Servo Y extension cable (500mm)

SKU: FIT0335 Brand: Other

INTRODUCTION

This 500 mm Y-cable is typically used to connect two servos to a single servo port on an RC receiver or servo controller. It has a single female JR connector connected to two male JR connectors, which means it is compatible with almost all of the RC servos. The connectors have gold-flashed contacts on a 0.1" spacing. The split occurs near the midpoint of the cable, so the two male ends can be separated by up to approximately 500mm(19.68").

- Black: GND
- Red : Servo power
- White : Signal

APPLICATIONS

- RC car, plane and helicopter servo connection or receiver connection

SHIPPING LIST

- Servo Y extension cable(500mm)(19.68") x1
