Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation, and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## DIL Series Reed Relays

> Features Compatible with 14 pin DIL socket, High resistance coil up to 11 kOhm available
> Available with Dielectric Strength 4.25kVDC, Diode, Magnetic Shield \& Others
> Markets: General purposes, Telecommunications, Test and Measurement \& Others

## Handling \& Assembly Instructions

> Switching inductive and/or capacitive loads create voltage and/or current peaks, which may damage the relay.
Protective circuits need to be used.
> External magnetic fields needs to be taken into consideration, including a too high packing density. This may influence the relays' electrical characteristics.
> Mechanical shock impacts e.g. dropping the relays may cause immediate or post-installation failure.
$>$ Wave soldering: maximum $260^{\circ} / 5$ seconds.
> Reflow soldering: Recommendations given by the soldering paste manufacturer need to be considered as well as the temperature limits of other components/processes.
