

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

DG200 Series | ITE & Medical Safety

00W/400W Peak

- Built-in active PFC
- UL/CSA/EN 60950-1, 2nd edition (ITE) ANSI/ANMI/CSA/EN 60601-1, 3rd edition (Medical)
- Efficiency: 90% typical
- Operation from -20°C to 65°C convection
- Approved for 2xMOPP applications
- U-Frame (EU) and enclosed (EC) versions available
- 10 year warranty

EU Option

EC Option

Description

The **DG200 (ITE)** and **DG200M (Medical) Series** is a 200 Watt Open Frame power supply that is 3"x 5"x 1.42" providing 9.4 Watts per cubic inch. Each unit has a built in Active Power Factor Correction and the efficiency of the series is typically 90% depending on model. The DG200 is compliant with Green power, Energy Star Level VI and ErP EC 1275/2008. The Series is rated at 200 Watts free air convection cooling and up to 300 Watts with 18CFM forced air. This series is available with an optional "U" frame (EU) or covered metal enclosure (EC).

Notes

1. Output Load:

Convection cooling: 200W; forced-air cooling: 300W max

2. Peak Load Duration:

400W peak rating for durations up to 5 secs. (Duty cycle <10%, avg. power <200W)

3. Engineering Specification:

Contact Tri-Mag for full engineering specification for the specific part number used in your design application.

4. Standby Power Cosumption with System:

This is required by ENERGY STAR in U.S. and ErP regulation in Europe for appliances such as computers and displays. The latest requirement is measured input power to be less than 0.5W with system.

5. Audible Noise:

For the DG200(M)-x energy saving series, achieving Level VI (<0.3W) standby power consumption is accomplished through burst mode operation of the controller. The burst operation frequency is dependent on load conditions and is approx. 114Hz, within the audible frequency range.

6. Step Efficiency and Average Efficiency:

Test conditions in step efficiency are referred to 3.2.2 IPS (Internal Power Supply) of the ENERGY STAR program requirements for computers. ENERGY STAR required for efficiency @ 20%, 50%, 100% load is 84.5%, 89% and 86.5%; average efficiency is the average of step efficiency.

7. Model Ordering Table:

Safety/Application	w/o Audible Noise	Energy Saving		
ITE	DG200-xA (EU) or (EC)	DG200-x (EU) or (EC)		
Medical	DG200M-xA (EU) or (EC)	DG200M-x (EU) or (EC)		

8. Optional chassis enclosure ordering information:

U-Frame (EU): DG-200(M)-x(A)EU Enclosure (EC): DG-200(M)-x(A)EC
