

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

# EX-Z SERIES

Ultra-minute Photoelectric Sensor **Amplifier Built-in**

## The World's Smallest\* Size

\* Among photoelectric sensors with built-in amplifier, as of June 2015 (survey by our company)

### Unit volume ratio reduced by about 50%\*

\* As compared to EX-10 series

The world's thinnest\* sensor dimension of 3 mm **0.118 in** has been achieved by utilizing new semiconductor packaging technology that does not use wire bonding. The small unit size allows installation of sensors in a narrow space where only a conventional fiber sensor head could be installed before. The built-in amplifier also saves on installation space.

## Small-object sensing capability

Capable of sensing an extremely small ø0.3 mm **ø0.012 in** object without slit **EX-Z11□**

A slit is provided on the front side of the main sensor body. The sensor can detect a ø0.3 mm **ø0.012 in** object (the smallest-object sensing capability in the industry\*) without using an optional slit.

\* Among photoelectric sensors with built-in amplifier, as of June 2015 (survey by our company)

Capability to sense a small ø1.0 mm **ø0.039 in** object over long distance **EX-Z13□**

The high-brightness 4-element red LED provides strong light emission stably over a long period of time. In spite of the extremely small size, both front sensing and side sensing units can sense a small ø1.0 mm **ø0.039 in** object from a long distance of 500 mm **19.685 in**. Since the spotlight is clearly visible, the sensing position can be easily confirmed.

## A wide range of applications

### Inflection resistant cable type available for all models

Inflection resistant cable type with improved flex resistance is available for all models. Select the model suitable for your specific application. The standard type comes with lead wires with the same diameter as previous models, but the outside diameter of the cable is 2.0 mm **0.079 in** and thinner than the cables of the **EX-10** series. This facilitates cable routing.

### IP67 protective structure

The sensors features an IP67 protective structure to allow their use in process lines where water is used or splashed.

Rust-resistant stainless steel sensor mounting brackets and screws are available.

Note: If water splashes on the sensor during sensing operation, it may sense water as an object.

## Options

### A variety of mounting brackets are available!

A spacer for mounting at the back (1 type) for through-wall sensing and sensor mounting brackets (3 types) are available to meet a diversity of sensor installation needs.

Spacer for mounting at the back (for front sensing type only)

Operation indicator (orange) can be checked from the rear side.

Through-wall detection

## Examples of applications

Detection of parts in parts feeder

Detection of presence / absence of test tube tray

Detection of LED lead

**PRECAUTIONS FOR PROPER USE**

- Never use this product as a sensing device for personnel protection.
- In case of using sensing devices for personnel protection, use products which meet laws and standards, such as OSHA, ANSI or IEC etc., for personnel protection applicable in each region or country.

**Mounting**

- In case of mounting on tapped holes (Unit: mm in)

**Side sensing****Front sensing**

- In case of using attached screws and nuts (Unit: mm in)

**Side sensing****Front sensing**

The tightening torque should be 0.2 N·m or less.

The tightening torque should be 0.2 N·m or less.

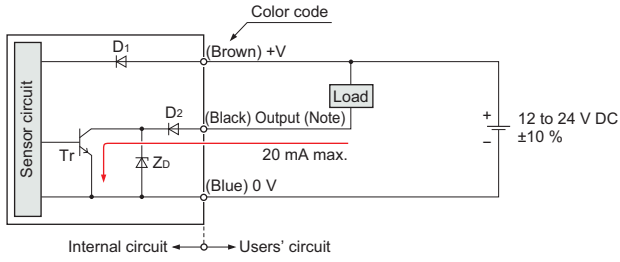

**Other**

- Do not use during the initial transient time (0.5 sec. approx.) after the power supply is switched on.
