

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Monitoring Relays 1-Phase AC/DC Over Current Types DIA01, PIA01

- AC/DC over current monitoring relay
- Current measured through internal shunt
- Measuring range 0.5 to 5 A AC/DC
- Adjustable current limit on relative scale
- Adjustable hysteresis
- Programmable latching at set level
- Output: 8 A SPDT relay normally de-energized
- For mounting on DIN-rail in accordance with DIN/EN 50 022 (DIA01) or plug-in module (PIA01)
- 22.5 mm Euronorm housing (DIA01) or 36 mm plug-in module (PIA01)
- . LED indication for relay and power supply ON
- Galvanically separated power supply

Product Description

DIA01 and PIA01 are precise AC/DC over current monitoring relays. Direct measuring or through current transformer. Owing to the built-in latch function, the ON-position of the relay output can be

maintained.

The red LED indicates the relay status. Through the built-in shunt it is possible to monitor loads up to 5 A AC/DC.

Mode of Operation

DIA01 and PIA01 monitor both AC and DC over current through an internal shunt. They can monitor AC currents up to 6000 A when connected to a suitable current transformer.

Example 1

(connection between terminals Z1, Y1 or 8, 9 - latch function enabled)

The relay operates and latches in operating position when the measured value exceeds the set level. Provided that the current has dropped min. 4% below the set point (see hysteresis) the relay releases when the inter-

connection between terminals Z1, Y1 or 8, 9 is interrupted or the power supply is interrupted as well.

Example 2 (Stardard CT)

(no connection between terminals Z1, Y1 or 8, 9 - latch function disabled)

The relay operates when the current flowing through the transformer exceeds the set level. It releases when the current drops min. 4% below the set level (see hysteresis) or when the power supply is interrupted.

Range Setting

Centre knob:

Setting of current on relative scale: from 10 to 110% of the full-scale value.

Hysteresis:

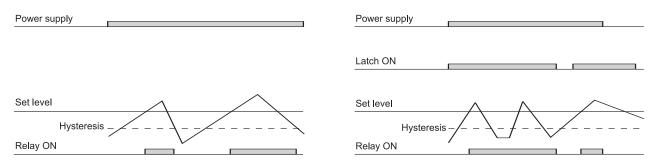

Approx. 4% of set value, it can be extended by inserting a resistor between terminals Z1, Y1 or 8, 9.

Approx. resistor values:

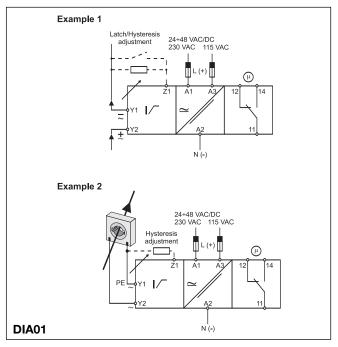

10%: 180 kΩ 25%: 47 kΩ 50%: 22 kΩ 75%: 15 kΩLatch: < 500 Ω
