

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

DM200

Depth gauging system

- **Portable system**
- **Depth gauging for water boreholes**
- **Visual and acoustic signal when in water**
- **200 metre cable with length marking printed every 10cm.**
- **Water sensing with conductive probe**

Standard Parts	Max depth	Mark intervals	Cable type
DM200	200 metres	10 cm	PVC sheathed 2 core

This is a simple but effective portable gauging system for determining the level of water in boreholes up to a maximum depth of 200 metres.

The probe is lowered down the hole, by unwinding the cable reel, until such time as the signal is activated on the reel. The depth can then be read off the cable, which is marked with the length at 10 cm intervals.

This requires no external power source, as it is powered by an internal battery.
