Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

17 Ω, +12 V / ± 5 V / +5 V / +3 V, 8-Ch / Dual 4-Ch High Performance Analog Multiplexers

DESCRIPTION

The DG408LE, DG409LE are monolithic analog multiplexers / demultiplexers designed to operate on single and dual supplies. Single supply voltage ranges from 3 V to 16 V while dual supply operation is recommended with ± 3 V to ± 8 V.

The DG408LE is an 8 channel single-ended analog multiplexer designed to connect one of eight inputs to a common output as determined by a 3 bit binary address (A_0, A_1, A_2). The DG409LE is a dual 4 channel differential analog multiplexer designed to connect one of four differential inputs to a common dual output as determined by its 2 bit binary address (A_0, A_1). Break-before-make switching action to protect against momentary crosstalk between adjacent channels.

An on channel conducts current equally well in both directions. In the off state each channel blocks voltages up to the power supply rails. An enable (EN) function allows the user to reset the multiplexer / demultiplexer to all switches off for stacking several devices. All control inputs, address (Ax) and enable (EN) are TTL compatible over the full specified operating temperature range.

The DG408LE, DG409LE feature low on-resistance, fast switching time, and low leakage. They are ideal for data acquisition, control and automation, test instrument, and healthcare products. The DG408LE, DG409LE has an internal regulator powers the logic circuit. Such design reduces device power consumption and makes them ideal for battery operated applications.

The DG408LE, DG409LE are available in TSSOP16, SOIC16, and QFN16 packages.

FEATURES

- Pin-for-pin compatibility with DG408, DG409, and DG508, DG509
- 3 V to 16 V single supply or ± 3 V to ± 8 V dual supply operation
- Low power consumption: 6 µA/max., EN = Vx = 5 V
- Lower on-resistance: $R_{DS(on)}$ - 17 Ω typ.
- Fast switching: t_{ON} - 55 ns, t_{OFF} - 36 ns
- Break-before-make guaranteed
- Low leakage: $I_{S(OFF)}$ - 1 nA max.
- TTL, CMOS, LV logic (3 V) compatible
- -99 dB off-isolation and -98 dB crosstalk at 100 kHz
- Low parasitic capacitances: $C_{S(OFF)}$ = 5.5 pF, $C_{D(ON)}$ = 35 pF (DG408LE)
- ESD Protection:
  - ± 2.5 kV human body model
  - ± 100 V machine model
- Material categorization: for definitions of compliance please see www.vishay.com/doc?99912

Pb-free Available

RoHS* Available

HALOGEN FREE Available

Note

* This datasheet provides information about parts that are RoHS-compliant and / or parts that are non-RoHS-compliant. For example, parts with lead (Pb) terminations are not RoHS-compliant. Please see the information / tables in this datasheet for details.

BENEFITS

- High accuracy
- Single and dual power rail capacity
- Wide operating voltage range
- Simple logic interface

APPLICATIONS

- Automatic test equipment
- Data acquisition systems
- Meters and instruments
- Medical and healthcare systems
- Communication systems
- Audio and video signal routing
- Relay replacement
- Battery powered systems
- Computer peripherals
- Audio and video signal routing

Note

- For low and high voltage levels for V_{AX} and V_{EN} consult “Digital Control” parameters for specific V+ operation.

ORDERING INFORMATION				
TEMP. RANGE	CONFIGURATION	PACKAGE	PART NUMBER	MIN. ORDER / PACK. QUANTITY
-40 °C to +85 °C Lead-free	8 Channel Single Ended DG408LE	16-pin TSSOP	DG408LEDQ-GE3	Tube 360 units
			DG408LEDQ-T1-GE3	Tape and reel, 3000 units
		16-pin SOIC	DG408LEDY-GE3	Tube 500 units
			DG408LEDY-T1-GE3	Tape and reel, 2500 units
		16-pin QFN (3 mm x 3 mm) Variation 2	DG408LEDN-T1-GE4	Tape and reel, 2500 units
	Dual 4 Channel Differential DG409LE	16-pin TSSOP	DG409LEDQ-GE3	Tube 360 units
			DG409LEDQ-T1-GE3	Tape and reel, 3000 units
		16-pin SOIC	DG409LEDY-GE3	Tube 500 units
			DG409LEDY-T1-GE3	Tape and reel, 2500 units
		16-pin QFN (3 mm x 3 mm) Variation 2	DG409LEDN-T1-GE4	Tape and reel, 2500 units

Note

- -T1 indicates tape and reel, -GE3 indicates lead (Pb)-free and RoHS-compliant, NO -GE3 indicates standard tin/lead finish.
- Exposed pad of QFN package can be connected to GND, V-, or left floating.

ABSOLUTE MAXIMUM RATINGS			
PARAMETER		**LIMIT**	**UNIT**
V+ to V- [e]		18	V
GND to V-		-18	
Digital Inputs [a], V_S, V_D		(V-) - 0.3 to (V) + 0.3	
Current (any terminal)		30	mA
Peak Current, S or D (pulsed at 1 ms, 10 % duty cycle max.)		100	
Storage Temperature	(D suffix)	-65 to +125	°C
Power Dissipation (package) [b]	16-pin plastic TSSOP [c]	600	mW
	16-pin narrow SOIC [c]	600	
	16-pin miniQFN [d]	1385	
ESD Human Body Model (HBM); per ANSI / ESDA / JEDEC® JS-001		2500	V
Latch Up Current, per JESD78D		300	mA

Notes

a. Signals on S_X, D_X, A_X, or EN exceeding V+ or V- will be clamped by internal diodes. Limit forward diode current to maximum current ratings.
b. All leads soldered or welded to PC board.
c. Derate 8 mW/°C above 75 °C.
d. Derate 17.3 mW/°C above 70 °C
e. Also applies when V- = GND

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

Vishay Siliconix maintains worldwide manufacturing capability. Products may be manufactured at one of several qualified locations. Reliability data for Silicon Technology and Package Reliability represent a composite of all qualified locations. For related documents such as package/tape drawings, part marking, and reliability data, see www.vishay.com/ppg?78084.

Notes

(1) All dimensions are in millimeters.
(2) N is the total number of terminals.
(3) Dimension b applies to metallized terminal and is measured between 0.25 and 0.30 mm from terminal tip.
(4) Coplanarity applies to the exposed heat sink slug as well as the terminal.
(5) The pin #1 identifier may be either a mold or marked feature, it must be located within the zone indicated.

Disclaimer

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, “Vishay”), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay’s knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer’s responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer’s technical experts. Product specifications do not expand or otherwise modify Vishay’s terms and conditions of purchase, including but not limited to the warranty expressed therein.

Except as expressly indicated in writing, Vishay products are not designed for use in medical, life-saving, or life-sustaining applications or for any other application in which the failure of the Vishay product could result in personal injury or death. Customers using or selling Vishay products not expressly indicated for use in such applications do so at their own risk. Please contact authorized Vishay personnel to obtain written terms and conditions regarding products designed for such applications.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document or by any conduct of Vishay. Product names and markings noted herein may be trademarks of their respective owners.
