Resilient 3000

EP3000AC48IN Rectifier
3000W Output at 48-58Vdc

Product Description

The Resilient 3000 is a high Efficiency, single phase, general purpose and ruggedized fan-cooled rectifier for stand- alone use. The power supply is optimized for harsh conditions with ability to operate at temperature extremes and it is conformal coated for protection against dust and high humidity. And it is specifically designed for ease of use. The constant output power (3000W i.e. 55.5A at 54V) characteristic supplies the specified power over the full output voltage range (48 to 58Vdc).

There is a digital communication (RS-485 bus) between rectifier and controller which allows flexible system design.

Key Features

- High Efficiency ≥ 95%
- RoHS compliant
- Wide operating temperature range
- Wide selectable output voltage range
- Ruggedized rectifier features
- RS-485 communication
- +5V auxiliary output
- Compact size and light weight
- High MTBF design
- Easy connectivity

Highly rugged rectifier

Exclusively designed to take care of wide line fluctuations and extreme climatic conditions found in industrial applications.

- Can withstand up to 500Vac (Line-Neutral) continuously without any damage (for battery floated application)
- Can withstand 96 hrs of salt spray test (as per ASTM B117), Special protective coating on the PCBs and superior plating on the metal parts
- Operation up to +70°C

Optimum power performance

Constant power between 176V ... 300V ac, linearly de-rated power between 175V ... 90V ac. Designed for very high MTBF for ready reliable service.

Simple Ease of Use

Convenient 2 piece connectors allow rapid yet confident connection of AC and DC connections. Simple wire and go connectivity assure rapid deployment and servicing.

Applications

The typical applications for this rectifier are both in indoor and outdoor environments and include:

- General Purpose 48V Power
- Industrial System Applications
- Remote Site Power

DC and Signal TB wire connection instruction

Whether it's a push-in spring or a leg spring, the spring principle makes for quick, tool-free conductor connection. Simply insert the solid conductors and conductors with ferrules into the push-in terminal point and release using a screwdriver. When connecting and releasing finely stranded conductors without ferrules, the terminal point can also be opened using a screwdriver.

AC wire connection instruction

Cable routing and actuation of the terminal block screw on one level – front screw connection for narrow device fronts and PCB racks. The conductor is reliably clamped by the force-increasing swiveling movement of the angled pressure plate.
