

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Product Specification

QSFP+ Evaluation Board

FDB-1042

Finisar's FDB-1042 QSFP+ Evaluation Board is designed for testing and evaluating the QSFP+ transceiver and Quadwire™ Active Optical Cables.

The board consists of a single QSFP+ edge connector and QSFP+ cage assembly, sixteen 50-ohm SMP coaxial connectors (J1-J16) for the high-speed differential transmitter input and receiver output signals, and test points with LED's for monitoring the following QSFP+ and Evaluation Board pins:

- Module Select
- Module Reset
- SM Bus
- USB Bus
- Module Low Power Mode
- Module Interrupt
- Module Present
- Module Status

The I2C pins (SDA, SCL and GND) have tap points available on top of the Evaluation Board while there are three taps on the bottom that are for loading the FW to the microprocessor (for internal use only). The Evaluation Board has LED's for the USB, Microcontroller Power, Module Power and External Power as well. It is compatible with all MSA compliant QSFP+ transceivers.

Software that will provide additional functionality is planned to be added at a later date.

It is recommended that the switch (underneath the Evaluation Board) be set to 1000 as the default setting. However, the user is free to change this at any time.

SPECIFICATIONS

The FDB-1042 QSFP+ Evaluation Board is powered by a supply voltage of 6V (positive center) at 2A from the 100V-240VAC, 50-60Hz adaptor (included with the purchase of the board).
