## : ©hipsmall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation, and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Power/Door Switch

## Door Interlock Power Switch with Minimum Contact gap of 3 mm

- Offers the minimum contact gap of 3 mm required for power switches as standard equipment.
- Safety considerations include a double return spring and direct drive positive contact opening feature.
- Pull-on lock model for easy maintenance is also available.

## RoHS Compliant

Contact Form

Contact Specifications

| Item Type |  | Standard | Pull-on lock |
| :--- | :--- | :---: | :---: |
| Contact | Specification | Rivet |  |
|  | Material | Silver |  |
|  | Gap (standard value) | 3 mm min. | 1 mm |
| Inrush <br> current | NC | NO A max. | $24 \mathrm{~A} \mathrm{max}$. |
|  | NO | 30 A max. | $24 \mathrm{~A} \mathrm{max}$. |
| Minimum applicable load <br> (reference value) * | 5 VDC 160 mA |  |  |

* Please refer to "OUsing Micro Loads" in "■Precautions" for more information on the minimum applicable load.

## Ratings

| Item <br> Type |  |  |  | Resistive load |
| :---: | :---: | :---: | :---: | :---: |
| Standard | 250 VAC | 16 A |  |  |
| Pull-on lock model | 250 VAC | 10 A |  |  |

Note. The above rating values apply under the following test conditions.
(1) Ambient temperature: $20 \pm 2^{\circ} \mathrm{C}$
(2) Ambient humidity: $65 \pm 5 \%$
(3) Operating frequency: 30 operations/min

## Characteristics

| Item Model |  | D2D-1000 models | D2D-2000 models | D2D-3000 models |
| :---: | :---: | :---: | :---: | :---: |
| Permissible operating speed |  | 10 mm to $1 \mathrm{~m} / \mathrm{s}$ |  |  |
| Permissible operating frequency | Mechanical | 300 operations/min |  |  |
|  | Electrical | 60 operations/min |  |  |
| Insulation resistance |  | $100 \mathrm{M} \Omega \mathrm{min}$. (at 500 VDC with insulation tester) |  |  |
| Contact resistance (initial value) |  | $50 \mathrm{~m} \Omega$ max. |  |  |
| Dielectric strength | Between terminals of the same polarity | 2,000 VAC $50 / 60 \mathrm{~Hz} 1 \mathrm{~min}$ | 1,000 VAC $50 / 60 \mathrm{~Hz} 1 \mathrm{~min}$ | 2,000 VAC $50 / 60 \mathrm{~Hz} 1 \mathrm{~min}$ |
|  | Between current-carrying metal parts and ground | 2,000 VAC $50 / 60 \mathrm{~Hz} 1 \mathrm{~min}$ | 1,500 VAC $50 / 60 \mathrm{~Hz} 1$ min | 2,000 VAC $50 / 60 \mathrm{~Hz} 1 \mathrm{~min}$ |
|  | Between each terminal and non-current-carrying metal parts | 2,500 VAC $50 / 60 \mathrm{~Hz} 1$ min | 1,500 VAC $50 / 60 \mathrm{~Hz} 1$ min | - |
|  | Between terminals and actuator | 4,000 VAC $50 / 60 \mathrm{~Hz} 1 \mathrm{~min}$ | - | 4,000 VAC $50 / 60 \mathrm{~Hz} 1 \mathrm{~min}$ |
| Vibration resistance | Malfunction | 10 to $55 \mathrm{~Hz}, 1.5 \mathrm{~mm}$ double amplitude |  |  |
| Shock resistance | Durability | 1,000 m/s² \{approx. 100G\} max. |  |  |
|  | Malfunction | $500 \mathrm{~m} / \mathrm{s}^{2}$ \{approx. 50G\} max. | $300 \mathrm{~m} / \mathrm{s}^{2}$ \{approx. 30G\} max. | $500 \mathrm{~m} / \mathrm{s}^{2}$ \{approx. 50G\} max. |
| Durability * | Mechanical | 10,000,000 operations min. (60 operations/min) |  |  |
|  | Electrical | 100,000 operations min . (30 operations/min) |  |  |
| Degree of protection |  | IEC IP40 |  |  |
| Degree of protection against electric shock |  | Class II |  |  |
| Proof tracking index (PTI) |  | 175 |  |  |
| Ambient operating temperature |  | $-25^{\circ} \mathrm{C}$ to $+85{ }^{\circ} \mathrm{C}$ (at ambient humidity $60 \%$ max.) (with no icing or condensation) |  |  |
| Ambient operating humidity |  | $85 \%$ max. (for $+5^{\circ} \mathrm{C}$ to $+35^{\circ} \mathrm{C}$ ) |  |  |
| Weight |  | Approx. 14 g (for D2D-1000) |  |  |

Note. The data given above are initial values.

* For testing conditions, consult your OMRON sales representative.

## Pull-on lock function (D2D-2000 models)

When opening or closing the door, the power ON state of the Switch can be checked with the door left open when applying normal (momentary) operations. By closing the door after maintenance inspection, the Switch will resume the normal momentary operation. (This feature is ideal for conducting the electrical continuity test, inspection, repair, etc. on the Switch after its assembly.)

| Example | State | Contact |  |
| :---: | :---: | :---: | :---: |
|  |  | NO-NO | NC-NC |
| To turn ON the power when the door is closed |  | ON | OFF |
| To turn OFF the power when the door is open |  | OFF | ON |
| To turn ON the power with the door left open |  | ON | OFF |

## Double Spring Mechanism (D2D-1000/3000 models)

Two return springs are provided for the pin plunger. Thus, if either of the springs is broken, this feature will prevent the Switch from malfunctioning or short-circuiting.

## Direct Contact Opening Mechanism (D2D-1000 models)

Pushing the plunger $\square$ will effectively break the circuit on the NC side even if a contact weld occurs Direct Contact Opening Mechanism is not available in NO connection.

Approved Safety Standard
UL (UL1054) /CSA (CSA C22.2 No.55)

| Rated voltage Model | D2D-1000 | D2D-2000 | D2D-3000 |
| :---: | :---: | :---: | :---: |
| 125 VAC | - | - | $3 / 4 \mathrm{HP}$ |
| 250 VAC | 16 A | 10 A | $16 \mathrm{~A} 1 / 2 \mathrm{HP}$ |

| Rated voltage (EN61058-1) $\quad$ Model | D2D-1000 | D2D-2000 | D2D-3000 |
| :---: | :---: | :---: | :---: |
| 250 VAC | 16 (4) A | 10 A | 16 (4) A |

Test conditions: 1 E 4 ( 10,000 operations) $\mathrm{T} 85\left(0^{\circ} \mathrm{C}\right.$ to $85^{\circ} \mathrm{C}$ ) Note. The values in parentheses are the motor load ratings.

Note 1. Unless otherwise specified, a tolerance of $\pm 0.4 \mathrm{~mm}$ applies to all dimensions.
2. The operating characteristics are for operation in the A direction ( $\downarrow$ ).

## Precautions

丸Please refer to "Basic Switches Common Precautions" for correct use.
Correct Use

## -Mounting

- Apply operation force to the pin plunger in the direction it operates. Applying forces laterally or from an oblique direction may damage the pin plunger.

- Use M4 mounting screw with plane washers or spring washers to securely mount the Switch. Tighten the screws to a torque of 0.49 to $0.69 \mathrm{~N} \cdot \mathrm{~m}\{5$ to $7 \mathrm{~kg} \cdot \mathrm{~cm}\}$.

## -Wiring

- It is recommended to use sleeve receptacles when connecting with the quick connect terminals.
- Insert the receptacle straight toward the terminal.
- Applying excessive external force horizontally or vertically may cause deformation of terminals and may damage the housings.

## -Using Micro Loads

Using a model for ordinary loads to open or close the contact of a micro load circuit may result in faulty contact. It is recommended to use the Switch in the operation range shown below. The minimum applicable load is the N -level reference value. This value indicates the malfunction reference level for the reliability level of $60 \%\left(\lambda_{60}\right)$.
(JIS C5003)
The equation, $\lambda_{60}=0.5 \times 10^{-6} /$ operations, indicates that the estimated malfunction rate is less than $\frac{1}{2,000,000}$ operations with a reliability level of $60 \%$.
