imall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Vishay Roederstein

Interference Suppression Film Capacitor - Class X2 Radial MKP 310 V_{AC} - Standard Across the Line

FEATURES

- 7.5 mm to 27.5 mm lead pitch
- Self-healing properties
- For temperature up to 110 °C
- Material categorization: for definitions of compliance please see <u>www.vishay.com/doc?99912</u>

APPLICATIONS

For standard across the line X2 applications. See also application note: <u>www.vishay.com/doc?28153</u>

| QUICK REFERENCE DATA | | | | | |
|---|--|--|--|--|--|
| Capacitance range (E12 series) | 0.001 μF to 4.7 μF (preferred values acc. to E6) | | | | |
| Capacitance tolerance | ± 20 %; ± 10 %; (± 5 % on request) | | | | |
| Rated AC voltage | 310 V _{AC} ; 50 Hz to 60 Hz | | | | |
| Permissible DC voltage | 800 V _{DC} at 85 °C 630 V _{DC} at 110 °C | | | | |
| Climatic testing class according to IEC 60068-1 | 55 / 110 / 56 / B for volumes > 1750 mm ³ 55 / 110 / 56 / C for volumes \leq 1750 mm ³ | | | | |
| Maximum application temperature | C ≤ 470 nF: 110 °C (125 °C for less than 1000 h) C > 470 nF: 110 °C | | | | |
| Reference standards | IEC 60384-14 ed-4 (2013) and EN 60384-14 IEC 60065, pass. flamm. class B for volumes > 1750 mm ³ CSA-E384-14; CQC UL 60384-14 | | | | |
| Dielectric | Polypropylene film | | | | |
| Electrodes | Metallized film | | | | |
| Construction | Mono construction | | | | |
| Encapsulation | Plastic case, epoxy resin sealed, flame retardant class UL 94 V-0 | | | | |
| Leads | Tinned wire | | | | |
| Marking | C-value; tolerance; rated voltage; sub-class; manufacturer's type; code for dielectric material; manufacturer location, year and week; manufacturer's logo or name; safety approvals | | | | |

Notes

⁽¹⁾ For detailed tape specification refer to packaging information: <u>www.vishay.com/doc?28139</u>

(2) Packaging will be bulk for all capacitors with pitch ≤ 15 mm and such with long leads (> 5 mm). Capacitors with short leads up to 5 mm and pitch > 15 mm will be in tray and asking code will be "T".

MOUNTING

Normal Use

The capacitors are designed for mounting on printed-circuit boards. The capacitors packed in bandoliers are designed for mounting in printed circuit boards by means of automatic insertion machines.

For detailed tape specifications refer to Packaging Information: www.vishay.com/doc?28139

Specific Method of Mounting to Withstand Vibration and Shock

In order to withstand vibration and shock tests, it must be ensured that the stand-off pips are in good contact with the printed-circuit board:

- For pitches \leq 15 mm capacitors shall be mechanically fixed by the leads
- For larger pitches the capacitors shall be mounted in the same way and the body clamped in addition

Space Requirements on Printed Circuit-Board

The maximum space for length (I_{max}), width (w_{max}), and height (h_{max}) of film capacitors to take in account on the printed circuit board is shown in the drawings:

- For products with pitch \leq 15 mm, $\Delta w \ge \Delta l = 0.3$ mm and $\Delta h = 0.1$ mm
- For products with 15 mm < pitch \leq 27.5 mm, $\Delta w \times \Delta l = 0.5$ mm and $\Delta h = 0.1$ mm
- For products with pitch = 37.5 mm, $\Delta w \ge \Delta l = 0.7$ mm and $\Delta h = 0.5$ mm

Eccentricity defined as in drawing. The maximum eccentricity is smaller than or equal to the lead diameter of the product concerned.

SOLDERING CONDITIONS

For general soldering conditions and wave soldering profile, we refer to the application note: "Soldering Guideline for Film Capacitors": <u>www.vishav.com/doc?28171</u>

Storage Temperature

 T_{stq} = -25 °C to +35 °C with RH maximum 75 % without condensation

Ratings and Characteristics Reference Conditions

Unless otherwise specified, all electrical values apply to an ambient free air temperature of 23 °C \pm 1 °C, an atmospheric pressure of 86 kPa to 106 kPa and a relative humidity of 50 % \pm 2 %.

For reference testing, a conditioning period shall be applied over 96 h \pm 4 h by heating the products in a circulating air oven at the rated temperature and a relative humidity not exceeding 20 %.

CHARACTERISTICS

Capacitance as a function of ambient temperature (typical curve)

Tangent of loss angle as a function of frequency (typical curve)

Impedance as a function of frequency (typical curve)

Resonant frequency as a function of capacitance (typical curve)

100 T_{amb} (°C) Insulation resistance as a function of ambient temperature (typical curve)

60

80

40

APPLICATION NOTES

- For X2 electromagnetic interference suppression in standard across the line applications (50 Hz / 60 Hz) with a maximum mains voltage of 310 V_{AC}.
- For series impedance applications we refer to application note <u>www.vishay.com/doc?28153</u>

20

0

- For capacitors connected in parallel, normally the proof voltage and possibly the rated voltage must be reduced. For information depending of the capacitance value and the number of parallel connections contact: rfi@vishav.com
- These capacitors are not intended for continuous pulse applications. For these situations, capacitors of the AC and pulse programs must be used.
- The maximum ambient temperature must not exceed 110 °C (125 °C for less than 1000 h) for C ≤ 470 nF and 110 °C for C > 470 nF.
- Rated voltage pulse slope:

if the pulse voltage is lower than the rated voltage, the values of the specific reference data can be multiplied by 435 V_{DC} and divided by the applied voltage.

8

INSPECTION REQUIREMENTS

General Notes

Sub-clause numbers of tests and performance requirements refer to the "Sectional Specification, IEC Publication IEC 60384-14 ed-4 (2013) and Specific Reference Data".

| GROUP C INSPECTION REQUIREMENTS | | | | | | | | | |
