- Customer Specific Device Configuration and Activation Services
- Customer Training

Additional services for customers with large implementations, end-to-end solutions or complex network installations.

Choose the level of Digi Technical Services that best aligns with your engineering and business goals.

► **BASE SUPPORT**

This entry level of support is *included* in the purchase of your registered Digi product. It's ideal for smaller-scale projects and independent "do-it-yourself" customers who need only basic assistance. With Base Support, your case gets a response from Digi's experts within 24 business hours.

- **Device Configuration** – We'll help you configure our product to work within your design as intended.
- **Feature/Functionality Inquiries** – Find out how to get the most from your Digi product.
- **Connectivity Support** – We'll get you connected.
- **Firmware Upgrades** – Get patches and feature upgrades.
- **RMA Assistance** – We make repairs easy and straightforward.

► **EXPERT SUPPORT**

When you need priority access to Digi's support team, our Expert Support plan provides more services, expedited responses, and faster resolutions. In addition to all of the services of our Base Support plan, you receive:

- **Telephone Support** – Expert assistance is only a phone call away.
- **Faster Response Time** – We'll respond to your request within four business hours.
- **Priority Case Resolution** – You'll get the answers you need sooner.
- **Configuration Recommendations** – Tap into our experience to optimize your product design.
- **Customer Portal Access** – Use this secure portal to manage open issues and get more answers.
- **Network Troubleshooting** – We'll help you sort through connection issues within your network, including third-party device connections.
- **Solution Troubleshooting*** – We help you navigate through complex technical and performance issues within your manufactured product, end-point device, customer installation, and/or integrated application. We can even help you integrate with third-party devices.
- **Code Support*** – We can help you debug code and scripts and review the performance of your Digi applications.
- **Expedited RMAs** – We make it even easier to return merchandise with expedited queuing for customer-owned repairs.
- **Advanced Replacements** – Can't wait for the RMA process? This option provides "quick spares" for your critical solutions.

**Services subject to a limit of 20 hours per contract year. Additional hours can be purchased separately.*

► **PROFESSIONAL SERVICES**

When you have large implementations, complex end-to-end solutions, or sophisticated networks – or just want the advice of seasoned professionals, Digi Professional Services takes you even further.

- **Application Development** – Our complete software-development services provide custom applications for end-point device monitoring, management, and reporting.
- **Site Surveys** – Map out the signal strength of your environment before installation to avoid costly delays in RF or cellular solution implementation. Our experts provide a site-survey map along with recommendations for your solution design, product placement, antenna placement, and interference filtering/elimination.
- **Implementation Services** – Digi helps design, plan, and optimize your Digi hardware solution – from network design to interoperability with third-party services.
- **Onsite/Online Training Options** – Shorten your development cycle with a customized training to give your team a stronger foundation on Digi products.
