## FDG6322C Dual N & P Channel Digital FET

### General Description

These dual N & P-Channel logic level enhancement mode field effect transistors are produced using Fairchild's proprietary, high cell density, DMOS technology. This very high density process is especially tailored to minimize on-state resistance. This device has been designed especially for low voltage applications as a replacement for bipolar digital transistors and small signal MOSFETs. Since bias resistors are not required, this dual digital FET can replace several different digital transistors, with different bias resistor values.

### Features

- N-Ch 0.22 A, 25 V,  $R_{DS(ON)} = 4.0 \Omega @ V_{GS} = 4.5 V$ ,  
 $R_{DS(ON)} = 5.0 \Omega @ V_{GS} = 2.7 V$ .
- P-Ch -0.41 A, -25V,  $R_{DS(ON)} = 1.1 \Omega @ V_{GS} = -4.5V$ ,  
 $R_{DS(ON)} = 1.5 \Omega @ V_{GS} = -2.7V$ .
- Very small package outline SC70-6.
- Very low level gate drive requirements allowing direct operation in 3 V circuits ( $V_{GS(th)} < 1.5 V$ ).
- Gate-Source Zener for ESD ruggedness (>6kV Human Body Model).

**ANTI-COUNTERFEITING POLICY**

Fairchild Semiconductor Corporation's Anti-Counterfeiting Policy. Fairchild's Anti-Counterfeiting Policy is also stated on our external website, [www.Fairchildsemi.com](http://www.Fairchildsemi.com), under Sales Support.

Counterfeiting of semiconductor parts is a growing problem in the industry. All manufactures of semiconductor products are experiencing counterfeiting of their parts. Customers who inadvertently purchase counterfeit parts experience many problems such as loss of brand reputation, substandard performance, failed application, and increased cost of production and manufacturing delays. Fairchild is taking strong measures to protect ourselves and our customers from the proliferation of counterfeit parts. Fairchild strongly encourages customers to purchase Fairchild parts either directly from Fairchild or from Authorized Fairchild Distributors who are listed by country on our web page cited above. Products customers buy either from Fairchild directly or from Authorized Fairchild Distributors are genuine parts, have full traceability, meet Fairchild's quality standards for handling and storage and provide access to Fairchild's full range of up-to-date technical and product information. Fairchild and our Authorized Distributors will stand behind all warranties and will appropriately address and warranty issues that may arise. Fairchild will not provide any warranty coverage or other assistance for parts bought from Unauthorized Sources. Fairchild is committed to combat this global problem and encourage our customers to do their part in stopping this practice by buying direct or from authorized distributors.
