Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation, and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## Description

The DRS-50 Reed Switch is a standard, normally open switch with a 50.80 mm long $\times 5.25 \mathrm{~mm}$ diameter ( $2.000^{\prime \prime} \times .207^{\prime \prime}$ ) glass envelope, capable of high voltage and power switching up to 400 Vdc at 2 mA . Will carry 6 A and switch up to 100W/VA. It has high insulation resistance of $10^{10}$ ohms minimum and contact resistance of less than 100 milli-ohms.

## Features

- Normally open switch
- Capable of switching 400 Vdc or 3.0A at up to 100 W
- Minimum voltage breakdown 600 Vdc

## Benefits

- Hermetically sealed switch contacts are not affected by and have no effect on their external environment
- Available sensitivity range 42-83 AT

## Applications

- Security
- Industrial applications
- Limit switching
- White Goods

Notes:

1. Contact rating - Product of the switching voltage and current should never exceed the wattage rating. Contact Littelfuse for additional load/life information.
2. When switching inductive and/or capacitive loads, the effects of transient voltages and/or currents should be considered. Refer to Application Notes AN108A and AN107 for details.
3. Electrical Load Life Expectancy - Contact Littelfuse with voltage, current values along with type of load.
4. Breakdown Voltage - per MIL-STD-202, Method 301.
5. Storage Temperature - Long time exposure at elevated temperature may degrade solderability of the leads

## Notes:

1. Operate (including bounce)/Release Time - per EIA/NARM RS-421-A,diode suppressed coil (Coil IV).
2. Shock and Vibration - per EIA/NARM RS-421-A and MIL-STD-202.
3. Pull-In Range - Contact Littelfuse for narrower AT ranges available.
4. Rating Sensitivity - The value at which contact ratings and operating characteristics are determined. Derating may be required below this value.
5. Custom modifications of forming and/or cutting of reed switches are available. Please contact Littelfuse.
