imall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

0.5 mm and 1 mm Pitch, 2.55 mm Height FPC/FFC Connectors

FH28 Series

Features

1. Highly reliable connection and robust structure

Multi-polarized connectors, reinforced body structure and high FPC retention produced by the following features: Reliable connection created by its unique FPC/FFC positioning mechanism

Prevents accidental disengagement with the design of its proprietary structure

2. Simplified operations

The flip lock structure makes it easier to engage/disengage the actuator and reduces the required force needed to operate. A clear tactile click is delivered upon the successful completion of the mating process.

3. Increased FPC/FFC retention force

Vertical retention force for the FPC/FFC is 2.5 times stronger than our 0.5 mm pitch connector the FH12 series. Horizontal retention force for the FPC/FFC is 2 times stronger than our 0.5 mm pitch connector the FH12 series

*To realize the horizontal retention force values, the use of the FPC positioning tabs are required. FPC without the positioning tabs will comply with the specifications rated on the FH12 series.

4. Accepts standard 0.3 mm thick FPC/FFC

It accepts 0.3 mm thick products that are easy to manufacture and have superb insertion performance.

5. Fully molded structure aids PCB layout

The bottom of this connector is enclosed by a fully molded structure that protects the contacts and removes any restrictions from PCB patterning and design.

Supports automatic pick-n-place mounting Offered in tape and reel packaging that is compatible with

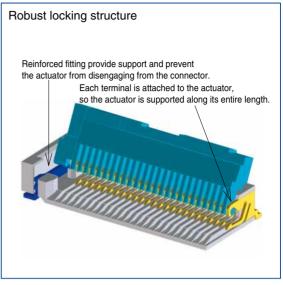

automatic machine mounting. (2,000 pieces per reel)

7. Halogen-free

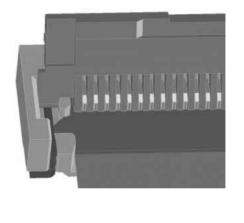

All materials and substances used to produce this product comply with Halogen-free standards.*Defined according to IEC61249-2-21. Br: 900 ppm maximum, Cl: 900 ppm maximum, Br+Cl: 1,500 ppm maximum

8. Multiple packing options

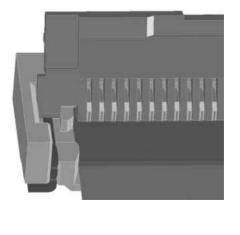

The standard packaging is 2,000 pieces per reel, but it is also offered in a 500 piece reel. (The outer diameter of the reel will be ϕ 330 mm in this case.)

The FPC positioning mechanism and FPC tabs help to guide and hold the FPC prior to engaging the actuator

Can also be used with straight sided, non-tabbed FPC/FFC

2013.112 **HS** 1

■FH28 Series FPC/FFC Material Configuration (Recommended Specifications)

1. Single-Sided FPC

FPC : Flexible Printed Circuit

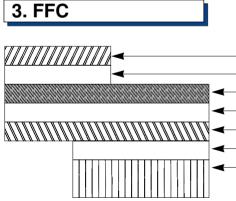

Layer	Materials		Thickness (μ m)
Cover lay film	Polymide	1mil	(25)
Cover adhesive			(25)
Surface treatment	Under nickel plating 1~5	μ m+gold plating 0.2 μ m	3
Copper foil	Cu	1oz	35
Base adhesive	Heat stiffene	r adhesive	25
Base film	Polymide	1mil	25
Stiffener adhesive	Heat stiffene	r adhesive	30
Reinforcing film	Polymide	7mil	175
	Total		293

2. Double-sided FPC

FPC : Flexible Printed Circuit

	Layer	Materials	Thickness (µm)
//////////////////////////////////////	Cover lay film	Polymide 1mil	(25)
	Cover adhesive		(25)
	Surface treatment	Under nickel plating 1~5 $\mu {\rm m+}$ gold plating 0.2 $\mu {\rm m}$	3
	Through hole copper	Cu	15
	Copper foil	Cu 1/2oz	18
	Base adhesive	Heat stiffener adhesive	18
	Base film	Polymide 1mil	25
	Base adhesive	Heat stiffener adhesive	18
<u> </u>	Copper foil	Cu 1/2oz	(18)
	Cover adhesive	Heat stiffener adhesive	25
	Cover lay film	Polymide 1mil	25
	Stiffener adhesive	Heat stiffener adhesive	50
	Reinforcing film	Polymide 4mil	100
* Remove the conner foil on the back of double-	sided EPC to avoid	Total	297

* Remove the copper foil on the back of double-sided FPC to avoid damage due to FPC bending.

FFC : Flexible Flat Cable

Layer	Materials	Thickness (μ m)
Polyester film		12
Adhesive	Polyester thermal plasticity	30
Annealed copper foil (Gold plated with under nickel plating)		35
Adhesive	Polyester type	30
Polyester		12
 Adhesive	Polyester type	30
 Reinforcing film	Polyester type	188
	Total	295

Nominal thickness tolerance is approximately $\pm 20 \mu$ m.

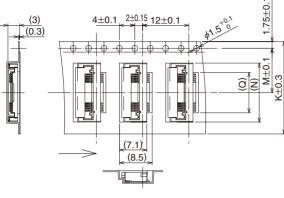

1. These specifications are an example of the material configuration of an FPC/FFC (t= 0.3 ± 0.05) used on the FH28 series.

2. Please contact the FPC/FFC manufacturer for the material configurations of their FPC/FFC.

■Packaging Specifications

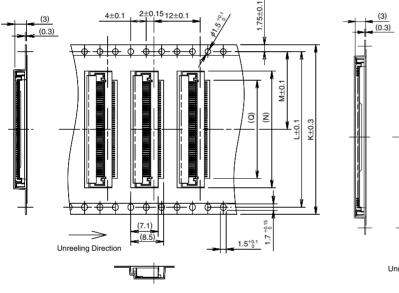

[Common specifications for FH28 Series]

•Embossed Carrier Tape Dimensions (with a maximum tape width of 24 mm)

Operation Methods of Connector and Precautions

Cautions when mating FFFC/FPC with positioning tabs

Operation Methods Precautions for use 1. Position for insertion PC/FFC must not over lap Do not close the actuator until the FPC/FFC has been Insert the cable into the gap (.....) between the side walls placed into its correct position. If it is sitting on the guides >) on both sides of the cable insertion port' and the 'guide and the actuator closes onto it, it can cause damage and putting the tab of the cable on the gap. alter its performance. Incorrectly placed onto the left guide Incorrectly placed onto the right guide 2. Cautions during insertion/mating 1 Do not insert the FPC/FFC at an skewed angle (as shown), this type of action may cause the corner of the Normal insertion cable to get hooked and deform its contacts. Skwed insertion Do not close the actuator with the cable sitting on either guide. Insert the cable straight into the connector opening and hook the cable tab onto the guide. Pull the cable towards yourself with a slight force after mannan insertion, and close the actuator after confirming that the cable tab is completely secured. If it cannot be pulled to out, the cable can be determined to be inserted into the correct position. Recommended mating method In case you accidentally close the lock with the cable sitting on the guides, do not move the cable around to make it seat. Open the actuator immediately and reposition the Insert the cable cable as explained in "1. Position for insertion" noted straight from the above. diagonally left side 2 Pull the cable lightly to yourself and check if the tab is secured. Pulling direction (3) Close the actuator
