

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

LT3932
36V, 2A Synchronous Buck LED Driver

DESCRIPTION

Demonstration circuit DC2286A is a 36V, 2A synchronous 2MHz buck LED driver featuring the [LT[®]3932](#). It drives one or two series LEDs at 1A when V_{IN} is between 9V and 36V, and can run down to $4V_{IN}$ with a single LED (if UVLO is adjusted). DC2286A runs at 2MHz switching frequency. Spread spectrum frequency modulation (SSFM) can be enabled with a simple jumper, reducing EMI. DC2286A comes with low EMI features including optimized layout, SSFM, and input and output filters. It passes CISPR 25 class 5 conducted and radiated EMI. It is protected against both open and short LED conditions and reports the faults.

The LT3932 has an input voltage range from 9V to 36V. It has internal, synchronous 40V switches for high efficiency and small size. It has an adjustable switching frequency between 200kHz and 2MHz. It can be synchronized to an external source or programmed with SSFM for low EMI. The PWM TG high-side PWM MOSFET driver assists with short-circuit protection and versatility. Although the demo circuit is optimized for one or two LEDs, it can be altered to have as high as 33V of LEDs if V_{IN} is high-enough and circuit components are changed appropriately.

The LT3932 can be PWM dimmed with an external PWM signal or an internally-generated PWM signal. DC2286A has a jumper that can be set to switch between internally-generated PWM signal, externally-generated PWM signal, and no PWM signal (100% on). It can be analog dimmed with a control voltage on its control pin.

When run with both PWM dimming and spread spectrum, the spread spectrum aligns itself with the PWM signal for flicker-free operation.

Small ceramic input and output capacitors are used to save space and cost. The board is designed with tiny, high frequency capacitors on both sides of the V_{OUT} pins for a reduction in radiated EMI. The open LED overvoltage protection uses the IC's constant voltage regulation loop to regulate the output to approximately 7V if the LED string is opened. There is a protection diode from LED⁺ to GND to prevent negative ringing during a short-circuit. The output current can be monitored through the ISMON output pin.

Undervoltage lockout can be adjusted on the circuit with a few simple resistor choices.

There is an EMI filter on the input of DC2286A. There is also a small ferrite bead output filter. These filters, combined with proper board layout and SSFM are effective to help the PCB pass CISPR 25 class 5 conducted and radiated EMI. Please follow the recommend layout and four-layer thickness of DC2286A for low EMI applications.

The LT3932 data sheet gives a complete description of the part, operation and applications information. The data sheet must be read in conjunction with this Demo Manual for demonstration circuit DC2286A. The LT3932EUFD is assembled in a 28-lead plastic 4mm × 5mm QFN package with a thermally enhanced ground pad. Proper board layout is essential for maximum thermal performance. See the data sheet section "Layout Considerations".

Design files for this circuit board are available at <http://www.linear.com/demo/DC2286A>

PERFORMANCE SUMMARY Specifications are at $T_A = 25^\circ\text{C}$

PARAMETER	CONDITIONS	MIN	TYP	MAX
Input Voltage EMIVIN Range	Operating I_{LED}	9V		36V
Input Voltage EMIVIN Falling UVLO	Operating $V_{LED} = 6.6V$ $I_{LED} = 1A$		9V	
Input Voltage EMIVIN Rising Turn-On			10V	
Safe Input Voltage EMIVIN Range		0V		36V
Switching Frequency	$R5 = 45.3k$ SSFM = OFF		2MHz	
Switching Frequency	$R5 = 45.3k$ SSFM = ON		2MHz – 2.5MHz	
I_{LED}	$R1 = 0.1\Omega$ $8.0V < EMIVIN < 36V$ $V_{LED} = 6.6V$		1.0A	
V_{LED} range	$R7 = 69.8k$ $R8 = 10.0k$	3.0V		7.0V
Open LED Voltage V_{OUT}	$R7 = 69.8k$ $R8 = 10.0k$, OPEN LOAD		8.0V	
Efficiency (100% PWM DC)	$EMIVIN = 12V$ $V_{LED} = 6.6V$ $I_{LED} = 1.0A$		89%	
Internally-generated PWM dimming range	Operating JP3 = INT JP4 = INT	1/128		
Internally-generated PWM dimming frequency	Operating JP3 = INT JP4 = INT $R12 = 169k$		550Hz	

QUICK START PROCEDURE

Demonstration circuit DC2286A is easy to set up to evaluate the performance of the LT3932. Follow the procedure below:

1. With power off, connect a string of one or two LEDs that will run with forward voltage less than or equal to 7.0V (at 1A) to the LED⁺ and LED⁻ terminals on the PCB as shown in Figure 1.
2. Connect the EN/UVLO terminal to GND.
3. For always-on LED operation: Set JP3 and JP4 to "ON".
4. With power off, connect the input power supply to the EMIVIN and GND terminals. Make sure that the input voltage will not exceed 36V.
5. Turn the input power supply on and make sure the voltage is between 9V and 36V to start operation.
6. Release the EN/UVLO-to-GND connection.
7. Observe the LED string illuminated with the programmed LED current.
8. To change the brightness with analog dimming, simply attach a voltage source to the CTRL terminal and set the voltage between 0V and 1.5V. See data sheet for details.
9. To change brightness with external PWM dimming, set JP3 to EXT and JP4 to EXT/ON. Attach a 3V rectangular waveform with varying duty cycle to the PWM terminal.
10. To change brightness with internally-generated PWM dimming, set JP3 to INT and JP4 to INT. Adjust the setting of the VR1 variable resistor with a small flat-head screwdriver to toggle between 0% and 100% PWM dimming duty cycle in 1/128 steps.
11. To enable spread spectrum frequency modulation, set JP2 to SSFM ON.

ESD Caution

ESD (electrostatic discharge) sensitive device. Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

Legal Terms and Conditions

By using the evaluation board discussed herein (together with any tools, components documentation or support materials, the "Evaluation Board"), you are agreeing to be bound by the terms and conditions set forth below ("Agreement") unless you have purchased the Evaluation Board, in which case the Analog Devices Standard Terms and Conditions of Sale shall govern. Do not use the Evaluation Board until you have read and agreed to the Agreement. Your use of the Evaluation Board shall signify your acceptance of the Agreement. This Agreement is made by and between you ("Customer") and Analog Devices, Inc. ("ADI"), with its principal place of business at One Technology Way, Norwood, MA 02062, USA. Subject to the terms and conditions of the Agreement, ADI hereby grants to Customer a free, limited, personal, temporary, non-exclusive, non-sublicensable, non-transferable license to use the Evaluation Board FOR EVALUATION PURPOSES ONLY. Customer understands and agrees that the Evaluation Board is provided for the sole and exclusive purpose referenced above, and agrees not to use the Evaluation Board for any other purpose. Furthermore, the license granted is expressly made subject to the following additional limitations: Customer shall not (i) rent, lease, display, sell, transfer, assign, sublicense, or distribute the Evaluation Board; and (ii) permit any Third Party to access the Evaluation Board. As used herein, the term "Third Party" includes any entity other than ADI, Customer, their employees, affiliates and in-house consultants. The Evaluation Board is NOT sold to Customer; all rights not expressly granted herein, including ownership of the Evaluation Board, are reserved by ADI. CONFIDENTIALITY. This Agreement and the Evaluation Board shall all be considered the confidential and proprietary information of ADI. Customer may not disclose or transfer any portion of the Evaluation Board to any other party for any reason. Upon discontinuation of use of the Evaluation Board or termination of this Agreement, Customer agrees to promptly return the Evaluation Board to ADI. ADDITIONAL RESTRICTIONS. Customer may not disassemble, decompile or reverse engineer chips on the Evaluation Board. Customer shall inform ADI of any occurred damages or any modifications or alterations it makes to the Evaluation Board, including but not limited to soldering or any other activity that affects the material content of the Evaluation Board. Modifications to the Evaluation Board must comply with applicable law, including but not limited to the RoHS Directive. TERMINATION. ADI may terminate this Agreement at any time upon giving written notice to Customer. Customer agrees to return to ADI the Evaluation Board at that time. LIMITATION OF LIABILITY. THE EVALUATION BOARD PROVIDED HEREUNDER IS PROVIDED "AS IS" AND ADI MAKES NO WARRANTIES OR REPRESENTATIONS OF ANY KIND WITH RESPECT TO IT. ADI SPECIFICALLY DISCLAIMS ANY REPRESENTATIONS, ENDORSEMENTS, GUARANTEES, OR WARRANTIES, EXPRESS OR IMPLIED, RELATED TO THE EVALUATION BOARD INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTY OF MERCHANTABILITY, TITLE, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS. IN NO EVENT WILL ADI AND ITS LICENSORS BE LIABLE FOR ANY INCIDENTAL, SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES RESULTING FROM CUSTOMER'S POSSESSION OR USE OF THE EVALUATION BOARD, INCLUDING BUT NOT LIMITED TO LOST PROFITS, DELAY COSTS, LABOR COSTS OR LOSS OF GOODWILL. ADI'S TOTAL LIABILITY FROM ANY AND ALL CAUSES SHALL BE LIMITED TO THE AMOUNT OF ONE HUNDRED US DOLLARS (\$100.00). EXPORT. Customer agrees that it will not directly or indirectly export the Evaluation Board to another country, and that it will comply with all applicable United States federal laws and regulations relating to exports. GOVERNING LAW. This Agreement shall be governed by and construed in accordance with the substantive laws of the Commonwealth of Massachusetts (excluding conflict of law rules). Any legal action regarding this Agreement will be heard in the state or federal courts having jurisdiction in Suffolk County, Massachusetts, and Customer hereby submits to the personal jurisdiction and venue of such courts. The United Nations Convention on Contracts for the International Sale of Goods shall not apply to this Agreement and is expressly disclaimed.
