Precautions

★ Please refer to "Basic Switches Common Precautions" for correct use.

Cautions

● Soldering

- Terminal connections
 When soldering terminals manually, perform soldering within 3 seconds at iron tip temperature no higher than 300°C. Do not apply any external force for 1 minute after soldering. When applying solder, keep the solder away from the case of the Switch and do not allow solder or flux to flow into the case. It is recommended that you apply flux guard to the mounting surface of the Switch.

Correct Use

● Mounting

Use M1.4 mounting screw with plane washers or spring washers to securely mount the Switch. Tighten the screws to a torque of 0.08 to 0.1 N·m {0.8 to 1 kgf·cm}.

● Operation

- Do not apply a force more than two times the rated operating force to the actuator and leaf lever.
- Provide an amount of OT that equals or exceeds the standard.
- Do not change the operating position by modifying the actuator.
- Do not use the Switch in an application where the operating speed is extremely slow or the actuator is set in the midpoint between the free position and operating position.
- Mount the pin plunger so that the operating force is applied in perpendicular alignment with the stroke of the actuator.
- Do not apply a shock to the actuator, otherwise, the Switch may be damaged.
- Do not apply excessive force to the actuator of the Leaf Lever Switch in the operating, releasing, and horizontal directions.

- Application examples provided in this document are for reference only. In actual applications, confirm equipment functions and safety before using the product.
- Consult your OMRON representative before using the product under conditions which are not described in the manual or applying the product to nuclear control systems, railroad systems, aviation systems, vehicles, combustion systems, medical equipment, amusement machines, safety equipment, and other systems or equipment that may have a serious influence on lives and property if used improperly. Make sure that the ratings and performance characteristics of the product provide a margin of safety for the system or equipment, and be sure to provide the system or equipment with double safety mechanisms.

Note: Do not use this document to operate the Unit.
