MONITOR AND ALARM FOR WIFI-WLAN SENSORS

EA WLAN-ALARM

GENERAL

The EA WLAN-ALARM-Alert is a standalone monitoring system for all the sensors in the EA WLAN-xxx range. The Alert will pick up alarm messages from any EA WLAN-xxx sensor within WiFi range. It displays Red LED lights (through a Red translucent rear moulding) and sounds when a sensor alarm has been triggered (there are nine standard sounds to choose from). Alarm messages are streamed wirelessly over any WiFi network and can be viewed on a PC using free software package or on the EA WLAN-Cloud.

The EA WLAN-ALARM-Alert has been designed to be continuously powered via the mains however it does contain a rechargeable lithium polymer battery for device positioning and limited power during the event of a mains failure.

The software installed on the PC will allow set-up, sensor association and alarm data review. This software is available to download for free from www.lcd-module.de.

The EA WLAN-ALARM-Alert can be attached to a wall or vertical surface using bracket and screws or sticky pad provided.
