

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Common mode filter with ESD protection for USB 2.0 and MIPI D-PHY/MDDI interface

Datasheet - production data

Applications

- Mobile phones
- Notebook, laptop
- Portable devices
- PND

Description

The device is a highly integrated common mode filter designed to suppress EMI/RFI common mode noise on high speed differential serial buses like MIPI D-PHY, MDDI or USB 2.0.

Also it can protect and filter one differential lane.

Features

- High common mode attenuation:
 - -34 dB at 900 MHz
 - -20 dB between 800 MHz and 2.2 GHz
- Large bandwidth: 1.7 GHz
- Very low PCB space consumption
- Thin package: 0.55 mm max.
- RoHS package
- High reduction of parasitic elements through integration

Complies with the following standards

- IEC 61000-4-2 (exceeds level 4)
 - ±15 kV (air discharge)
 - ±8 kV (contact discharge)

Figure 1: Pin configuration

1 Characteristics

Table 1: Absolute maximum ratings (T_{amb} = 25 °C)

Symbol	Parameter		Value	Unit
V _{PP}	Peak pulse voltage	IEC 61000-4-2: Contact discharge Air discharge	8 20	kV
I _{DC}	Maximum DC current		200	mA
T _j	Maximum junction temperature range		-55 to +125	°C
T _{stg}	Storage temperature range		-55 to +150	
T _L	Maximum temperature for soldering during 10 s		260	

Figure 2: Electrical characteristics (definitions)

Table 2: Electrical characteristics (T_{amb} = 25 °C)

Symbol	Test condition	Min.	Typ.	Max.	Unit
V _{BR}	I _R = 1 mA	6			V
I _{RM}	V _{RM} = 1.5 V per line			100	nA
R _{DC}	DC serial resistance		1.8	2.5	Ω

Compliant with USB 2.0 high speed sync field test (150 mV diff).

3 Package information

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK® packages, depending on their level of environmental compliance. ECOPACK® specifications, grade definitions and product status are available at: www.st.com. ECOPACK® is an ST trademark.

4 Recommendation on PCB assembly

4.1 Stencil opening design

1. General recommendation on stencil opening design
 - a. Stencil opening dimensions: L (Length), W (Width), T (Thickness).
2. General design rule
 - a. Stencil thickness (T) = 75 ~ 125 μm
 - b. Aspect ratio = $\frac{W}{T} \geq 1.5$
 - c. Aspect area = $\frac{L \times W}{2T(L+W)} \geq 0.66$
3. Reference design
 - a. Stencil opening thickness: 100 μm
 - b. Stencil opening for leads: Opening to footprint ratio is 90%.

Figure 24: Recommended stencil window position

Figure 25: Recommended stencil window position

4.2 Solder paste

1. Halide-free flux qualification ROL0 according to ANSI/J-STD-004.
2. "No clean" solder paste is recommended.
3. Offers a high tack force to resist component movement during high speed.
4. Solder paste with fine particles: powder particle size is 20-45 μm .

4.3 Placement

1. Manual positioning is not recommended.
2. It is recommended to use the lead recognition capabilities of the placement system, not the outline centering
3. Standard tolerance of ± 0.05 mm is recommended.
4. 3.5 N placement force is recommended. Too much placement force can lead to squeezed out solder paste and cause solder joints to short. Too low placement force can lead to insufficient contact between package and solder paste that could cause open solder joints or badly centered packages.
5. To improve the package placement accuracy, a bottom side optical control should be performed with a high resolution tool.
6. For assembly, a perfect supporting of the PCB (all the more on flexible PCB) is recommended during solder paste printing, pick and place and reflow soldering by using optimized tools.

4.4 PCB design preference

1. To control the solder paste amount, the closed via is recommended instead of open vias.
2. The position of tracks and open vias in the solder area should be well balanced. A symmetrical layout is recommended, to avoid any tilt phenomena caused by asymmetrical solder paste due to solder flow away.

4.5 Layout recommendation

Connection to PCB GND must be as short as possible to ensure ESD remaining voltage and S_{CC21} performance.

Figure 26: Layout recommendation

4.6 Reflow profile

Figure 27: ST ECOPACK® recommended soldering reflow profile for PCB mounting

Minimize air convection currents in the reflow oven to avoid component movement. Maximum soldering profile corresponds to the latest IPC/JEDEC J-STD-020.

5 Ordering information

Figure 28: Ordering information scheme

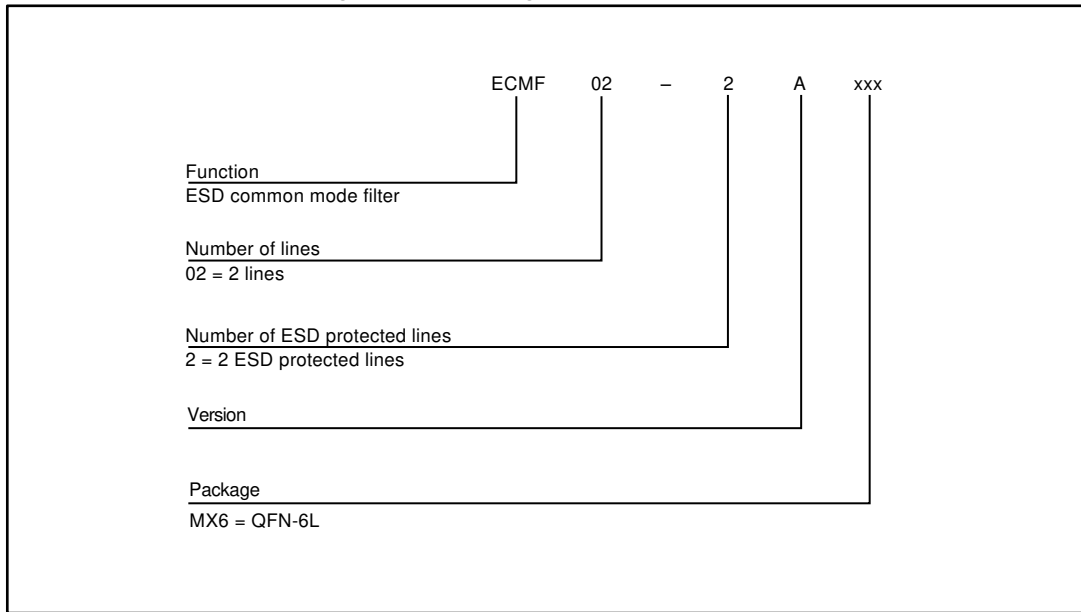

Table 5: Ordering information

Order code	Marking	Package	Weight	Base qty.	Delivery mode
ECMF02-2AMX6	KD ⁽¹⁾	QFN-6L	3.35 mg	3000	Tape and reel 7"

Notes:

⁽¹⁾The marking can be rotated by 90° to differentiate assembly location

6 Revision history

Table 6: Document revision history

Date	Revision	Changes
10-Aug-2010	1	Initial release.
28-Jun-2011	2	Added <i>Complies with the following standards:</i> , and Air discharge parameter in <i>Table 1</i> . Removed Figure 6. Sdd41 / Sdd23 inter-lane differential cross-coupling measurements.
01-Mar-2017	3	Updated marking in <i>Figure 17</i> and <i>Figure 18</i> and inserted <i>Figure 9</i> . Removed Figure 11 and Figure 14. Updated cover page, <i>Section 3.1: "QFN-6L package information"</i> , <i>Section 1: "Characteristics"</i> and <i>Table 5: "Ordering information"</i> .
