

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

A listing of ON Semiconductor's product/patent coverage may be accessed at www.onsemi.com/site/pdf/Patent-Marking.pdf. ON Semiconductor reserves the right to make changes without further notice to any products herein. ON Semiconductor makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does ON Semiconductor assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. Buyer is responsible for its products and applications using ON Semiconductor products, including compliance with all laws, regulations and safety requirements or standards, regardless of any support or applications information provided by ON Semiconductor. "Typical" parameters which may be provided in ON Semiconductor data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. ON Semiconductor does not convey any license under its patent rights nor the rights of others. ON Semiconductor products are not designed, intended, or authorized for use as a critical component in life support systems or any EDA Class 3 medical devices with a same or similar classification in a foreign jurisdiction or any devices intended for implantation in the human body. Should Buyer purchase or use ON Semiconductor products for any such unintended or unauthorized application, Buyer shall indemnify and hold ON Semiconductor and its officers, employees, emplo

FGL40N120AND 1200V NPT IGBT

Features

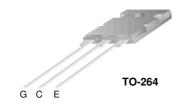

- · High speed switching
- Low saturation voltage : V_{CE(sat)} = 2.6 V @ I_C = 40A
- · High input impedance
- CO-PAK, IGBT with FRD : $t_{rr} = 75$ ns (typ.)

Applications

Induction Heating, UPS, AC & DC motor controls and general purpose inverters.

Description

Employing NPT technology, Fairchild's AND series of IGBTs provides low conduction and switching losses. The AND series offers an solution for application such as induction heating (IH), motor control, general purpose inverters and uninterruptible power supplies (UPS).

Absolute Maximum Ratings

Symbol	Parameter		FGL40N120AND	Units	
V _{CES}	Collector-Emitter Voltage		1200	V	
V _{GES}	Gate-Emitter Voltage		±25	V	
ı	Collector Current	@T _C = 25°C	64	Α	
IC	Collector Current	@T _C = 100°C	40	Α	
I _{CM(1)}	Pulsed Collector Current		160	Α	
I _F	Diode Continuous Forward Current @T _C = 100°C		40	Α	
I _{FM}	Diode Maximum Forward Current		240	Α	
В	Maximum Power Dissipation	@T _C = 25°C	500	W	
P_{D}	Maximum Power Dissipation	@T _C = 100°C	200	W	
SCWT	Short Circuit Withstand Time, V _{CE} = 600V, V _{GE} = 15V, T _C = 125°C		10	μs	
T _J	Operating Junction Temperature		-55 to +150	°C	
T _{STG}	Storage Temperature Range		-55 to +150	°C	
T _L	Maximum Lead Temp. for Soldering Purposes, 1/8" from Case for 5 seconds		300	°C	

Notes

(1) Pulse width limited by max. junction temperature

Thermal Characteristics

Symbol	Parameter	Тур.	Max.	Units
$R_{\theta JC}(IGBT)$	Thermal Resistance, Junction-to-Case		0.25	°C/W
$R_{\theta JC}(DIODE)$	Thermal Resistance, Junction-to-Case		0.7	°C/W
$R_{\theta JA}$	Thermal Resistance, Junction-to-Ambient		25	°C/W

LIFE SUPPORT POLICY

FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF FAIRCHILD SEMICONDUCTOR CORPORATION.

As used herein:

- Life support devices or systems are devices or systems which,

 (a) are intended for surgical implant into the body or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury to the user.
- A critical component in any component of a life support, device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
