Chipsmall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

SPECIFICATION

PRODUCT NAME:

VOLTAGE CONTROLLED CRYSTAL OSCILLATOR

TYPE: CSX-750V

FREQUENCY: MHz

PARTS NO.:

CITIZEN WATCH CO., LTD.
1-12, Honcho 6-chome, Tanashi-shi,
Tokyo 188-8511 Japan

Oscillator Technical section
Crystal Devices Div.
Telephone: 0424-68-4572
Fax : 0424-68-4666

APPROVED	CHECKED	PREPARED

PRODUCTS MARKETING GROUP
Telephone: 0424-67-6214
Telex:2822-471/ Fax: 0424-67-8503

I. SCOPE

This specification relates to the voltage controlled crystal oscillator to be supplied by CITIZEN WATCH CO., LTD. (following as CITIZEN) .

NOTICE

1. If something that is ambiguously defined or undefined in this specification happened, the customer and CITIZEN would discuss and take necessary steps by mutual consent.
2. Product test data can't be attached to this specification.
3. This product is not authorized for use as critical component in life support devices or systems.

II. SPECIFICATION

1. ABSOLUTE MAXIMUM RATING

Parameter		CSX750VB/CSX750VC
Supply Voltage	Vmax	-0.5V to +7.0V
Storage Temperature	Tstg	-45°C to +90°C
Output Current	Iout	10mA Max.
Input Control Voltage	Vc_m	-0.5V to Vdd +0.5V
Solder Heat Resistance Of The Outer Lead	Tsol	Max.240°C x Max.10 seconds x 2times Max.200°C x Max. 3 minutes

2. OPERATING RANGE

Parameter		CSX750VB	CSX750VC
Supply Voltage	Vdd	3.3V±5%	5.0V±10%
Operating Temperature	Topr	-10°C to 70°C or -40°C to 85°C	
Input Control Voltage	Vc	0.0V to Vdd	
Output Load	CL	30pF Max.	

3. FREQUENCY CHARACTERISTICS

Parameter		CSX750VB	CSX750VC
Stability (note1)	dF0	±50ppm Max.	
Pullability (note2)	Fpull	±90ppm Min.	±100ppm Min.
Linearity	Ldev	±15% Max.	±10% Max.
Modulation Band Width	Fmod	10kHz Min.	

note1) Frequency Stability includes initial tolerance, temperature characteristics, input voltage characteristics, load characteristics, shock, vibration, reflow and 1st year aging.
note2) Vc=1.65V±1.65V (CSX750VB) Vc=2.5V±2.0V (CSX750VC)
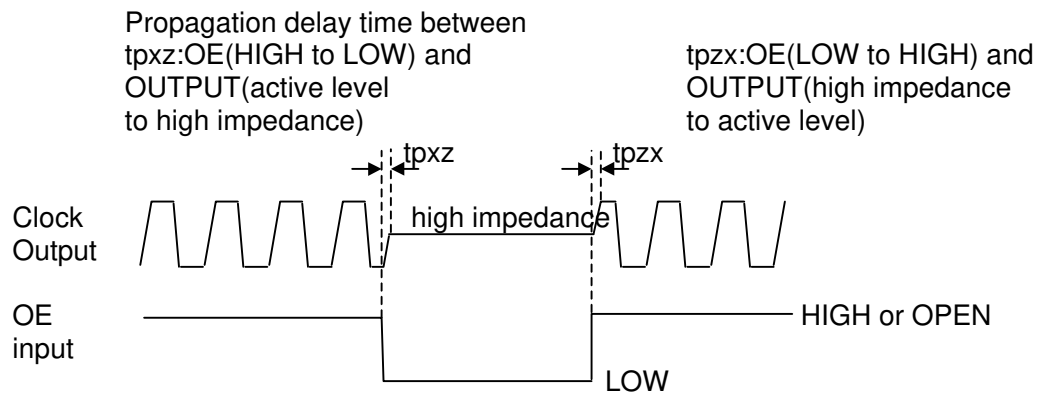

4. ELECTRICAL CHARACTERISTICS
(Ta=25°C load=30pF Vc=Vdd/2)

Parameter		Conditions	CSX750VB	CSX750VC
Start Up Time (note)	tosc		4msec Max.	
Power Supply Current	Idd	No Load	11mA Max.	30mA Max.
Disable Current	Iinh	No Load	5mA Max.	20mA Max.
Rise Time	tr	20% to 80%Vdd	5ns Max.	
Fall Time	tf	80% to 20%Vdd	5ns Max.	
Duty Cycle	duty	50%Vdd	45% to 55%	
Output HIGH Voltage	Voh	Ioh = -0.8mA	Vdd-0.4V Min.	
Output LOW Voltage	Vol	Iol = 3.2mA	0.4V Max.	
OE Input HIGH Voltage	Vih		Vdd x 0.7 Min.	
OE Input LOW Voltage	Vil		Vdd x 0.3 Max.	
Output Disable Time	tpxz	See 5.	100ns Max.	
Output Enable Time	tpzx		100ns Max.	

note) Vc must be kept ground level or left open when starting up.

## 5. THREE STATE OUTPUT OPERATION

OE Input	Clock Output	
HIGH or OPEN	Active	enable
LOW	High impedance	disable

Propagation delay time between
tpxz:OE(HIGH to LOW) and
OUTPUT(active level
to high impedance)

tpzx:OE(LOW to HIGH) and
OUTPUT(high impedance
to active level)

tpxz   tpzx

Clock
Output   high impedance
OE
input   HIGH or OPEN

LOW

NOTE: A disable clock output does not synchronize with OE,
        because internal quartz oscillator is continuous.

6. TEST CIRCUIT

[CMOS LOAD] (30pF)

Vdd

Test Point

6 5 4
Vdd OE OUT

[MEASUREMENT CONDITION]

    1.Osilloscope
     Impedance:No less than 1Mohm
     Capacitance:No more than 5pF
     Band width:No less than 500MHz
     The length of GND lead of the probe should be as short as possible.
    2.The CL includes the probe capacitance.
    3.Grounding should be single point grounding.
    4.Supply impedance should be as low as possible.
     0V to 90%Vdd rise time is no less than 150us
    5.Use the ammeter that internal impedance is small.
7. OUTPUT WAVEFORM

[CMOS LOAD] (30pF)

IV. TAPE AND REEL PACKAGING

1. TAPING SPECIFICATION
Subject to EIA 481A & JIS C 0806
(1) Tape Dimensions

Material of the Carrier Tape : PA-PET conductive coat
Material of the Cover Tape : PE A-PET conducutive coat

#### (2) Reel Dimensions
Material of the Reel : PS

Symbol	A	N	W1	W2
Dimension(mm)	254+/-2	100+/-1	17.5+/-1.0	21.5+/-1.0

(3) Packing

User Direction of Feed

End ⇒ Start

| | | Cover Tape | Empty Pockets | | | | | | | | | Empty Pockets | Cover Tape |

Reel Side Tape Trailer

Tape Leader

Item		Empty Space
Tape Leader	Cover Tape	Min. 500 mm
	Empty Pockets	Min. 20 Pockets
Tape Trailer	Cover Tape	Min. 0 mm
	Empty Pockets	Min. 40 mm

2. INNER CARTON

Tape

Reel

Label

Label

CITIZEN

3. OUTER CARTON

CITIZEN
Label

4. MARKING
   (1) Marking Labels are affixed to reel , inner carton and outer carton.
      Reel Marking is consist of:
   (2) Each label contains the following information.
      * Parts name or type
      * Frequency
      * Quantity
      * Manufacturing Date or symbol
      * Manufucturer's name or symbol
      * Others(if necessary)

5. QUANTITY

   2000 pcs/reel

6. STORAGE ENVIRONMENT
      * Storage the reel at normal temperature and humidity
      * Open the packing just before using.
      * Do not expose the sun.
      * Do not storage with some erosive chemicals.
      * Nothing is allowed to put on the reel or carton to prevent mechanical damage.
7. HANDLING
      * Handle with care to prevent the damege of tape, reel and products.

V. NOTES

1. HANDLING

(ELECTROSTATIC DISCHARGES)

This device is made with CMOS circuitry. Please take precautions to prevent damage due to electrical static discharge.

(SHOCK RELIABILITY)

This device contains a quartz crystal, so please do not give too much shock or vibration. An automatic insersion is available, however, the internal quartz crystal might be damaged in case that too much shock or vibration is given by machine condition. Be sure to check your machine condition in advance.

(CLEANING)

Since, depending on the cleaning conditions,there is a possibility of damage being caused to the Crystal Osillator,do not fail to test and confirm the results beforehand,using your company's cleaning conditions.

(TEMPERATURE AND HUMIDITY)

We recomend to store and use device under normal temperature and humidity. When this device is used in high humidity applications, there is a potential problem with condensation. As with other IC's, please take precautions to prevent condensation.

2. CIRCUIT DESIGNS

(POWER LINES)

We recomend placing a 0.01 to 0.1uF capacitor between VDD and GND to obtain stable operation and protect against power line ripple . VDD and GND pattern should be as wide as possible.

(OE INPUT LINE)

When OE pin is not used, please connect it to VDD.

(OUTPUT LINE)

As a long output line may cause irregular output, please take care to design that output line is as short as possible, and also keep high level signal source away from this device.

(STARTING UP)

Vc must be kept ground level or left open when starting up.
