

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

■ Dimensions

(Unit: mm)

■ Features

- Ultra-compact model.
- PCB surface mounting type.

■ Absolute Maximum Ratings (Ta=25°C)

Item	Symbol	Rated value	Unit
Emitter	Forward current	IF	50 ¹ mA
	Reverse voltage	VR	6 V
Detector	Collector-Emitter voltage	VCEO	35 V
	Emitter-Collector voltage	VECO	6 V
	Collector current	IC	20 mA
	Collector dissipation	PC	75 ¹ mW
Total allowable loss	Ptot	100 ¹ mW	
Operating temperature	Topr	-25 to 85	°C
Storage temperature	Tstg	-40 to 100	°C
Soldering temperature	Tsol	260 ²	°C

- *1. Refer to the temperature rating chart if the ambient temperature exceeds 25°C.
 *2. Complete soldering within 5 seconds.
 For reflow soldering, use the conditions given on page 4.

■ Electrical and Optical Characteristics (Ta=25°C)

Item	Symbol	Value			Unit	Condition	
		MIN.	TYP.	MAX.			
Emitter	Forward current	V _F	---	1.2	1.4	V	I _F = 20mA
	Reverse voltage	I _R	---	---	10	μA	VR = 6V
	Peak emission wavelength	λ _P	---	950	---	nm	---
Detector	Light current	I _L	40	85	130	μA	I _F = 4 mA, V _{CE} = 2V, Aluminum-deposited surface, d = 1 mm*
	Dark current	I _D	---	1	100	nA	V _{CE} = 20V, 0/x
	Leakage current	I _{LEAK}	---	---	500	nA	I _F = 4mA, V _{CE} = 2V, with no reflection
	Collector-Emitter saturated voltage	V _{CE} (sat)	---	---	---	V	---
	Peak spectral sensitivity wavelength	λ _P	---	930	---	nm	---
Rising time	t _r	---	20	100	μA	V _{CC} = 2 V, R _L = 1 kΩ, I _L = 100 μA, d = 1 mm*	
Falling time	t _f	---	20	100	μA	V _{CC} = 2 V, R _L = 1 kΩ, I _L = 100 μA, d = 1 mm*	

* Refer to Fig 12. Light Current Measurement Setup Diagram on page 2.

EE-SY199

■ Tape and Reel

● Reel Dimension (Unit: mm)

● Tape Dimension (Unit: mm)

● Part Mounting Direction

- The devices are oriented in the rectangular holes in the carrier tape so that the edge with the LED faces the round feeding holes.

● Tape Quantity

2,000 pcs./reel

● Packing Specifications

- One reel is sealed in an aluminum-laminated bag.
- The model number, lot number, and quantity are given on the label.

■ Precautions

● Temperature Profile

The reflow soldering must be completed in one time and must comply with the following diagram.

● Solder Quantity

The pin's wiring pattern between the package and the board must not be soldered. Doing so would result in damage to the product's reliability. Make sure to adjust the solder quantity to the product sidewall of the terminal.

● Other Precautions

- The use of an infrared lamp causes the temperature of the resin to rise partially too high.
- Do not immerse the resin part into the solder.
- Test the soldering method under actual conditions and make sure the soldering works fine, since the impact on the junction between the device and PCB varies depending on the cooling and soldering conditions.

■ Storage and Handling after Opening

● Storage Conditions

Store the product under the following conditions:

Temperature: 5 to 30°C

Humidity: 70% max.

● Treatment after Opening

After opening the bag, store the products between 5 and 25°C at 60% humidity or lower and mount them within two days.

If storage for longer than two days after opening the bag is required, use a dry box or reseal the products in a moisture-proof bag with a commercially available desiccant. Store them between 5 and 30°C at 70% humidity or lower, and mount them within two weeks.

● Baking before Mounting

If the above treatment could not be carried out, mounting is still possible after baking treatment. However, baking treatment must be limited to only one time.

Recommended conditions: 125°C, 16 to 24 hours

Note: Do not bake the products while they are still in the bag. Temporarily mount them to the PCB or place them in metal trays.

● Cleaning Conditions

Cleaning in Solvent:

Solvent temperature: 45°C max.

Immersion time: 3 hours max.

Ultrasonic Cleaning:

Do not use ultrasonic cleaning.

Recommended Solvents:

Ethyl alcohol, methyl alcohol, or isopropyl alcohol
