of 350 mA. Operation below this point will not drive the output device full-on and derate the output ratings. The unit is available with a NPN or PNP output transistor for switching DC and a SCR output for switching AC. Connections can be made directly to items such as a PLC or electromechanical relay. Note that connections made directly to an inductive device such as an electromechanical relay will require a customer supplied clamping diode for DC operation or a snubber network for AC operation.

### Applications

Continuity  
 Proving Switch

### Features

Low Cost  
 Low Fixed Trip Point  
 Fully Isolated  
 Reverse Output Polarity Protected  
 Self-Powered

### Specifications

Rated Full-on: 0.350 AAC RMS  
 Turn-on Time: 100 ms. max. @ rated full-on  
 Turn-off Time: 250 ms. max. to 80% of V<sub>ce</sub>  
 Maximum sense current: Continuous: 100 AAC  
 1 Second: 500 AAC

Frequency\*: 50 to 400 Hz  
 Operating Temperature: -30° C to +60° C  
 Storage Temperature: -55° C to +85° C  
 Weight 0.08 LBS.

\*All specifications for operation at 60 Hz only
