## : ©hipsmall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation, and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## Murata Power Solutions

## FEATURES

RoHS compliant
2000W (220Vac), 1200W (110Vac) Output power

| 48V Main output, |
| :--- |
| 3.3V, 5 V or 12 V standby output |
| 1U sized; dimensions 4.75 "x12.00"x1.61" |
| 21.9 Watts per cubic inch density |
| $\mathrm{N}+1$ redundancy capable, including hot-docking |
| Active current sharing on main output |
| Over-voltage, over-current, |
| over-temperature protection |
| Internal cooling fans |
| ${ }^{2} \mathrm{C}$ Bus Interface with status indicators |

# D1U-W-2000-48-Hx Series 

AC/DC Front End Power Supply

## PRODUCT OVERVIEW

The D1U-W-2000 is a 2000 Watt, power-factor-corrected (PFC) front-end power supply for hot-swapping redundant systems. The main output is 48 V and standby output of either $12 \mathrm{~V}, 5 \mathrm{~V}$ or 3.3 V . Packaged in 1 U low profile, it is designed to deliver reliable bulk power to servers, workstations, storage systems or any 48 V distributed power architecture systems requiring high power density. The highly efficient electrical and thermal design with internal cooling fans supports reliable operation conditions. The D1U-W-2000 is designed to auto-recover from over-temperature faults. Status information is provided with front panel LEDs, logic signals and $I^{2} C$ management interface. Three units can be packaged into a 19 " 1 U power shelf to provide up to 6.0 kW of power.

| SELECTION GUIDE | Power Output <br> High Line AC | Power Output <br> Low Line AC | Main Output | Standby <br> Output | Airflow |

ISO 9001 and 14001 REGISTERED

4This product is subject to the following operating requirements and the Life and Safety Critical Application Sales Policy: Refer to: http://www.murata-ps.com/requirements/

Murata Power Solutions, Inc. makes no representation that the use of its products in the circuits described herein, or the use of other
technical information contained herein, will not infringe upon existing or future patent rights. The descriptions contained herein do not imply the granting of licenses to make, use, or sell equipment constructed in accordance therewith. Specifications are subject to change without notice.

[^0]:    ${ }^{1}$ Ripple and noise are measured with 0.1 uF of ceramic capacitance and 10 uF of tantalum capacitance on each of the power supply outputs. The output noise requirements apply over a 0 Hz to 20 MHz bandwidth. A short coaxial cable with 500hm scope termination is used.

[^1]:    ${ }^{2}$ Solder connector recommended for board thickness of $<0.090$
