imall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

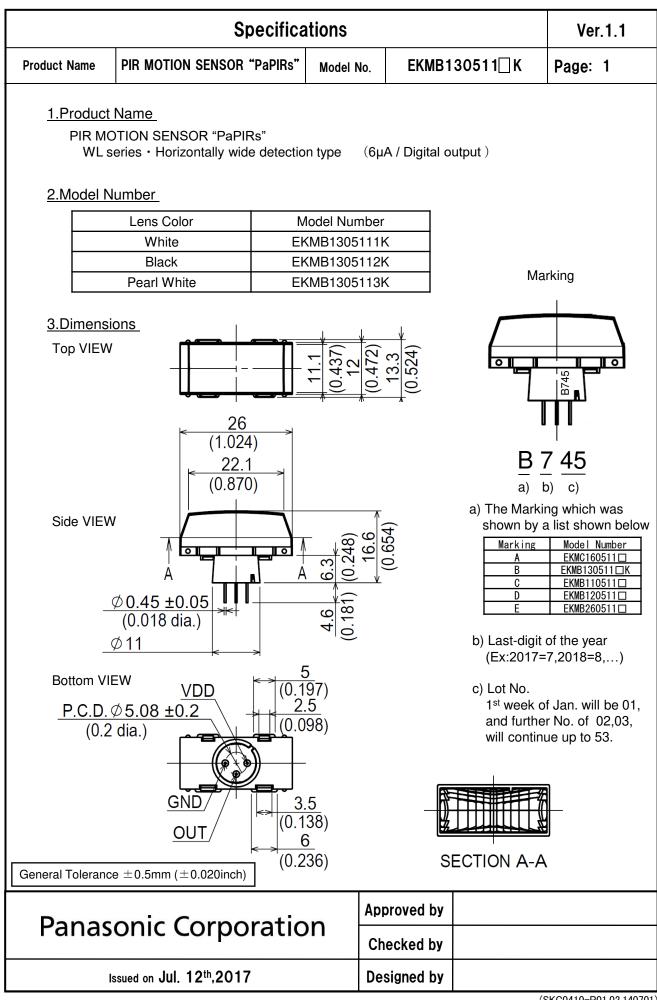

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

	Ver.1.1			
Product Name	PIR MOTION SENSOR "PaPIRs"	Model No.	EKMB130511⊡K	Page: 2

4.Characteristics

4-1 Detection Performance (Detection Area A) Conditions for measuring: Ambient temperature=25°C(77° F) Operating voltage=3VDC

	Temperature difference	Value	Conditions concerning the target
(Note1)			1.Movement speed: 1.0m/s
Detection Range	4°C(7.2°F)	Max 5m	2.Target concept is human body (Object size:Around 700 × 250mm)

Note1:Depending on the temperature difference between the target and the surroundings, detection range will change.

		Value	Notes
	Horizontal	122 $^{\circ}$ (\pm 61 $^{\circ}$)	
Detection Area	Vertical	35° $\begin{pmatrix} +10^{\circ} \\ -25^{\circ} \end{pmatrix}$	Refer to the section 4-6.
	Detection zones	88	

4-2 Detection Performance (Detection Area B) Conditions for measuring: Ambient temperature=25°C(77° F) Operating voltage=3VDC

	Temperature difference	Value	Conditions concerning the target
^(Note1) Detection Range	8°C(14.4° F)	Max 5m	1.Movement speed: 1.0m/s 2.Target concept is human body (Object size:Around 700 × 250mm)

Note1:Depending on the temperature difference between the target and the surroundings, detection range will change.

		Value	Notes
	Horizontal	150° ($\pm75^\circ$)	
Detection Area	Vertical	20° ($\pm10^\circ$)	Refer to the section 4-6. (Ditection Area A is not included.)
	Detection zones	16

Product Name	PIR MOTION SENSOR "PaPIRs"	Model No.	EKMB130511∐K	Page: 3

4-3 Maximum Rated Values

	Value	Unit
Power Supply Voltage	-0.3~4.5	VDC
Usable Ambient Temperature	-20∼+60°C (-4∼+140° F) Do not use in a freezing or condensation environment	
Storage Temperature	-20∼+70°C (-4∼+158° F)	

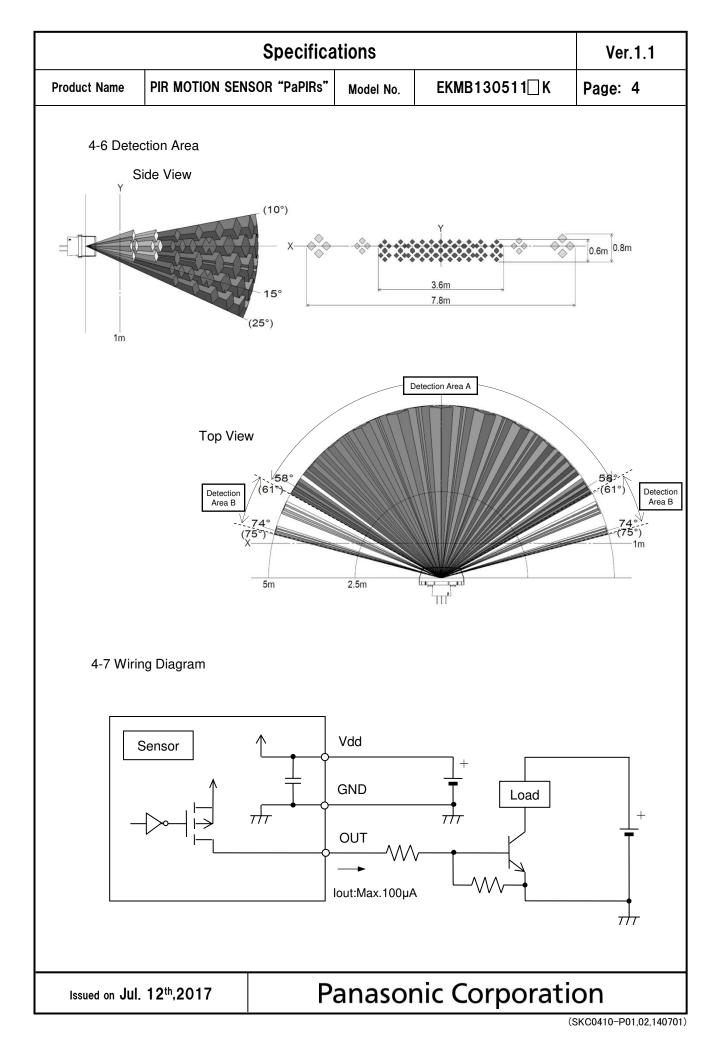

4-4 Electrical Characteristics

Conditions for Measuring: Ambient temperature=25°C(77° F)

	Symbol	Min	Avg.	Max	Unit	Special mention
Operating Voltage	Vdd	2.3	_	4.0	VDC	—
Electrical Current Consumption	lw	—	6	12	μA	lout=0
Output Current	lout	_	_	100	μA	Vout≧Vdd-0.5
Output Voltage	Vout	Vdd-0.5	_	_	VDC	—
Circuit Stability Time (when voltage is applied)	Twu	_	_	10	S	This is when temperature of the sensor is stable

4-5 Timing Chart

Specifications				
Product Name	PIR MOTION SENSOR "PaPIRs"	Model No.	EKMB130511∐K	Page: 5

5. Safety Precautions

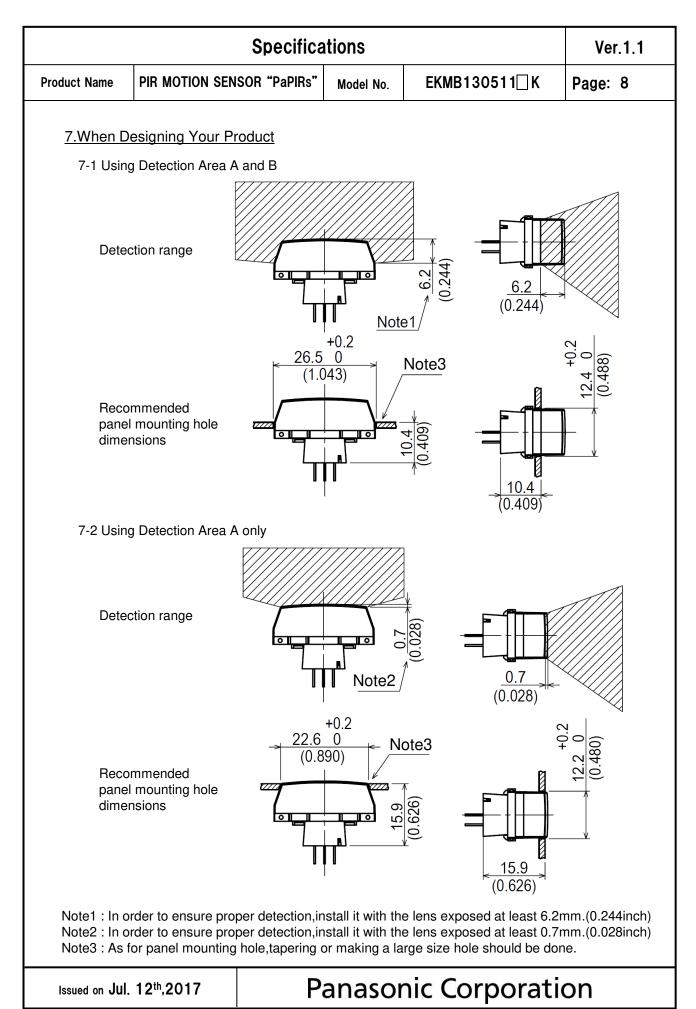

Head the following precautions to prevent injury or accidents.

- Do not use these sensors under any circumstance in which the range of their ratings, environment conditions or other specifications are exceeded. Using the sensors in any way which causes their specifications to be exceeded may generate abnormally high levels of heat, emit smoke, etc., resulting in damage to the circuitry and possibly causing an accident.
- 2) Our company is committed to making products of the highest quality and reliability. Nevertheless, all electrical components are subject to natural deterioration, and durability of a product will depend on the operating environment and conditions of use. Continued use after such deterioration could lead to overheating, smoke or fire. Always use the product in conjunction with proper fire-prevention, safety and maintenance measures to avoid accidents, reduction in product life expectancy or break-down.
- Before connecting, check the pin layout by referring to the connector wiring diagram, specifications diagram, etc., to verify that the connector is connected properly. Mistakes made in connection may cause unforeseen problems in operation, generate abnormally high levels of heat, emit smoke, etc., resulting in damage to the circuitry.
- 4) Do not use any motion sensor which has been disassembled or remodeled.
- 5) Failure modes of sensors include short-circuiting, open-circuiting and temperature rises. If this sensor is to be used in equipment where safety is a prime consideration, examine the possible effects of these failures on the equipment concerned, and ensure safety by providing protection circuits or protection devices. Example :
 - Safety equipments and devices
- Traffic signals
- Burglar and disaster prevention

	trictly follow the "Safety Precaution unctioning cannot be expected if us above.						
We are d	leeply committed to providing the h	nighest quality	control for this product.				

 For issues not addressed above, we invite you to share your suggestions, or details about your company's usage conditions, installation, specifications, needs of end use

or details about your company's usage conditions, installation, specifications, needs of end users, and applications for this sensor.

- 2) To reduce the risk of harm caused by product failure to human life or assets, this product should always be used in conjunction with other safety measures, such as protective circuitry, double layered circuit boards, etc., and used within the guaranteed performance, efficiency or special characteristics values stated in the specification sheet.
- 3) This product is warranted for a period of one year, from date of delivery, applicable only if the product is used in accordance with the precautions mentioned above and the specifications sheet. We will replace or repair at the delivery location any malfunctioning or defective part or entire product if such defect or malfunction is caused by us.

However, the above warranty shall be void in the following circumstances:

- a) Damage caused to something else than the product itself.
- b) Damage or loss resulting during transportation, storage or handling after the date of supply.
- c) Phenomenon unforeseeable in the state of the technology as of the supply date.
- d) Damage caused by natural or unnatural events such as fire, earthquake, flood, or conflicts beyond our control.

Nevertheless:
