# imall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## D1U4CS-D-2100-5x-HA3DC

#### **DC-DC Front End Power Supply**

#### **FEATURES**

- 2100W output power
- 93% efficient at half power
- Floating 54V main output and 5V standby output
- 1U height: 4"x13.5"x1.6"
- 24.3 Watts per cubic inch density
- N+1 redundancy capable, including hot-swapping
- Droop current sharing
- Overvoltage, overcurrent, overtemperature protection
- Internal cooling fans
- PMBus<sup>TM</sup> / I<sup>2</sup>C interface with status indicators
- RoHS compliant

#### **PRODUCT OVERVIEW**

This highly efficient, 2100W, 54V (or 52.5V) output DC-DC converter is designed to deliver reliable bulk power to 54V distributed power systems, making it ideal for telecom and other high power density applications. The power supplies are N+1 redundant, hot-swappable, and have internal cooling fans. The power supply automatically recovers from overcurrent and overtemperature faults, and status information is provided through front panel LEDs, logic signals and its PMBus<sup>TM</sup> /  $l^2$ C interface.

#### ORDERING GUIDE

| Part Number            | Output<br>Power | Main<br>Output | Standby Aux<br>Output | Airflow       | Current<br>Share |
|------------------------|-----------------|----------------|-----------------------|---------------|------------------|
| D1U4CS-D-2100-54-HA3DC | 2100W           | 54V            | 5V                    | Front to back | Droop            |
| D1U4CS-D-2100-52-HA3DC | 2040W           | 52.5V          | 5V                    | Front to back | Droop            |

<sup>1</sup> Ripple and noise are measured with 0.1 uF of ceramic capacitance and 10 uF electrolytic capacitance on each of the power supply outputs.

<sup>2</sup> 5Vaux is referenced to logic ground.

Address Input 1, internal Pull-up to Vdd (+5Vdc)

Address Input 2, internal Pull-up to Vdd (+5Vdc)

Reserved

A4, A5, A6, C5, C6, D4 Logic Gnd Connected to Logic Gnd

ADD1

ADD2

Reserved

<sup>3</sup> Output voltage setpoint is 52.5V on the D1U4CS-D-2100-52-HA3DC model

C3

D3

A1, B1, C1, C4

<sup>4</sup> See also ACAN36 for additional details on fault conditions. PS\_Fault remains high when OUT\_ENABLE\_L is disabled and output is off.

<sup>5</sup> Pull OUT\_ENABLE\_L (pin B2) to Logic Gnd (pin A4, A5, A6, C5, C6, D4) to enable main output. Do not exceed 5.5V on OUT\_ENABLE\_L pin.
