

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Description

The electronic power relay EPR10 is a solid state relay for high continuous currents. It is suitable for use in utility vehicles and special vehicles where reliability and functional safety are at a premium. At DC 24 V, the EPR10 allows a continuous load of up to 200 A.

The EPR10 is available in two different versions: EPR10-N is a relay and has no protective function. Two performance classes are available (up to 100 A and up to 200 A). EPR10-P is a protective relay and monitors both the load current and the thermal load. In the event of a critical condition, the device will automatically interrupt the circuit and will issue a group fault signal.

Note: We are preparing a separate version for applications where the current can flow in both directions. The present EPR10 design only allows one current direction.

Applications

Powerful loads in DC 12 V and DC 24 V on-board electrical systems, which have to be supplied continuously with currents from 75 A to 200 A and which have to be switched frequently:

- Pumps
- Ventilations
- Cooling systems

Benefits

- 80 % less space requirement than similar conventional solid state relays:
 - no heat sink required
 - low internal resistance through parallel connection of power semi-conductors
 - technically mature heat management
 - cooling through connecting cables
- Low investment costs:
 - blade fuses in sub-paths and heat sinks superfluous because the EPR protects against overcurrent and short circuit
- Minimised maintenance costs:
 - enhanced availability due to a much longer life span compared to mechanical relays
 - very high resistance against dust, humidity, vibration and shock due to the sealed electronic circuitry
- Less CO₂ emission:
 - due to low internal resistance
 - due to minor holding power
- Flexible design:
 - the device switches without a sound and can therefore be installed in the passenger cabin without being noticed.

Approvals

EPR10

Technical data (25 °C)

Load circuit		
System voltage	12 V DC / 24 V DC	
Max. continuous current	EPR10-N (relay version without protective function) 100 A or 200 A (please also see derating information)	
Current rating range	EPR10-P (with protective function) 75 A, 100 A, 125 A, 150 A, 175 A, 200 A	
Max. overvoltage	36 V DC	
Max. switch-off current	Resistive loads (L/R < 0,3 ms)	Inductive loads Last (L/R < 2 ms)
EPR10-N - 100 A	700 A	100 A
EPR10-N - 200 A	1400 A	200 A
EPR10-P - 75 A	375 A	75 A
EPR10-P - 100 A	500 A	100 A
EPR10-P - 125 A	625 A	125 A
EPR10-P - 150 A	750 A	150 A
EPR10-P - 175 A	875 A	175 A
EPR10-P - 200 A	1000 A	200 A
Voltage drop	85 mV	
Max. switching frequency	1 Hz	
Reverse polarity protection	without Note: Observation of correct polarity when connecting the device is imperative to avoid damage of the relay.	
Load output	HSS	
Leakage current	< 10 µA	
Control circuit		
Connector	Tyco HDSCS 3-pole part number 1-1418448-1 Pin assignment: 1 = GND (chassis) 2 = SF (output group fault) 3 = IN (control input)	
Control voltage	ON 6 ... 32 V DC OFF: 0 ... 3 V DC	
Max. overvoltage	36 V DC	
Control current	at 12 V DC 2.5 mA at 24 V DC 4 mA at < 3 V DC < 10 µA	
Rising edge	< 5 ms	
Signal outputs		
Reverse polarity protection	without	
Switch type	"low side switch"	

Technical data (25 °C)

Voltage	0 ... 32 V DC
Max. leakage current	20 µA
Max. load current	2 A

General

Typical life	> 1,000,000 cycles
Trip current	only EPR10-P (with protective function) 1.3 times rated current ± 15 %
Trip time	only EPR10-P (with protective function) selectable between 0.2 / 0.5 / 0.7 s ± 15 %
Excess temperature	only EPR10-P (with protective function); circuit will be disconnected with excess temperature; (reset after 500 ms OFF condition)
Temperature range	-40...+85 °C in operation -55...+90 °C for storage

Degree of protection	IP57
Vibration	> 6 g
Chemical resistance	oil, grease, alcohol, urea, extinguishing agents, battery acid, salt mist, detergents, humidity

Enclosure and mounting

Material of enclosure	moulded, V0 flammability rating	
Terminals	tin-plated copper	
Terminal studs	stainless steel	
Max. tightening torque	15 Nm (for M8 studs)	
Dimensions	163 mm x 73 mm x 35 mm	
Mass	≤ 250 g	
Recommended cross sections	current ratings [A]	cable cross section [mm ²]
	75	25
	100	35
	125	50
	150	50
	175	70
	200	95

Tests

Chemical resistance	ISO 16750-5; 2010 (interior, under the hood, exterior)
Vibration resistance	ISO 16750-3: 2012 (test VIII)
Mechanical Shock	ISO 16750-3: 2012 (Test for devices on rigid points on the body and on the frame)
Corrosion resistance	ISO 16750-4; 2010 (5.5.1 severity level 4)
Humidity	ISO 16750-4 2010 (5.6.2.3)
Temperature change	ISO 16750-4; 2010 (5.3.1)
Elektromagnetic	Regulation no. 10 of the United Nations Economic Commission Compatibility (EMC) for Europe (UN/ECE) – Harmonisation of vehicle regulations regard- ing electromagnetic compatibility EN 61000-6-2: 2005 EN 61000-6-3: 2007
Electrostatic Discharge (ESD)	EN 61000-6-2: 2005 EN 61000-6-3: 2007
Humidity	ISO 16750-4; 2010
Temperature shock	ISO 16750-4; 2010 (Ice water shock test; submersion test)
Free fall	ISO 16750-3; 2012
Degree of protection	IP57 (except terminals of load circuit)
Material	moulded enclosure including epoxy with flammability rating VO UL 94: 1996

Time/current characteristic (T_{amb} = 25 °C)

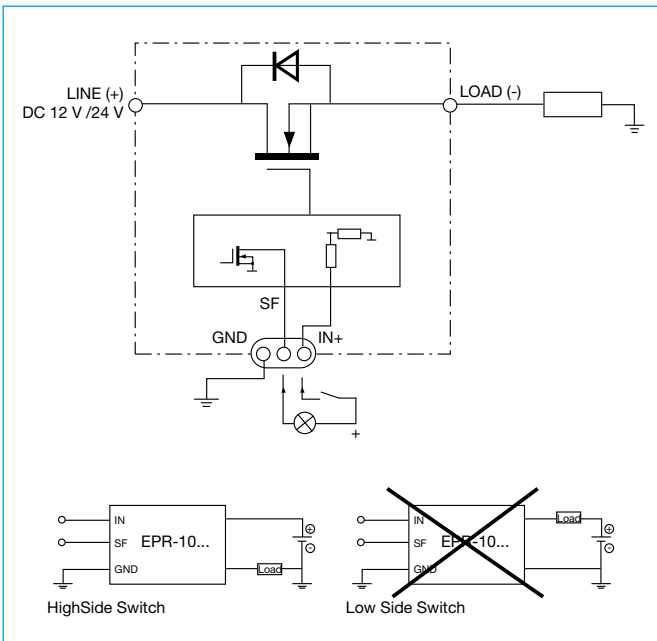

Order numbering code

Type No.	EPR10
Electronic Power Relay	
Protective function	
N0	without protection
P2	overcurrent trip at 1.3 x I _n after 200 ms
P5	overcurrent trip at 1.3 x I _n after 500 ms
P7	overcurrent trip at 1.3 x I _n after 700 ms
Design	
F1	flat design
Terminals / control cable	
G1	M8 terminal studs / Tyco connectors (HDSCS) with 2 M8 nuts
G2	M8 terminal studs / Tyco connectors (HDSCS) without M8 nuts
Load and control	
HS	HSS
Version	
S0	standard
System voltage	
D2	DC 12 V / 24 V

Dimensions

All dimensions without tolerances are for reference only. E-T-A reserves the right change specifications at any time in the interest of improved design, performance and cost effectiveness, the right to make changes in these specifications without notice is reserved. Product markings may not be exactly as the ordering codes. Errors and omissions excepted.
